NEW COURSES IN ELECTRONICS

To meet the urgent and increasing demand by the Hong Kong industries for personnel specially trained in electronics, United College will institute a minor course in Electronics with effect from the academic year 1967-68. Its existing Department of Physics has been re-named Department of Physics and Electronics.

Earlier this year, Professor A.L. Cullen, O.B.E., D.Sc. (Eng.), F.I.E.E., Head of the Department of Electronics and Electrical Engineering at the University of Sheffield and an authority in this field, was invited by the University to advise on the planning of electronic studies. The curriculum and syllabus of electronic courses at United College have been carefully drawn up with Professor Cullen's expert advice, and in consultation with leading local industrialists.

The minor course in Electronics will be open to all Physics students of the University. At a later stage, when additional equipment and facilities become available, the course may be opened to all Science students. Depending on the experience gained during the triennium 1967-70, it is envisaged that a separate Department of Electronics may be established in the academic year 1970-71 to offer major courses in Electronics.

A Readership in Electronics has been created by the University and assigned to United College to develop and coordinate Electronic studies.

VISITOR TO THE NEW CAMPUS SITE

The Hon. Michael A. Herries, Chairman of the University Grants Committee, paid a visit to the University's new campus site at Shatin on June 21. He was accompanied by Dr. C.M. Li, the Vice-Chancellor, and the Hon. Szeto Wai, the University Architect.

The site of the University, covering an area of 273 acres, is located about half way between Shatin and Taipo in the New Territories. The future campus buildings will be so grouped that the three Colleges will be sited around a University Headquarters complex, with New Asia College and United College to the north on higher level and Chung Chi College, at its present site, on lower ground to the south. Consideration will be given to the Colleges' own individuality in architectural style while maintaining an overall harmony.

The University Campus Planning Committee was appointed in 1964 under the Chairmanship of Dr. R.C. Lee. Terms of Reference of the Committee are (1) to deal with problems connected with the overall planning of the University site, (2) to examine building proposals of the Colleges in relation to the Master Development Plan of the University, and (3) to coordinate building projects of the Colleges. Members of the Committee are:

- Mr. T.C. Cheng (Representing United College)
- Mr. Q.W. Lee (Chairman of the University Finance Committee)
- Mr. B.P. Schoyer (Representing New Asia College)
To determine certain principles of operation concerning the site and the buildings on that site, the University Buildings and Grounds Committee was appointed by the Vice-Chancellor in 1966. Members of the Committee are:

**Chairman:** Dr. C.T. Yung  
**Members:**  
Fr. C.J. Barrett  
Mr. Patrick S.K. Fang  
Mrs. E.J. Fehl  
Mr. R.N. Rayne  
Mr. B.P. Schoyer  
Mr. John L. Espy (Secretary)

According to the present schedule, it is hoped that the University may commence the site formation work this September, and the building work of the Benjamin Franklin Centre (the Student Centre), the first building to be erected on its own campus site, will follow shortly after.

Holders of other scholarships or bursaries shall be eligible to apply, but they must agree to surrender tenure of their other awards if they are successful. Tenure shall be subject to satisfactory academic progress and evidence of continued interest in social work. (Although the possession of financial means shall not prevent candidates from being awarded the Scholarships, nevertheless, where the merits of any candidates are equal, preference shall be given to a candidate who would not otherwise be able to afford to enter the University.) The awards shall be made irrespective of sex, race, and nationality, but preference shall be given first to candidates whose domicile is in Hong Kong and then to those in other parts of the Far East who are proficient in Chinese.
5. The number of awards each year will be variable depending on the funds available.
6. Application forms may be obtained from College Registries to which completed forms should be submitted on or before 15th July, 1967.

**The American Women’s Association Social Work Scholarships**

In assisting needy and scholarship quality students in the Departments of Social Work at Chung Chi College and United College, the American Women’s Association of Hong Kong has donated a number of scholarships for 1967/68 so as to enable such students to continue their education where otherwise this would be impossible.

1. The scholarships shall be known as the “American Women’s Association Social Work Scholarships” and shall be awarded to students, either in their third or fourth year pursuing a course leading to the Bachelor’s degree of Social Science in the Department of Social Work at Chung Chi or United College.
2. Those who receive these scholarships have to work at least two years after graduation for social welfare agencies in Hong Kong that are recognized for this purpose by the Vice-Chancellor.
3. The Scholarships shall be awarded to candidates of sufficient academic ability and of proven case of hardship in financing their education. If no candidate of sufficient merit is presented for selection, no award shall be made and the available scholarship will be awarded in the next academic year.
4. Each scholarship shall be held for a maximum period of two years and may be held at the same time with other scholarships, provided that the total value of all scholarships shall not exceed the amount of $3,200. Tenure shall be subject to satisfactory academic progress and review of the Senate Committee on Scholarships and Fellowships. The awards shall be made irrespective of sex, race, and nationality, but preference shall be given to candidates whose domicile is in Hong Kong.
Hong Kong Government Social Work Bursaries

Public funds are now available for the award of bursary grants to students in the third and fourth years of the B.S.Sc. (major in social work) course at The Chinese University. The total amount approved has been calculated on the basis of ten bursaries for students in the third year of the course and a further ten bursaries for students in the fourth year, of a maximum of $3,500 each, totalling 20 bursaries every year.

1. Grants will be made strictly on the basis of need of the individual student's family and will in no instance exceed the sum of $3,500 per year; this sum is a maximum and it is not envisaged that the full amount will normally be necessary. If there are more than ten students accepted in either the third or fourth year of the course in financial need, additional bursaries may be considered, as long as the total amount provided is not over-committed, for the current or the succeeding year.

2. The parents of the prospective bursar will be required to provide an affidavit in the form provided (detailing the family's assets, income and expenditure), to substantiate the applicant's need for financial support during studies.

3. Each prospective bursar will be required to undergo a medical examination (Chest X-ray only); examinations to be arranged at a Government Clinic with the assistance of his Department.

4. Bursaries granted in the third year will be reviewed by a selection board before renewal for the fourth year.

5. Each bursar will be required to sign a form of undertaking, agreeing to refund the whole of the bursary under certain conditions and to provide an acceptable guarantor.

6. Each bursar will be provided with a copy of the signed undertaking for his or her own use; and copies will be sent to the guarantor and to the Director of Social Welfare Department.

7. Application forms may be obtained from College Registrars to which completed forms should be submitted on or before 15th July, 1967.

C. K. LAW MEMORIAL SCHOLARSHIPS

The University received on June 13 from friends of the late Mr. C.K. Law, a former Assistant Director of Education, a cheque for the amount of $90,413.30 to be established as a scholarship fund in memory of Mr. Law.

The income from the amount will provide four scholarships, each of the value of $1,500 per annum, available to three fourth-year students in the Department of Chinese, awarded on the results of Part I Degree Examination taken in their third year, and one needy postgraduate student with outstanding performance in his first year.

BRITISH COUNCIL PRESENTATION OF BOOKS

The British Council, as in previous years, recently donated a gift of books to the University for the current year to the value of £3,000. The distribution of the sum will be £600 to the University Library and £800 each to the three College Libraries.

This is the third time the Council has presented a donation of books to the University.

APPOINTMENT OF EXTERNAL EXAMINER

In view of the fact that Prof. Cheng Ch’eng-K’un, Professor of Sociology at the University of Hawaii, will be travelling across Europe during the summer months and has indicated that he will not be able to scrutinize the scripts of our candidates, the Board of Studies in Sociology has recommended Prof. Ling Shun-sheng as Co-External Examiner to scrutinize the candidates’ scripts and to determine the final assessments.

Prof. Ling is the Professor of Anthropology and Director of the Institute of Ethnology of Academia Sinica of the Republic of China, Taiwan.

URBAN FAMILY LIFE SURVEY

At a press conference held on June 8, Dr. Robert E. Mitchell, Director of the University’s Social Survey Research Centre, announced that during the summer months, over 100 students of the University will be helping the Urban Family Life Survey to answer the question “How does industrial employment and crowded housing affect the health of individuals and the welfare of families?”

The survey is an independent non-governmental study being conducted by the Centre. Hundreds of Hong Kong citizens from every walk of life have been helping scholars within the University plan for this important community study.

At the present time, households are being visited and information is being collected so that scientific samples can be drawn that will represent the entire community. In this phase of the research, people will be asked only a few very simple questions: whether they have tap water, a flush toilet, the size of their flat, and the sex and ages of the family members living in the flat. Only five to ten minutes will be necessary for each interview. A few weeks later, a smaller number of people will be asked more detailed questions about their physical health, housing, occupation, and the meaning of an urban industrial life for themselves and their families.
The answers to these questions will be used for two separate purposes. First, it will help the community to develop more realistic social welfare, health, and industrial policies for Hong Kong; second, it will provide scholars with an understanding of the causes and consequences of rapid industrial and urban development.

Although the questions to be asked in the study refer primarily to health and occupational matters, they will help scholars to answer the following questions:

— How does a person's occupation affect his life and the life of his family?
— How does a person's housing situation affect his family life?
— How does a person's housing and his family life affect his work life?
— How does a person's cultural and family background affect the adjustment he makes to urban living?

It is anticipated that the analysis of data and the preparation of reports for the study will require approximately eighteen months. All findings from the study will be made public. It was stated that the project, which was two years in planning and preparation, was "designed to benefit the entire community. The reports prepared by the project staff will be made equally available to everyone."
