As you grow up, you might have hit a few crossroads and stand at a precipice of decisions. It can come at 18, or any point in your lifetime.
Lao Tzu says: ‘Knowing others is intelligence; knowing yourself is true wisdom.’ How to make a decision as you are about to leave high school behind and step into the unknown? As a university steeped in its general education and collegiate tradition, CUHK gives you the flexibility and catalyst to grow and develop as a person. We are home to the intellectually curious who aspire to deepening their self-knowledge, treading the less trodden path, and understanding the ever-changing world. Choose WISELY. Join us on the same journey!

Prof. Rocky S. Tuan
Vice- Chancellor and President
Your future is shaped by your decisions. In a fast-paced digital society, creativity and innovation are the wings that let your dreams take flight. As Asia’s most innovative university in Hong Kong for three years in a row, CUHK has been translating creative ideas into real actions, services and products, contributing to the progress of society. We are committed to bringing out your best potential with our interdisciplinary and holistic education. **Choose BOLDLY.** Tread the path that allows you the opportunities for growth.

**Prof. Wong Suk-ying**  
*Director of Admissions and Financial Aid*

The University’s commitment to improving its educational quality has never ceased. Our academic programmes and informal education including I-CARE, collegiate education and the General Education Foundation Programme have been recognized by the Quality Assurance Council. Our teachers also strive to perfect their pedagogical approaches and develop students’ inquisitive and innovative mindset.
**Prof. Emily Chan**  @Public Health and Primary Care  
Recipient of 2017 UGC Award for Teaching Excellence  

I prioritize #knowledge.transfer of disaster and medical humanitarian response and research on disaster risk management. My #student-oriented pedagogy pulls together a global #field-based training network through my projects and partners.

💬 4  ⬇️ 32  ⬆️ 25

---

**Prof. H.Y. Edwin Chan**  @Life Sciences  
Associate Vice-President & University Dean of Students  

I benefitted a lot from the good professors at CUHK, who did not just show me how to be a scientist but also the #value.of.education. I’d like to follow their footsteps to facilitate students’ growth.

💬 1  ⬇️ 25  ⬆️ 33

---

**Prof. David Faure**  @Centre for China Studies  
Director of the Centre & Wei Lun Research Professor of History  

We seek to link #ChinaStudies to different academic disciplines. We also leverage CUHK’s networks in China to make individualized fieldwork and internship available to our students.

💬 13  ⬇️ 60  ⬆️ 10

---

**Prof. Samuel Au**  @Mechanical and Automation Engineering  
Co-inventor of the da Vinci Single-Site surgical platform  

To translate #BenchsideResearch into #BedsideProducts, we have to predict whether the concept strategically makes sense or not, and what problems will emerge in the manufacturing stage. This is what I want to impart to my students.

💬 24  ⬇️ 9  ⬆️ 16

---

**Prof. Suzanne So**  @Psychology  
Recipient of 2017 UGC Award for Teaching Excellence  

I’ve introduced the #Self-Practice/Self-Reflection approach, turning CUHK into the first Asian institution adopting this approach in clinical psychology training. This helps transform my students into #competent and #empathic clinicians.

💬 9  ⬇️ 18  ⬆️ 22

---

**Prof. Shekhar Madhukar Kumta**  @Orthopaedics and Traumatology  
Recipient of 2012 UGC Award for Teaching Excellence  

What we teach and the way we teach will touch the lives of many countless others. I believe that effective #e-learning can improve the quality of face-time #interaction as students are better prepared for learning.

💬 23  ⬇️ 27  ⬆️ 45

CUHK is a world leader in non-invasive prenatal testing theory and method, genomic studies on plants for sustainable agriculture and food security, and network coding theory that revolutionized data transmission and network applications. To address some of the most pressing issues facing the humankind, we have prioritized four major research areas from our interdisciplinary research strengths.

- China Studies
- Environment and Sustainability
- Information and Automation Technology
- Translational Biomedicine

[Link to CUHK research study page](cuhk.edu.hk/english/research/research-study.html)
Undergraduates from disciplines such as engineering, life sciences, medicine and nursing are furnished with opportunities to undertake research under the supervision of experienced researchers locally, in the mainland or overseas. The University also offers research attachment for outbound and inbound undergraduates, such as Summer Undergraduate Research Programme (SURP), and Summer Research Placement Programme for Mainland and Taiwan Students.

"I went to Cambridge for a nine-week study in 2016, doing a DNA research on a kind of hereditary stroke disorder rarely found in Hong Kong. It exposed me to new research methodologies and pointed to new possibilities."

Candy Kang
MBChB (Global Physician-Leadership Stream), CUHK

"I’ve undertaken a research on International Investment Law Practice in Hong Kong. Prof. Julien Chaisse of CUHK’s Faculty of Law is helpful and supportive. The SURP has expanded my academic knowledge and facilitated my career development."

Konstantina Zariou
University of Sussex, UK

General Research Fund 2018–19
by Research Grants Council

HK$132M
(2nd highest among the local institutions)
As you are about to chart a new course in your university life, struggles are inevitable. Do not hesitate to reach out while coping with challenges. Guidance on university life adjustment and activities promoting intercultural exchange is available to all students. Our counsellors safeguard students’ mental well-being. We also offer financial aid in the forms of scholarships, bursaries, loans and student campus work schemes.
University life was more challenging than I expected. I sometimes missed India. But when I participated in more campus activities, I started to cultivate friendship and identify my own rhythm. CUHK is a caring campus. Don’t hesitate to reach your teachers, learning enhancement officers, academic advisors and friends for help.

**Yash Sunil Kukadia**

*Computer engineering student and president of International Student Association*

I love literature. After graduating from CUHK, I plan to pursue a Master’s degree at Oxford. But my family can’t afford the high costs of studying abroad, not to mention Oxford. The scholarship covers full tuition fees, transportation expenses to and from the UK, as well as a stipend. I look forward to meeting talent from different cultures.

**Carissa Ma**

*English alumna and Esther Yewpick Lee Millennium Scholarship recipient*

Technological advancements are transforming the future employment landscape. Amid estimates that 65% of today’s primary school children will end up working in jobs that don’t yet exist, a major shift towards the entrepreneurial economy is taking place. To help aspiring entrepreneurs navigate the new economy, various University units have been offering mentorship, space, tools, training, financial support and opportunities to turn their ideas into reality.

Campus-wide Initiatives

Hong Kong’s first university-wide Minor Programme in Entrepreneurship and Innovation (EPIN) was launched in September 2017 to foster a creative culture on campus.

“EPIN is open to undergraduates from different disciplines and nationalities. It offers an opportunity for students to identify their future partners and learn to communicate with people from different fields of expertise.”

Prof. Andy Wong
Co-Director of EPIN

Minor Programme in Entrepreneurship and Innovation
CUHKEPIN

The Pre-Incubation Centre (Pi Centre) aims to stimulate creativity and entrepreneurship by offering up to one year of workspace, facilities and mentoring services to teams of students starting companies that commercialize technologies and realize innovative business ideas.

“We welcome students who have a passion to create significant human, social or market value. Teams that have satisfactory progress can work out the product, establish a startup venture, obtain investment or gain entry into external incubation programmes.”

Mr. Jonathan Chee
Pi Centre Manager

Pre-Incubation Centre

Innovation Showcase
Our students and alumni from diverse disciplines have been active in finding solutions that bring positive changes, some of which have been recognized in competitions such as Hong Kong Social Enterprise Award and PwC Hong Kong’s Cybersecurity Competition. In 2018, CUHK wins the most awards in the ‘Challenge Cup’ National Competition Hong Kong Regional Final.

Assessment Tool for Child Speech Disorders Based on Intelligent Speech Technology
Two electronic engineering students have developed a mobile app that identifies children’s speech errors and helps parents seek help from speech therapists at an earlier stage.

Mushroom for the NeXt
Four life sciences students have discovered the hyphae of different mushrooms that can be used as packaging material and building material.

Festy
Sociology alumna Ruby Yip hires low-income housewives to prepare ready-to-cook meal packages for clients to promote healthy home dining.

These centres and activities help groom aspiring entrepreneurs:

- Center for Entrepreneurship (CfE)
- Centre for Innovation and Technology (CINTEC)
- Pre-Incubation Centre (Pi Centre)
- Creativity Laboratory (c!ab), Wu Yee Sun College
- Young Entrepreneur Programme (YEP), S.H. Ho College
- Group Sense Innovation and Entrepreneurial Project Award, United College
- Minor Programme in Entrepreneurship and Innovation
- CUHK Entrepreneur Day
- CUHK Alumni Entrepreneurs Association
- CUHK Entrepreneurship Competition
We innovate for social impact

Prof. Dennis Lo deciphered a genome-wide genetic map of the fetus and developed the world’s first non-invasive prenatal testing

Four areas of research priorities:
- China Studies
- Translational Biomedicine
- Information and Automation Technology
- Environmental and Sustainability

Reuters Asia’s Most Innovative Universities

1st in Hong Kong in 2016, 2017 and 2018
Research partnerships with numerous multinational corporations for research innovation (e.g., Microsoft & Roche)

Over 600 granted patents in different jurisdictions worldwide

Imsight Medical Tech., one of China’s AI top 50 companies, was co-founded by Prof. Heng Pheng-Ann and Dr. Chen Hao

An InnoHub in Shenzhen to expand its entrepreneurial ecosystems, the first established by a Hong Kong institution

Prof. Gladys Tang founded SLCO-CR to provide community services based on linguistics research and empirical evidence

Prof. Sean Tang and Prof. Wang Xiaogang developed a novel facial recognition system with 99.5% accuracy
University education can be life-changing. Unlike high school education, you take charge of your own learning pace, observing the changing world, identifying your strengths and setting your learning goals. Immerse yourself in the learning activities with like-minded peers.

Like Germany, Hong Kong is a multicultural place with a vibrant city culture. I've been taking part in the CUHK Wu Zhi Qiao project for #bridge-building and community improvement projects in remote regions in mainland China. It's truly impactful in my life. #cross-disciplinary #studio-learning

After studying the vast range of electives, I found #MAE no ordinary one, especially the #robotics and the #automation stream. International developments and global engagement are another special feature of the programme. #design.manufacturing #mechatronics

The #LLB programme is very much anchored in #dailylife and in tune with #currentaffairs. My favourite learning experience is the ability to utilize my knowledge outside the classroom. For instance, we represented CUHK at a #mooting competition in Singapore, which simulated a court trial. #internship
#gps furnishes us with early research experience such that we can enrich our medical practice with biomedical knowledge and clinical research. All these help us better understand the scientific bases for diseases, and select the best treatment or management of diseases. #mentorship #medicalscientists

#qfrm is about the use of maths in finance and riskmanagement, and understanding of the underlying marketmechanism. The capstone courses give me a chance to solve the urgent and prevalent problems in the industry. I also have strong support on career coaching and counselling.

I’m particularly impressed by the world-class scholars and the diverse curriculum in the Music Department. In addition to studying music as a humanistic discipline, we are given opportunities to advance our skills by taking performance lessons with topmusicians in Hong Kong.
Besides imparting knowledge, we strive to nurture your leadership, resilience and competencies as you embark on your life journey. A plethora of formal and experiential learning opportunities are provided to foster your holistic development.
General Education

CUHK’s general education, a key component of undergraduate studies, is built upon a balanced approach to whole-person education that combines Chinese humanistic ideals and western liberal arts contents. Through the study of classics and intellectually stimulating discussions, you will explore the world of science and knowledge, and reflect on the ideal society and good life.

[Link to CUHK’s general education information]

Collegiate Education

A College does not only provide residence, but also offers a wide array of non-formal learning opportunities and pastoral care to complement the formal curricula, nurture students’ interpersonal skills and cultural sensitivity, and build up their confidence and sense of social responsibility. The Colleges are congenial communities in which students learn and grow. Each College is distinctive, but together they shape the character of the University.

[Link to CUHK’s collegiate education system information]
The world is your classroom. At CUHK, you are furnished with many exchange programmes and short-term experiential learning activities. Such opportunities help you appreciate new cultures, hone language skills, grow confidence, and prepare for a career in a globally connected world.

Number of Exchange Partners: 278

In 34 Countries/Regions

Number of students participating in Outgoing Exchange: 7,347

Number of students participating in Incoming Exchange: 3,318

Worldwide internships every year: 650+
Student Exchange and Summer Abroad

Computer science student Lau Yu-hei has benefitted academically by taking various subjects during his exchange at Macquarie University. He was also impressed by the amazing natural habitat in Australia, which aroused his awareness in environmental protection.

The Computer Science courses have equipped me with computational knowledge. The Sociology courses I took also broadened my sight and gave me inspiration about life.

Global Internship Programme

Global business student Cherry Yau (2nd row, centre) interned at Yunnan Grameen Bank founded by the Nobel Peace Prize-winning Bangladeshi Prof. Muhammad Yunus. She discovered that the internship liberated her from her rooted view in financial industry.

Grameen Bank can serve not only customers with asset but also the poor. We don’t need to see profit-making and poverty relief as antitheses.

Presence in Greater China

In collaboration with China’s Southwest University, CUHK launched its first Belt and Road Initiative Study Tour to Central Europe in 2018. Cultural management student Liu Oi-ting (1st right) explored Central Europe after her voyage to observe the traditional and the contemporary in Chongqing.

The rich heritage resources in cities like Olomouc, Prague and Vienna were mind-opening. I also learnt from Dr. Medalis who taught us the development of Central Europe.

Career Development

Hotel and tourism management student Michael Yim interned for eight weeks at the Airport Authority Hong Kong. He was responsible for organizing and analyzing aircraft landing and parking charge data, as well as making a proposal on streamlining data processing.

The internship consolidated my understanding in airport and airline management, which was taught in lectures. My site supervisors also offered me eye-opening opportunities in the airfield operations.
CUHK bustles with intellectual, cultural, physical and mind-nurturing activities. Join us, find your own rhythm and thrive!
You will be part of the two categories of CUHK students: learners in the same department sharing similar academic interests, and folks in the same College coming from diverse backgrounds. Your university years will be more memorable, with the two groups of peers who support you socially, intellectually and emotionally.

#grm is a #close-knit community, in which we are used to exchanging views and discoveries. Participating in the Hong Kong Tertiary Schools COP21 Challenge was unforgettable. We proposed a feasible #solution to address a local #climatechange issue and learnt a lot in the process.

My Pakistani roommate @morningside told me about the plight of local ethnic minority groups. I therefore offered #voluntary tutoring with some friends. Now we have served more than 10 public estates. Together we’ve ignited one another’s #socialresponsibility.
My #ibba classmates have a #sharedvision and collaborate to overcome challenges. After all, #teamwork is vital in the workplace. Last summer, I gained practical knowledge in global trade finance as an #intern in a local bank. It laid a sound foundation for my future career.

I fully uphold the idea of #fullresidence @shho. I’ve made friends from different #cultures there, some have become my best friends who support me to be a calligraphy freelancer. I started to sell my designs at #shhonight and the responses were encouraging.
Culture disseminators. Visionary trendsetters. Bold entrepreneurs. Innovative pioneers. Problem-solvers. Self-challengers. These are some of our alumni’s attributes. Together they have presented an outlook of the CUHK community. Meet some of our distinguished alumni here.

I completed the three-year Oxford Jurisprudence programme in two years, after receiving my BBA degree at CUHK. It’s all about hard work. When you see a barrister putting forth watertight arguments in court or cross-examining a defendant with precision and pertinence, he must have spent hours reading up on documents and precedent cases. If you take every case seriously, you will impress the judge and the opposing counsel with your clear and coherent delivery.

#rhodes.scholar  #law  #diligence
I co-founded Beyond Ventures with my partners to support the local startup ecosystem. Why do investors favour the Silicon Valley and Greater China markets? I foresee more than five local ‘unicorns’ will emerge by 2020, which are worth US$ 1 billion each. I target to spend several years to convince investors that Hong Kong has plenty of potential startups.

#entrepreneurship  #HKspirit  #financing
THE ME I WANT TO BE

Opportunities favour the prepared. Observe the evolving global trends and the societal needs. Explore your own life themes with our learning community. You can be the author of your own chapter.
