On 3rd July 1970, representatives of the Hong Kong Government and the University signed an agreement whereby 330.54 acres of land located in the New Territories near Shatin were conveyed to the University for use as a campus site. The signing ceremony marked the culmination of negotiations with Government extending over a 5-year period.

Although the land was not formally deeded to the University until July 1970, the Government had authorized the University four years earlier to proceed with development of the campus in accordance with the approved Master Development Plan projected through 1975. Some site development had been accomplished in connection with the Plover Cove Dam Project. Further site formation was initiated in December 1967 and was substantially completed two years later.
The campus site, which varies in elevation from 20 to 560 feet, was formed essentially into four plateaus to provide necessary building sites. Chung Chi College has occupied the 59-acre lower plateau in the southern sector since 1956. United College moved from its old location on Bonham Road, Hong Kong Island to new buildings on its 19-acre campus site in December 1971. This comprises the western half of the upper plateau at 450 feet elevation. Buildings for New Asia College are under construction on an equal 19-acre site comprising the eastern half of this same plateau.

New Asia College is scheduled to move from its present buildings on Farm Road in Kowloon to the new campus in mid-1973. The three constituent Colleges will then be grouped around the Headquarters and Central Activities of the University which forms the approximate centre of the campus on the mid-level plateau which is 330 feet high.

The Benjamin Franklin Staff/Student Amenities Centre, funds for which were donated by the American people, was completed in December 1968 and was used initially to house the Central Offices of the University. The second building, completed a year later, was a block of minor staff quarters for Chung Chi College personnel. Work was also started in 1969 on the following projects which were subsequently completed as shown:

The only projects remaining in the Phase I Programme (1968-71 quadrennium) are the residences for the Presidents of New Asia and United Colleges. The site for these houses was turned over to the contractor on 1st October, 1972 and work is now in progress.

Government approval of the Phase II construction programme to be accomplished during the 1972-75 period was received in May 1971. This includes the following projects:

- Extension of the Science Centre
- A Central Activities Complex (2 Buildings & Lecture Theatre Complex)
- A Multi-Purpose Auditorium (approximately 700 seats)
- A Sports Centre (2,100 interior seats - 4,000 exterior seats)
- Lifts between the mid and upper levels of the campus (6 lifts - 27 passengers each)
- Three additional Student Hostels (125 students each)
- A Postgraduate Hall (100-student capacity)
- Another Minor Staff Quarters (same as Phase I)
- Additional Staff Housing (Phases IV & V) (36 flats)
- Sir Cho-Yu Hall (176-student capacity)

Upon completion of the Phase II building programme, the basic buildings required by the University will have been provided. Thereafter, additional facilities will have to be justified on the basis of increased student load and new academic programmes.

The Electronics Department, assigned to United College, was established as a separate field of study of the University in 1970/71. This was the culmination of much preparatory work from inception of the idea as early as 1963 and the introduction of a minor programme from 1967/68 under Prof. S.C. Loh (now Professor of Computer Science). Dr. Charles K. Kao took up the appointment as Reader in Electronics in 1970 and was appointed Head of the Department responsible for the establishment and implementation of a four-year undergraduate programme in Electronics. The University and Polytechnic Grants Committee, in view of the needs of the community, recommends that the student intake of the Electronics Department be increased rapidly to be approximately on a par with the intake of other science subjects by 1974. The appointment of additional lecturers was made to provide the necessary staff to stage this programme of studies. Funding for equipment is also made available. Currently one Reader and five lecturers have been appointed with one vacancy which hopefully will be filled shortly. The plan is to increase lecturing staff at the rate of about two per year.

The need of a graduate programme for Hong Kong and the importance of research for an applied science subject led to the early introduction of Electronics in the M.Sc. programme in 1972/73 with six students as the first intake. Gradual expansion is envisaged.
Objectives

The Electronics Department has the following objectives:

1. To ensure that the quality of graduates meets the needs of industry in Hong Kong;
2. To reach an internationally accepted standard; and
3. To meet the requirements of the learned institutions (especially of the United Kingdom) for professional qualifications.

At the same time the Department believes that the prime task of a university is to educate its students and not just to equip them with professional skills.

Premises

The Department of Electronics is housed in the University Science Centre. At present it is occupying the top floor of the Physics Wing. The 6000-sq. ft. area is divided into three teaching laboratories, a project laboratory, a graduate student laboratory, a research area, a technician area and offices. The Electronics Wing with a total area of about 23,000 sq. ft. is under construction and will be ready for use in 1974/75.

Academic Programme

The Department offers a four-year course leading to the degree of B.Sc. in Electronics. The major students may minor in a variety of subjects including social science and management subjects. The postgraduate division of Electronics offers a one-year course leading to an M.Sc. degree. It plans to offer a two-year course leading to an M.Phil. degree shortly.

Enrolment

The enrolment for 1972 is:

1st year 30
2nd year 24
3rd year 14
M.Sc. 6

Fourth-year courses will be introduced in 1973/74. The proposed first-year student intake for 1973/74 will be about 40.

Research by Faculty Staff

Dr. Charles K. Kao works in the area related to information processing and electromagnetic problems.

Dr. Y.W. Lam has his interest in the evaluation of semiconductor surface properties. At the same time he is, with Dr. C.C. Chang, working on the establishment of a modern circuit fabrication facility. This activity is of great interest to the Electrical Engineering Department of the University of Hong Kong and will have their significant participation. It is also directly relevant and of importance to electronic industries in Hong Kong.

Dr. C.C. Chang is preparing to utilise the liquid helium facility of the Physics Department to establish his line of research of electronic properties of material. This is related usefully with the fabrication facility.

Dr. H.L. Kwock is also working in the semiconductor field while Dr. H.T. Tsui is interested in stochastic control problems. Mr. T.C. Choy is engaged in a project which adaptively corrects echoes on TV.

Industrial co-operative projects are being developed with a variety of industrial concerns in Hong Kong, to provide realistic training for the students.

VICE-CHANCELLOR ATTENDS INTERNATIONAL CONFERENCES

Vice-Chancellor Choh-Ming Li attended two international conferences in recent months. In July he participated in the Asian-U.S. Educators Conference in Jogjakarta, Indonesia, and in October, the International Symposium on Innovation in Higher Education held in Seoul, Korea.

The Asian-U.S. Educators Conference, held from 3rd to 8th July, was sponsored by the Institute of International Education. Participating in the Conference were twenty-six vice-chancellors, presidents, senior administrative and faculty staff of universities as well as representatives of educational institutes and foundations from Hong Kong, Japan, Indonesia, Korea, The Philippines, Singapore, South Vietnam, U.S.A., Taiwan and Thailand.

During the six-day Conference, the following topics were discussed:

1. New Developments in University Governance
2. New Models in Higher Education
3. The Role of the University in Economic and Social Development
4. The University and World Citizenship

Dr. Li was invited to lead the discussion on “New Models in Higher Education”.

In this lecture, Dr. Li presented several ideas relating to social change and its impact on higher education; educational philosophy and national goals; student activism and its effects on higher education; and the changing role of higher education: from “Ivy Tower” to agent of change. He emphasized the point that though in urgent need of economic and social development, universities should not become “training institutes for narrow professionals in technical fields alone” and that they “should continue to play their role as the cradle of culture and civilization, and should not only preserve but enrich national culture”.

INTERCOLLEGIATE TEACHING PROGRAMME

The Intercollegiate Teaching Programme which was introduced in September 1964 with seven courses, has now become quite extensive in the University. The idea of intercollegiate teaching is the pooling of the specialised knowledge of the staff and facilities for the benefit of all students of the University. Students of all three Foundation Colleges are eligible to enrol in the courses which are scheduled at times and places most convenient to the majority of the staff and students concerned. The respective Boards of Studies are responsible for planning the courses in their particular subject field. The Academic Section of the University Registry serves as a co-ordinating agency in setting the time and arranging necessary accommodations.

The variety of subjects introduced and the number of students participating have increased significantly each year. In the academic year 1971-72, the Intercollegiate Teaching Programme consisted of 243 courses with a student enrolment of 8,424 which included almost all third- and fourth-year students and the greater part of first- and second-year students. Compared with the courses conducted in 1970-71 and 1969-70, the courses offered in 1971-72 represented an increase of 63.09% and 147.90% respectively. The increase in student number is equally striking: as compared with the number of students in 1970-71 and 1969-70, the increase percentage is 56.84% and 129.30% respectively.

The following table shows the number of courses conducted and participating students during the last three academic years.

STUDENT ENROLMENT

The total student enrolment of the University as at 30th September, 1972 is 2,917.

Of these, 2,574 are undergraduates, 732 in the Faculty of Arts, 1,103 in the Faculty of Commerce and Social Science, and 739 in the Faculty of Science. 905 of the students are enrolled in Chung Chi College, 853 in New Asia College and 816 in United College. There are altogether 1,630 male undergraduates and 944 female undergraduates.

The Graduate School has 130 students at present and the School of Education 133 students, 42 full-time and 91 part-time, while the New Asia Institute of Advanced Chinese Studies and Research has 22 trainees. 10 students attend the Postgraduate Diploma Course in Systems Analysis.

In addition, there are 26 exchange students and 22 associate students.

A total of twenty-one scholars, including vice-chancellors, rectors, presidents and professors from France, Germany, Hong Kong, Japan, Korea, The Philippines and U.S.A., attended the International Symposium on Innovation in Higher Education held from 2nd to 7th October at Yonsei University, Seoul, with that University’s sponsorship.

The themes of the Symposium included: the forces affecting higher education in contemporary society, nationality and internationality in higher education, and comparative perspectives of educational reform. The themes were described in nine lectures by eminent scholars. Dr. Li delivered the first lecture. Topics of the lectures were as follows:
1. The Forces Affecting Higher Education in Asia
2. The Forces Affecting Higher Education in France
3. The Objectives and Structure of the University: The Case of Tokyo University
4. International Aspect of Higher Education: Its Reality and Promise
5. Governmental Role in University Reform: The Case of the Republic of Korea
6. The East-West Center: A Model for Educational Innovation
7. The Necessity of University Reform in Japan
8. Direction of Academic Reform in Korean Higher Education
9. The Assessment of Innovation in Higher Education

STAFF PROFILES

Mr. Lo Chak Yuen, Assistant Quantity Surveyor, Buildings Office

Mr. Lo Chak Yuen is an Associate Member of the Faculty of Architects and Surveyors (London). For several years, Mr. Lo was a Senior Assistant Quantity Surveyor with a local leading Chartered Quantity Surveyors and Cost Consultant firm and also part-time lecturer in Building Technology in the Department of Building Technology, Surveying and Structural Engineering, Hong Kong Technical College.

Mr. Lo joined the University as an Assistant Quantity Surveyor in December 1971.

Mr. Lin Yan Sun, Assistant Comptroller, New Asia College

Mr. Lin Yan Sun was educated at New Asia College and graduated with a degree of Bachelor of Commerce (cum laude) in 1967. He worked at the Hong Kong and Shanghai Banking Corporation upon graduation until 1971 when he was appointed Assistant Comptroller at New Asia College.

COMINGS AND GOINGS

• Dr. Sim Yaw-soon, Associate Professor and Chairman of the Department of Political Science of Grambling College, the United States, visited New Asia College on 3rd August. Dr. Sim graduated from the College in 1962.

• Mr. Harold Ho, Lecturer and Chairman of the Social Work Department, Chung Chi College, represented the University and the Hong Kong Committee for the International Conference on Social Welfare at the 16th International Congress of Schools of Social Work (ICSSW) and the 16th International Conference on Social Welfare held in the Hague, Netherlands at 6th to 22nd August. The themes of the two conferences were, respectively: "New Themes in Social Work Education" and "Developing Social Policy in Conditions of Rapid Change – The Role of Social Welfare". Mr. Ho had been invited by the ICSSW to serve as a resource for a discussion group on curriculum construction and developments. Mr. Ho Kam Fai, Head of the Department of Social Work, United College, also attended the two conferences as a delegate of the University. After attending the Conferences, Mr. Ho visited institutes and schools of social work in Europe.

• Dr. Charles K. Kao, Head of the Department of Electronics, United College, departed for the United Kingdom on 17th August to do research at the Standard Telecommunication Laboratories Ltd. for one month. During his stay in the United Kingdom, Dr. Kao delivered a number of lectures at the Institute of Electrical Engineers' meeting on "Lasers and Optical Electronics" held at Southampton.

• Prof. Hansjörg Schultze, President of the German Academic Exchange Service, visited the University on 22nd August, accompanied by Dr. R. Hentsch, a German Consul, and Dr. K.P. Roos, Director of the Goethe Institute in Hong Kong.

• Dr. Ng Wing Chiu, Research Associate at the State University of New York at Stonybrook, visited the Physics Department of United College in August.

• Prof. Y.L. Yip of McGill University visited the Electronics Department of United College at the end of August, and gave a talk on "Excitation Problems of Dielectric Waveguides".

• Prof. H.F. Simon, Head of the Department of East and Southeast Asian Studies of the University of Melbourne, visited the Department of Chinese Language and Literature of United College in August.

• Mr. Peter S.C. Chang, Assistant Lecturer in Theology, Chung Chi College, attended the Workshop on Programme Instruction Materials for Theological Education by Extension held in Taiwan from 14th August to 1st September.

• Prof. George Sinclair from the University of Toronto visited United College in September, accompanied by Prof. S.C. Loh, Director of the Computing Centre of this University.

• Dr. Philip Shen, Dean of Arts Faculty, Chung Chi College, attended the International Congress of Learned Societies in the Field of Religion held from 22nd August to 8th September in Los Angeles.

• Dr. S.W. Tam, Senior Lecturer in Chemistry, Chung Chi College, left for Manila on 24th September to attend the Regional Seminar on the Promotion of Public Understanding of Science and Technology held from 25th September to 2nd October, sponsored by the UNESCO.

院際教學課程廣泛實施

院際教學課程自一九六四年九月開始實施，初設課程七項，現已廣泛推行。課程之各項科目，由各學系負責策劃及籌備，然後交由大學校務處學務組編排時間與上課地點。學務組在編排時間與地點時，盡量作最妥善的安排，方便三成員學院之學生修讀。

院際課程自實施以來，學生人數及課程種類逐年迅速增加。一九七一至七二學年開設之院際課程共有二百四十三項，修讀學生人次為八千四百二十四，包括全部三、四年級學生及部份一、二年級學生。一九七一至七二學年之院際課程，比一九七零至七一學年增加百分之六三‧〇九，比一九六九至七零學年增加百分之一四七‧九〇。修讀人數與一九七零至七一學年比較，增加百分之五六•八四，與一九六九至七零學年比較，增加百分之一二九‧三〇。以下為最近三年院際課程之科目及學生人數統計：

學生人數統計

本校學生人數根據一九七二年九月三十日之統計為二九一七人，包括本科學生二五七四人。其中七三二人屬文學院、一一〇三人屬商學及社會科學學院、七三九人屬理學院。以成員學院分，則崇基學院九〇五人、新亞書院八五三人、聯合書院八一六人。以性別分則男生一六三〇人，女生九四四人。

研究院有研究生一三〇人，教育學院一三三人，其中日班學生四十二人，夜班學生九十一人。新亞研究所有研究員二十三人。系統分析文憑課程有學生十人。此外，本校尚有交換學生二十九人及特別生二十三人。

教職員簡介

盧澤源先生

Mr. Lo Chak Yuen

盧澤源先生為英國測量師，曾任職於本港著名建築工料估計師樓為高級助理測量師，並曾擔任港工業學院建築、測量及結構工程系夜學部講師。一九七一年十二月，盧先生受聘為本校之助理建築村料估計師。
本校重視對實用科學進行研究,一方面為配合社會之需要,自一九七二至七三學年開始,設立電子學研究院課程,修畢該課程者,可獲理科碩士學位。研究院電子學部現有研究生六名,日後將繼續擴展。

宗旨

電子學系之宗旨如下:

一、訓練電子學人才,使適應香港業之需要。
二、使該學科達到國際認可之水準。
三、使修讀該學科之學生具備考取英國及其他國家專業學會之資格。

電子學系同時深信:大學不應以訓練學生使獲得專門技能為最終之目的,大學最主要之工作在使學生獲得高等教育之裨益。

授課地點

電子學系目前在大學科學館物理學座頂樓上課,面積六千方呎,共有教學實驗室三個、研究計劃實驗室一個、研究生實驗室一個、技術人員及研究工作室、辦公室等。大學科學館現正從事興建電子學座,共有面積二萬三千方呎,預期於一九七四至七五學年即可使用。

課程

電子學為四年之本科課程,學生修讀完畢後,可獲理學士學位。主修該課程者可副修社會科學、管理科學及其他課程。研究院電子學部現只設一年課程,頒授電子學理科碩士學位。現正策劃開設兩年課程,頒授哲學碩士學位。

學生人數

一九七二至七三學年之學生人數如下:

一年級: 三十人
二年級: 二十四人
三年級: 十四人
理科碩士課程: 六人
四年級課程於明年開設。預算中一九七三至七四學年招收新生人數將增至四十人。

教師之研究工作

高錕敎授研究資訊處理及電磁學問題。林逸華博士研究半導體表面特性之測定,同時與張樹成博士合作,建立一現代電路製造之設施。該計劃已引起香港人學電子工程系之注意及合作。完成後對港之電子工業將有所貢獻。

張樹成博士計劃利用物理學系之液態氦氣設施以研究物質之電子特性。該研究計劃與現代電路製造之設備研究工作互相關連。

郭漢利博士現亦從事半導體之研究。徐孔達博士計劃研究隨機性控制問題,蔡德祥先生之研究工作為改正電視反射訊號之自適應系統。

電子學系為使學生獲得具體之經驗及訓練,現正從事與本港若干工業機構合作,進行電子實驗之作。

聯合書院電子學系

聯合書院之電子學系已於一九七零至七一年成為一獨立之學系。電子學系之設立，籌備工作最早於一九六三年開始，一九六七至六八學年，在樂秀章教授策劃下，開設副修課程(樂教授現任電子計算學講座教授)。高錕博士於一九七零年受聘為電子學教授，兼該學系系主任，負責策劃電子學四年之本科課程及教學工作。大學鑑於本港社會需要電子學方面之專門人才，復獲大學及理工學院教育資助委員會之鼓勵，決定增加電子系每年招收新生之學額；預計一九七四年招收新生之數目，將與理學院其他學系相同。電子學系已獲大學撥款購置儀器。敎師方面，現有敎授一位、講師五位、講師空缺一個，計劃每年增聘敎師兩位，以配合該學系之發展。
九六七年十二月開始，兩年後完成。大學校園由四座連綿的山崗組成，拔海二十英呎至五百六十英呎不等。崇基學院校舍，早於一九五六年開始，位於大學校園之南，佔地五十九英畝。聯合書院位於拔海四百五十英呎之西面山崗，佔地十九英畝，已於一九七一年十二月自香港般含道之舊校舍遷入。新亞書院亦佔地十九英畝，聯合書院之東，校舍興建工程在進行中。大學總部之樓宇，於拔海三百三十呎之中部山崗興建。新亞書院將於一九七三年夏季，自九龍農圃道之校舍遷入校園。屆時中文大學將成爲更完備之整體。由美國人民捐建之范克廉樓，為敎職員及學生聯誼中心，已於一九六八年十二月落成，在行政大樓落成前，暫用作大學總部辦公地點。在新亞書院興建工程未完成之前，有四座學生宿舍已經落成。其中兩座已於一九七一年十二月完成，兩座於一九七三年七月完成。此外，在一九六九年開始興建之下列各項工程，已先後竣工：

The two prominent buildings in the right centre of the picture are University Residences Nos. 3 and 4. The site for the two Presidents’ Houses (United and New Asia) is immediately adjacent to the right. In the lower right corner, University Residences Nos. 5 and 6 are shown under construction. The Vice-Chancellor’s Residence is in the upper left corner of the picture. United College is in the centre with the University Library, Administration Building, Institute of Chinese Studies and Benjamin Franklin Centre to the left.
On 3rd July 1970, representatives of the Hong Kong Government and the University signed an agreement whereby 330.54 acres of land located in the New Territories near Shatin were conveyed to the University for use as a campus site. The signing ceremony marked the culmination of negotiations with Government extending over a 5-year period.

Although the land was not formally deeded to the University until July 1970, the Government had authorized the University four years earlier to proceed with development of the campus in accordance with the approved Master Development Plan projected through 1975. Some site development had been accomplished in connection with the Plover Cove Dam Project. Further site formation was initiated in December 1967 and was substantially completed two years later.
