Ms. Evelyn Chan Hiu-tung of United College has been chosen as Hong Kong Rhodes Scholar for the year 2005. Evelyn is the tenth CUHK student to have been awarded this prestigious scholarship making CUHK the local university with the most Rhodes scholars.

Currently a final-year student majoring in business administration, Evelyn will begin her Master of Philosophy studies in social anthropology at the University of Oxford in October 2005.

Evelyn has demonstrated herself to be an individual of high intellectual ability, with a strong academic record and well considered ambitions. She is also an outgoing young woman of integrity and maturity. She enjoys interacting with people and is active in a range of extracurricular activities.

During her studies at CUHK, Evelyn was on a yearlong exchange at the University of Chicago, and was an enthusiastic participant of cultural

activities. She teamed up with three other students of the Faculty of Business Administration at CUHK to participate in the Copenhagen Business School Case Competition. Among 12 teams from

world renowned business schools, the CUHK team took second runner-up. A keen debater, Evelyn was awarded the best debater in the local Joint Universities Debating Competition and selected to represent CUHK at the World Universities Debating Championship in Toronto. Evelyn also participated in the China Career Development Award Programme, and took part in a month-long internship in Shanghai.

The Rhodes Scholarships were established after the death of Sir Cecil Rhodes in 1902, and were originally allocated to students from the Commonwealth countries, the US and Germany. Since the inclusion of Hong Kong to the list of countries in 1985, one student from Hong Kong has been honoured as Rhodes Scholar each year.

## Expert Shows How Supply Chain Management Can Create New Values

Prof. Hau L. Lee, Thoma Professor of Operations, Information and Technology at the Graduate School of Business, Stanford University, delivered a Li & Fung Lecture on Commerce and Industry on 30th May at the JW Marriott. The lecture was entitled 'Value-creating Supply Chain Management'. In attendance were over 200 government officials, consulate generals, company CEOs, University officers, and MBA alumni.

Supply chain management is about the coordination of information, material and financial flow. It is viewed as the backbone for the efficient delivery of goods to services and companies. But it can also serve as an engine for value creation. The talk described how companies that have mastered agility in their operations, adapted their supply chains to meet the unique needs of

the market, and aligned the interests of their supply chain partners, can penetrate new markets, build customer loyalty, gain market share, generate profits, and ultimately create great market value.

Prof. Lee is the founding and current director of the Stanford Global Supply Chain Management Forum, an industry-academic consortium to advance the theory and practice of global supply chain management.

## Calcium Deficiency Raises Risk of Elderly Hypertension

Hypertension, defined as blood pressure over 140/90 mmHg, affects about 55 per cent of elderly subjects in Hong Kong. In Westernized societies, high salt intake combined with low potassium and calcium intakes, and other factors may be responsible for the prevalence of hypertension and related complications among seniors.

The Faculty of Medicine has conducted two studies to determine the prevalence of hypertension in older subjects in Hong Kong in relation to their calcium intake. Among 110 vegetarians aged over 55, 65 per cent were found to have hypertension. They were found to have lower calcium and potassium intake but higher salt intake. Among 234 free-living subjects aged over 55, 53 per cent

were found to suffer from hypertension. A similar trend for the protective effect of dietary calcium intake against hypertension was detected.

Subjects with higher calcium intake tend to have lower blood pressure and reduced risk of hypertension. Age-related increases in blood pressure are attenuated by higher calcium intake. Calcium may help decrease blood pressure by increasing sodium excretion by the kidneys and relaxing blood vessels.

The Faculty of Medicine urges seniors to consumer more calcium and potassium and less salt as protection against hypertension, and to be aware of the crucial role of calcium in disease prevention and its main dietary sources.

## Global Study Finds Hong Kong One of the Least Entrepreneurial

Hong Kong's total entrepreneurial activity in 2004 is still among the lowest in the world, according to a study conducted by the Centre for Entrepreneurship of the University jointly with the Shenzhen Academy of Social Sciences.

The study is the third of a three-year study of entrepreneurship led by CUHK to measure Hong Kong's performance against some 30 other economies in the Global Entrepreneurship Monitor (GEM) Consortium, an international consortium of some 150 researchers in over 40 countries who periodically poll entrepreneurship worldwide. The GEM is a research project launched by leading scholars from Babson College and the London School of Business in 1999 to measure, on an annual basis, entrepreneurship around the world. From 2003, the Hong Kong study also covers Shenzhen as well as the cross-border entrepreneurial activities.

The Hong Kong team is led by Prof. Chua Bee-leng, director of the CUHK Centre for Entrepreneurship. Using a

Prof. Jack Cheng (left), pro-vice-chancellor, and Prof. Chua Bee-leng officiating at the launch of the centre on 24th May 2005

measure called total entrepreneurship activity which counts the percentage of adults in the population that are involved in starting new companies in the last three years, the study shows that Hong Kong, with three per cent of the population involved in new start-ups, is among the least entrepreneurial in the world and trails well behind Shenzhen with 11.6 per cent. Barriers to early stage entrepreneurial activity are found to be Hong Kong's high cost base, lack of entrepreneurial education and inadequate links between R&D and the market.

## Corrigendum

In the article 'CUHK's First Course on Bone Anchored Hearing', in Issue 261 of the CUHK Newsletter, the first sentence should have read 'The Division of Otorhinolaryngology of the Department of Surgery and the Institute of Human Communicative Research of the University jointly organized the University's inaugural Bone Anchored Hearing Aid (BAHA) Course on 30th April.'

# World's Top Economists Deliver Sun Hung Kai Properties Nobel Laureates Distinguished Lectures

Six distinguished economists, including three Nobel laureates, shared their insight with an audience of over a thousand in Hong Kong on the topic of 'Emergence of China in the World Economy' at the Sun Hung Kai Properties Nobel Laureates Distinguished Lectures. Jointly organized by the Chinese University and Sun Hung Kai Properties (SHKP), the lectures were held on 3rd June at the Kowloon Shangri-la. The speakers were Nobel laureates in economic sciences Prof. Edward C. Prescott (2004), Prof. Robert A. Mundell (1999), and Prof. Sir James A. Mirrlees (1996), as well as world-class economists Prof. Alberto F. Alesina and Prof. Robert J. Barro from Harvard University, and Prof. Edmund S. Phelps from Columbia University. Government economist Mr. Kwok Kwok Chuen, and Dr. Victor Fung, chairman of the Li & Fung Group, were the other panelists.

The Hon. Henry Tang, Acting Chief Executive of the HKSAR, Dr. Raymond Kwok, vice-chairman and managing director of SHKP, and Prof. Lawrence J. Lau, vice-chancellor of the University, presided at the opening ceremony. The 2005 lectures were coordinated by the newly established Institute of Economics of the Chinese University.

Prof. Lawrence J. Lau described the forum as an excellent opportunity for the lay audience to appreciate the challenges faced by the Chinese economy in the age of globalization, and a useful platform for academics and experts in the field to exchange views on ways of addressing these issues. Dr. Raymond Kwok explained that SHKP has launched the lecture series with CUHK with the aim of broadening the perspectives of Hong Kong people, particularly the young, offering them tools and information they need for meeting future challenges, and above all, guiding and inspiring the people of Hong Kong through the examples it offers of rigorous scholarship in action. □

## ■ Prof. Sir James A. Mirrlees

Prof. Mirrlees is distinguished professor-at-large of the Chinese University. He shared the Nobel Prize with Prof. William Vickrey of Columbia University for their fundamental contributions to the economic theory of incentives under asymmetric information. He was knighted for contributions to economic science in 1997. Prof. Mirrlees' work laid the foundation for the modern analysis of complex information and incentive problems.

In his lecture 'Changing Inequality in the Chinese Economy', Prof. Mirrlees expressed the view that though urbanization may increase inequality for a while, it will subsequently reduce it. He predicted that in the next two decades, China should witness enormous migration from rural to urban areas and the resulting higher urban incomes will contribute to the lower parts of the distribution. He also said that rural subsidies such as better schools, healthcare, infrastructure, agricultural subsidies are necessary if inequality is to be reduced sooner.

## ■ Prof. Edmund S. Phelps

Prof. Phelps is McVickar Professor of Political Economy at Columbia University. He has served as consultant of the Treasury Department, Senate Finance Committee, and Federal Reserve Board of the US. His monumental contribution of economics includes introducing imperfect information and imperfect knowledge to macroeconomics. He pioneered the first generation of economic models of unemployment and inflation based on micro-foundations and was the first to stress the importance of reorganizing macroeconomic theory by revising the postulates of the neoclassical paradigm with regard to information and knowledge.

## ■ Prof. Robert A. Mundell

Prof. Mundell has been professor of economics at Columbia University since 1974. His writings include over a hundred articles in scientific journals and books. He prepared one of the first plans for a common currency in Europe and is known as the father of the theory of optimum currency areas. He has also written extensively on the history of the international monetary system and played a significant role in the founding of the Euro. In 1999, he received the Nobel Prize in economic sciences for his analysis of monetary and fiscal policy under different exchange rate regimes and his analysis of optimum currency areas.

His lecture 'The Renminbi and the Global Economy' covered the topics of the rise of China as an economic power, China's macroeconomic condition, and issues relating to the renminbi. He advised against floating the renminbi as a policy for achieving monetary stability, proposing inflation targeting as a relevant option. He observed that large swings in the dollar-renminbi exchange rate are very damaging to China and would greatly exceed any benefits. He also believes that China should remain in the dollar area rather than shifting to the Euro.

## ■ Prof. Robert J. Barro

Prof. Barro is the Paul M. Warburg Professor of Economics at Harvard University, a senior fellow of the Hoover Institution of Stanford University, a viewpoint columnist for *Business Week*, a frequent contributor to the *Wall Street Journal*, and a research associate of the National Bureau of Economic Research. He has written extensively on topics in macroeconomics, economic growth, and monetary policy.

## ■ Prof. Edward C. Prescott

Prof. Prescott holds the W.P. Carey Chair in economics at Arizona State University and is the senior monetary adviser at the Federal Reserve Bank of Minneapolis. He was awarded the 2004 Nobel Prize in economic sciences jointly with Prof. Finn Kydland for their 'contributions to dynamic macroeconomics: the time consistency of economic policy and the driving forces behind business cycles'.

In his lecture 'The Chinese Economy: Past and Future', Prof. Prescott expressed the view that opening up and moving to a market economy are the reasons for China's rapid economic growth since the late 1970s, and that it would become a rich industrial country only if it decentralized its political power.

## ■ Prof. Alberto F. Alesina

Born in Italy, Prof. Alesina is the Nathaniel Ropes Professor of Political Economy at Harvard University and currently chairman of the Department of Economics. He is a leader in the field of political economics and has published extensively in all major academic journals in economics. His scholarly work has been widely cited and been widely influential.

## 文物館將展出于右任書法藝術

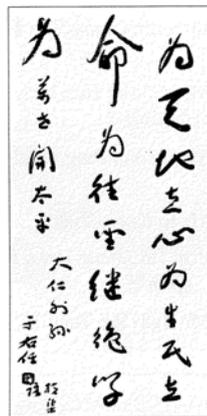

### Forthcoming Exhibition on Yu's Cursive Calligraphy at the Art Museum

文物館將於七月九日至九月四日舉辦「一代草聖：三原于右任書法藝術」展覽，開幕典禮於七月八日(星期五)下午四時半舉行。

篆、隸、楷、行、草是中國書法的五種主要書體，其中草書以筆劃相連為特色，結體變化的自由度最大。草書書寫便捷，但是很易流於不可辨讀。上世紀三、四十年代，于右任(1879-1964)積極推行草書標準化，並且身體力行，成為一代名家。

于右任是革命報人、辛亥元老、詩人、教育家和政治家，曾任監察院院長凡三十年。處身動盪多變的局勢，書法藝術成為他畢生的追求。他的書法早年從王羲之、趙孟頫入手，其後轉研魏碑，書風兼具柔美與沉雄的韻致。中年以後，專攻草書，風格雄豪婉麗，自成一派，時稱「于體」。

是次展覽匯集于氏的優美作品，展品主要精選自于氏後人(包括其外孫、中大校長劉遵義教授)的珍藏。

The Art Museum will mount an exhibition entitled 'Master of Cursive Calligraphy: Yu Youren 1879-1964' from 9th July to 4th September 2005. The opening ceremony will be held on 8th July at 4.30 p.m. at the Art Museum.

Among the five basic scripts in Chinese calligraphy, the cursive script is characteristic for the linked brush strokes and the most varied and simplified form of the characters. While the writing could be rapidly rendered, the disadvantage of cursive calligraphy is that it could be somehow illegible. In the 1930s to 40s, Yu Youren (1879-1964) promoted the standardization of the cursive script, and he himself became a well-known master of cursive calligraphy. This exhibition has assembled Yu's representative works from various sources to demonstrate the great accomplishments of the master. The majority of the exhibits are drawn from the collections of Yu's descendants, including those of his grandson, Prof. Lawrence J. Lau, vice-chancellor of the University.

As a protean figure, Yu was celebrated in political, literary, educational and artistic circles. He had been the president of the Control Yuan of the Nationalist Government for over three decades. In the art world, Yu was hailed as the master of cursive calligraphy in modern China. He concentrated on the study of the cursive script and finally developed a powerful and fluent personal style which came to be known as the 'Yu style'.

## 利豐講座 現代供應鏈管理

史丹福大學商業研究院操作、資訊和科技講座教授李效良(圖)，上月三十日應本校工商管理碩士課程邀請，主持利豐集團工商管理講座，談論如何建立供應鏈的功能，以創造可觀的財富。

李效良教授身兼史丹福全球供應鏈管理論壇聯席理事和多家供應鏈軟件公司的董事或顧問。

講座假香港萬豪酒店三樓宴會廳舉行，出席者逾二百人，包括政府官員、外國駐港領事、公司總裁和中大校友等。

供應鏈管理著重資訊、物料及資金的統籌，左右企業配送貨品及服務的效率，是提高營運成效的基礎。企業若能靈巧調節供應鏈管理，以配合市場及客戶的獨特需要，並滿足合作夥伴的利益，必能開拓新市場，強化客戶關係，擴大市場佔有率，增加利潤，最終為公司創造市場價值。

## 鈣量充足可防長者高血壓

醫學院的研究顯示，長者若有充足的鈣質和鉀質，並能減少吃鹽，可預防高血壓。但亞洲人尤其長者的鈣攝取量一般很低，香港長者平均每日只攝取三百毫克鈣，遠低於醫學界建議的一千毫克。而五成半香港長者患有高血壓。

醫學院曾進行兩項研究，以了解香港長者的高血壓發病率與鈣攝取量的關係。結果發現，在

一百一十年逾五十五歲的素食者中，六成半人患有高血壓，他們的鈣和鉀攝取量均低，而鹽攝取量則高。另一項研究發現，二百三十四名年逾五十五歲的長者之中，五成三人患上高血壓，他們的鈣攝取量均不足。鈣有助腎臟排出多餘的鈉，又可鬆弛血管，從而降低血壓。此外，鈣可維持骨骼健康，長者尤其需要。

## 挑戰賽提倡創業精神

本校創業研究中心的調查顯示，去年香港整體的創業率仍於低位徘徊，在三十五個經濟體系中，只排名三十三。

是項研究名為「全球創業觀察」，由美國巴布森商學院和倫敦商學院於一九九九年推動，香港的研究於二零零二年開展，由中大創業研究中心主任蔡美玲教授主持，比較香港與三十多個經濟體系的創業情況，二零零三年加入深圳為研究對象。

創業研究中心於五月二十四日假香港萬豪酒店舉辦「全球創業觀察香港與深圳論壇」，探討「企業內部的創業」和「新企業的私募融資策略」，嘉賓講者包括博思艾倫諮詢有限公司大中華區金融業務負責人謝國誠先生和飛利浦電子集團亞太區主席總裁文安德先生。

此外，二十名中大工商管理碩士課程全日制學生組成五支隊伍，參加「博思艾倫創業挑戰賽」，協助弱勢社群創業。冠軍為「美味 D.I.Y.」，

構思為售賣未經烹調的優質包裝食物。亞軍是「陽光社區美容理髮合作社」，目標是指導失業中年婦女在東涌提供高質素一站式個人護理服務。

賽事一年一度，由本校與世界頂級管理顧問公司博思艾倫於二零零四年開始合辦，蔡美玲教授統籌。

## 聯合工管陳曉彤 當選羅德學人
