Council Appointments

The University has been fortunate in having the sustained service and support of many prominent local community leaders since its establishment in 1963. Among them are the following notable Council members who have agreed to take on heavier responsibilities in providing leadership and guidance for the University.

Sir Yuet-keung Kan, GBE, BA, LLD, JP, retired from his office as Council Chairman effective from 24th October, 1982 after eleven years of distinguished service. Sir Yuet-keung’s association with the University began in the early fifties when, together with the late Sir John Keswick and Mr. David Au, he prepared a draft constitution of Chung Chi College. Subsequently he served on the Board of Governors of Chung Chi College first as member (1961-64) and later as Chairman (1964-68). He was appointed a University Council member in 1964 and became Council Chairman in 1971. Under Sir Yuet-keung’s chairmanship, the University saw unprecedented change and expansion: a unified University campus came into being; the University underwent a major reorganization; staff, students and academic programmes multiplied, notably with the addition of the Faculties of Business Administration and Medicine. The University will continue to have his invaluable advice and guidance in his very important capacities as the first Pro-Chancellor of the University and Life Member of the Council.

In succession to Sir Yuet-keung, Dr. Lee Quo-wei, CBE, LLD, JP, has been appointed by His Excellency the Chancellor as Chairman of the Council and the Hon. Lydia Dunn, OBE, BS, JP, has been appointed by the University Council as the new Treasurer of the University.

DR. LEE QUO-WEI
THE NEW COUNCIL CHAIRMAN

Dr. Lee Quo-wei has been appointed Chairman of the University Council by His Excellency the Chancellor, with effect from 24th October, 1982, in succession to Sir Yuet-keung Kan.

A leading local banker, Dr. Lee figures prominently among those whose initiative, determination and entrepreneurial efforts have contributed towards the economic progress and prosperity of Hong Kong in the post-war years. Born in 1918, Dr. Lee was educated in Hong Kong. He joined the Hang Seng Bank Ltd. soon after the Second World War and is now a Vice-Chairman and the General Manager. Serving on the boards of directors of a number of major local companies, Dr. Lee is involved in a wide spectrum of business activities. One of his latest appointments, for instance, is as the first Chairman of the Board of Directors of the Cable and Wireless (H.K.) Ltd., which was set up in 1981.

His record of public service is equally distinguished. A Legislative Councillor (1968-78) and an Executive Councillor (1976-78), Dr. Lee has served as Chairman and member of numerous public bodies in the areas of banking, commerce, education and health. His concern for and contributions towards educational development in Hong Kong place him on the Council and other major committees of this University and the Hong Kong Polytechnic. He is also a member of the Court of University of Hong Kong. In 1976 he was appointed Chairmn of the Board of Education of the Hong Kong Government and in 1981 was also made a special adviser to the International Panel of Educators, who were invited
by the Hong Kong Government through the Organization for Economic Cooperation and Development to conduct an overall review of education in Hong Kong. He was awarded the CBE in 1977.

An honorary graduate of the University (Doctor of Laws, honoris causa, 1972), Dr. Lee has been closely associated with the University for many years. Indeed, as the founding Treasurer of the University since its establishment in 1963 until his recent appointment to the Chairmanship of the Council, he had been the longest serving University Officer thus far. During the past two decades, as Chairman of the Finance Committee, Dr. Lee had played an important and active part - with remarkable success - in formulating the University's financial policies, in helping to secure funding support from government and private sources and in managing the Staff Superannuation Funds of the University. His incessant efforts have led to donations for capital development, academic and research programmes as well as financial aid to students of the University. As a keen supporter of the Three Year Part-time MBA Programme, he had contributed significantly in the acquisition of the premises for the Programme's town centre in Tsimshatsui.

With Dr. Lee now at the Chair of the Council, the University will surely benefit even more from his leadership and guidance.

THE HON. LYDIA DUNN
THE NEW UNIVERSITY TREASURER

Born in Hong Kong and educated locally and then in America, the Hon. Lydia Dunn is well-known throughout the business world and beyond for her indefatigable efforts as a champion of Hong Kong's manufacturing industry, and for the speeches she makes in the Legislative Council and other public forms. She has recently been appointed Treasurer of the University in succession to Dr. Q. W. Lee, who was taking up the Council Chairmanship.

Miss Dunn is a Director of John Swire & Sons (H. K.) Limited. She is also the Executive Director of Swire Pacific responsible for the Trading Division and Chairman of Swire & Maclaine Ltd. and Swire Loxley Ltd. Her active interest and involvement in the textile and clothing industry are of long standing, and the firm stance she takes against protectionism has won her the admiration and respect of businessmen and industrialists both in Hong Kong and abroad. She is a member of the Textiles Advisory Board, the Council of the Hong Kong Management Association and the General Committee of the Federation of Hong Kong Industries, in addition to many other public engagements in the field of trade and industry.

Miss Dunn was appointed to the Legislative Council in 1976 and the Executive Council in 1982. The important Government committees she sits on include the Economic Review Committee, the Public Accounts Committee and also the Special Committee on Land Supply of which she is Chairman. She is also the Chairman of the Prince Philip Dental Hospital.

Miss Dunn attended St. Paul's Convent School in Hong Kong and the University of California at Berkeley, where she graduated in Business Administration. In recognition of her outstanding contribution to the welfare of the community, she was made a Justice of the Peace in 1976, and awarded the OBE in the New Year's List of 1978.

Her association with the University began in 1978, when she was first elected to the University Council by the Unofficial members of the Legislative Council. She was then invited to be the first Chairman of the Appointments Board when it was established in 1979. With her latest appointment as the Treasurer her tie with the University would surely be further strengthened.
New Chairman of the Appointments Board

The Appointments Board, an advisory body with a distinguished membership representing the Civil Service, the business community, the education sector and the academic staff of the University, was instituted in 1979 to advise the Vice-Chancellor on all matters related to graduate employment, and to give guidance to the Appointments Service. Succeeding the Hon. Lydia Dunn as Chairman of the Board is the Hon. William Charles Langdon Brown, another member of the University Council.

Mr. Brown, a prominent banker, is the Area General Manager of The Chartered Bank. He is currently the Vice-Chairman of the Hong Kong Association of Banks and will assume the Chairmanship of this Association on 1st January, 1983. He holds the chairmanship or directorship of many financial institutions, and is also the Chairman of the Hong Kong Export Credit Insurance Corporation Advisory Board and a member of the Hong Kong General Chamber of Commerce General Committee, the Hong Kong Trade Development Council and the Banking Advisory Committee.

Mr. Brown’s record of public and community service is equally distinguished: he was appointed to the Legislative Council in 1980, and now serves on its Finance Committee and the Public Works Committee; in addition he also sits on the Special Committee on Land Supply, the Advisory Committee of the Independent Commission Against Corruption, and the Sir Robert Black Trust Fund Committee. In recognition of his service he was made a Justice of the Peace in 1979, and awarded the OBE in 1982. He is actively involved in charitable work as well as the promotion of the arts, and is a Director of the Community Chest of Hong Kong. He is also a member of the Council for the Performing Arts, and the Chairman of the Hong Kong Academy of Ballet.

In between his heavy work schedule of business and public duties, Mr. Brown manages to find time to devote to his hobbies of philately, photography and calligraphy. With little time available for sport he keeps fit by regular early morning exercises and yoga. Throughout the Autumn/Winter period he insists on waking to his office in Central from his house on the Peak irrespective of the weather. Acknowledging that this is his one idiosyncrasy, he explains that his pointer always accompanies him on the walk to Central, and Englishmen are well-known for braving the elements to exercise their favourite dogs.

Mr. Brown was first appointed to the Council by His Excellency the Chancellor in 1979, and has been a member of the Finance Committee of the Council since then. The University is now indeed fortunate in being able to persuade a man of Mr. Brown’s stature and energy to take up the Appointments Board as well.
Consultation on Provisional Acceptance

On 22nd September, 1982 the Senate considered a system of provisional acceptance of undergraduate students. After careful deliberation, it resolved to approve in principle the intake of first-year students through provisional acceptance of candidates who have completed Middle 5/Form 5 and taken the Certificate of Education Examination. It was further agreed that the University Council would be invited to give comments and that further consultation would be made prior to formulating a plan of implementation for Senate approval.

The new approach to selecting first-year students was given support in a meeting of the Council on 5th October, 1982. Subsequent to this favourable response by the Council, the Registry proceeded to have further consultation with outside institutions. A pamphlet introducing the idea of provisional acceptance and explaining the background for the change in the University's admission policy was prepared. This was sent to government and statutory bodies in charge of education and examinations, educational organizations and all secondary schools which offer Middle 5/Form 5 course. Together with the pamphlet a questionnaire was attached to solicit information and comments from the school principals. A survey of secondary school students on their response to the new system was also conducted in a number of schools.

At the same time the Registrar and colleagues from the School of Education met with principals from a number of Chinese middle schools to solicit their opinion on the best way to implement a system of provisional acceptance. Requests from a number of Anglo-Chinese schools for discussion had also been received and entertained.

Consultation with outside organizations will continue. The comments and suggestions received through various channels will assist the Senate Committee on Undergraduate Admissions to eventually formulate a detailed plan of implementation for further comments by the departments and approval by the Senate.

News in Brief

Honorary Graduates

The University awarded honorary doctoral degrees to four distinguished persons at its Twenty-Fourth Congregation for the conferment of honorary and other degrees on 9th December, 1982.

The Rt. Hon. Lord Todd of Trumpington, Nobel Laureate, Chancellor of the University of Strathclyde and former President of the Royal Society, was awarded the degree of Doctor of Laws, honoris causa. Professor Hua Luogeng, a renowned Chinese mathematician and a member of both the Presidium and the Division of Mathematics and Physics, Academia Sinica, was awarded the degree of Doctor of Science, honoris causa. Both Mr. Ho Tim, Managing Director of Hang Seng Bank Ltd., and Professor Hsing Mo-huan, Emeritus Professor of Economics of the University, were awarded the degree of Social Science, honoris causa.

Apologies were received from Professor Hua Luogeng for not being able to come for the conferment of the degree in person for health reasons. His son, Dr. Hua Jun-dong, made a special trip from Beijing for the occasion.

University Enjoys Privileges under Medical Registration Ordinance

Consequent upon the establishment of the Faculty of Medicine at the University, the Medical Registration (Amendment) Bill was gazetted on 9th July, 1982. The Bill extends to the University the same privileges enjoyed by the University of Hong Kong under the Medical Registration Ordinance.

Under the provisions of the Bill, a certificate of experience for the purpose of obtaining full registration may be obtained from this University as well as the University of Hong Kong, and membership of the Hong Kong Medical Council will be expanded to include a representative from this University.
Second International Meeting of University Administrators

The Second International Meeting of University Administrators, jointly organized by United Kingdom Registrars of Universities and the Conference of University Administrators, was opened on 30th August, 1982.

The five-day meeting, with “The Financing and Management of Higher Education” as its main theme, was attended by over ninety senior administrators from sixteen institutions of higher learning in different parts of the world. The University was represented by Mr. Paul Wong, Assistant Bursar, at the Meeting. Several senior administrators from the University were also invited to attend various sessions as observers.

The closing session, held at the University, was followed by a slide show on the University.

Appointment of Overseas UPGC Member

Professor Inga-Stina Ewbank, Professor of English at Bedford College, University of London, has been appointed overseas member of the University and Polytechnic Grants Committee by His Excellency the Governor for a term of five years with effect from 1st September, 1982. Professor Ewbank is to replace the late Professor Barbara Strang who passed away in April, 1982.

Emeritus Professors

On recommendation of the Senate and in accordance with Statute 21 of the University Ordinance, the Council, at its meeting held on 5th October, 1982, approved the award of the title of Emeritus Professor to the following retired Professors, with immediate effect:

- Professor Cheng Te-K’un, retired Professor of Fine Arts;
- Professor Hsing Mo-huan, retired Professor of Economics; and
- Professor Jao Tsung-i, retired Professor of Chinese Language and Literature.

Inaugural Lectures

The following professors delivered their inaugural lectures in 1982:

- Professor W. C. Hamann, Chair of Physiology: “Physiological and Pathophysiological Aspect of the Skin Senses” (26th February).
- Professor D. J. Riches, Chair of Anatomy: “The Skin: Its Importance in Anatomy and Medicine” (23rd April).
- Professor J. E. Gardiner, Chair of Pharmacology: “The Philosophy of a Medical Pharmacologist” (24th September).

Professor C. N. Chen, Chair of Psychiatry:
“The Gradual Metamorphosis of Psychiatry” (14th October).

Professor Y. W. Chan, Chair of Physics: “Evolution of Scientific Thought in Physics” (3rd November).

Professor S. P. B. Donnan, Chair of Community Medicine: “Training for Uncertainty — Medical Education and Socio-economic Influences on Health” (19th November).

**Professor Shing-tung Yau Won Fields Medal**

Professor Shing-tung Yau, a mathematics genius who graduated from Chung Chi College of the University, was recently awarded one of the two highly prestigious “Fields Medals” of 1982. He is the first Chinese scholar to win this honour.

Since their establishment forty-six years ago, the “Fields Medals”, awarded every four years, have become the highest honours given to outstanding young mathematicians under the age of forty.

Professor Yau is a Life Member of the Institute for Advanced Study in Princeton. He had been Visiting Professor at the University of California (Los Angeles) and full Professor at Stanford University. Barely past the age of thirty, Professor Yau has obtained numerous honours in consequence of his achievements in mathematics.

**Civil Service Careers Exhibition, 1982**

The 1982 Civil Service Careers Exhibition, jointly organized by the Civil Service Branch of the Government Secretariat and the University’s Appointments Service, was held on 4th and 5th October at the Sir Run Run Shaw Hall.

At the opening ceremony, Dr. Ma Lin, the Vice-Chancellor, remarked that in the nineteen years of its history, the University has provided the territory with a substantial number of well-trained graduates with sound ideals and high aspirations. “Figures of 1982 show that over 99% of the year’s graduates who opted for employment were able to find suitable jobs within six months after graduation, and opportunities were open to them in a wide spectrum of career fields. The number of graduates joining the Civil Service has also been on steady increase. During the first eight months of 1982, a total of two hundred and thirty Chinese University graduates have been appointed to various departments within the Government,” he said.

The Exhibition, in which twenty-seven Government departments and units took part, was the fourth of its kind held on the campus. Representatives of the participating departments and units were on hand to explain the career opportunities in the Civil Service.

**Colleges Celebrated Founders’ Days**

* New Asia College celebrated its 33rd anniversary, the 2,533rd birthday of Confucius and Teachers’ Day on 25th September, 1982. Activities organized to mark the event included lion dance, round-the-campus race, tug-of-war, stall games, tea reception and dinner. The day’s celebration culminated in the vocal concert by allegro singers in the evening attended by over one thousand people. The celebration also included a garden party held on 28th September.

* Chung Chi College celebrated its 31st anniversary on 29th October, 1982. Activities organized by the College included the Foundation Stone Laying Ceremony of the Siu Tao Fung Shan Housing Project, which was officiated by Mrs. Jean Pommerenke, wife of the donor; a Thanksgiving Service; sharing of birthday cakes and a dinner with about one thousand and seven hundred participants.

The Student Union of the College also organized a series of activities for the event, which lasted sixteen days. These included interdepartmental debates, group singing contests, basketball match, variety show, cross-campus run, and interdepartmental mix choir competition. Chung Chi Personalities and Events of the Past Thirty Years, a special issue which aims at promoting the Chung Chi Spirit, was also published.

* United College celebrated its 26th anniversary on 30th October, 1982. Activities for the occasion included sharing of a birthday cake, lion dance, tea reception, round-the-campus race, folk dance, lunch, sports competition, variety show and a ceremony at which prizes for academic excellence were presented. An exhibition of Chinese herbs was also mounted on that day.

**Grace Tien Hall Completed**

A new hostel of New Asia College — the Grace Tien Hall — was completed recently. The construction cost of the building was over ten million dollars, towards which Dr. the Hon. Francis Tien, Chairman and Managing Director of Manhattan Garments Ltd., contributed three million dollars. The remaining sum was provided by the Government.

As an expression of the University’s appreciation of Dr. and Mrs. Tien’s generosity and concern for the development of university education in Hong Kong, the hostel is named after Mrs. Grace Tien. This seven-storey building provides residential accommodation for three hundred students. Apart from the basic facilities, there are two music rooms, a typing room, a TV room, a meeting room and a number of common rooms.
The Distinctive Marks and Ceremonial Dress Committee Reactivated

The Distinctive Marks and Ceremonial Dress Committee has recently been reactivated to attend to a number of new tasks. Its membership is as follows:

**Convenor:** Dr. F. C. Chen (Secretary of the University)

**Members:**
- The Hon. S. L. Chen (nominated by the Council)
- Dr. Ellen Li (co-opted by the Committee)
- Mr. Patrick K. C. Yiu (representing Chung Chi College)
- Dr. Mayching Kao (representing New Asia College)
- Dr. Lam Yat Wah (representing United College)

**Secretary:** Mrs. Amy Mok (Senior Assistant Secretary, Secretariat)

New Appointments to Boards/Committees

The following appointments to boards/committees have been made (with effect from 1st August, 1982):

* Mr. Hui Kwok-hau, Director and General Manager of the Park Hotel, has been appointed a member of the Board of Trustees of New Asia College for a term of three years.
* Mr. Frank Hui-po Lin, Director and Manager of Hong Kong Milo's Knitwear Factory, has been appointed a member of the Advisory Board on Extramural Studies for a term of two years.
* Mr. Christopher W. Mok, has been appointed a member of the Management Committee of the Art Gallery for a term of two years.
* Professor S. W. Tam, Professor of Chemistry, has been appointed Chairman of the Chinese Language Centre Management Committee.

New Office Bearer of CUHK Federation of Alumni Associations

The Federation of Alumni Associations, The Chinese University of Hong Kong, at its meeting held on 22nd September, 1982, elected the fifth Executive Committee (1982-83) with the following membership:

**Chairman:** Mr. Lung Ching Cheung

**Vice-Chairman:** Mr. Lau Sai Yung

**Secretary:** Miss So Yin Han

1982 Vice-Chancellor's Cup Staff Sports Tournament

The annual university-wide Staff Sports Tournament was held on 7th November at the newly-completed University Sports Centre. (The increasing activities on the football fields and the basketball courts starting a few weeks before the event had heralded the magnificent occasion.) Over one hundred and fifty players representing six teams (Arts, Business Administration, Medicine, Science, Social Science and Administration) participated in the matches. The champion and runner-up for the soccer match are the Business Administration and the Medicine Teams and for the basketball match are the Arts and the Science Teams. The Vice-Chancellor's Cup went to the overall co-champions, the Science and the Medicine Teams after more than seven hours of exciting competition.

Dr. and Mrs. Ma Lin and Professor and Mrs. Baysung Hsu were at the final match, following which they presented the Cup and trophies to the winning teams.

Clean CU Day

The "Clean CU Day" was held on 10th September, 1982 to promote general cleanliness on the campus. The opening ceremony, officiated by Dr. the Hon. K. F. Ho, included music and march-performance by the Royal Hong Kong Police Band, singing performance by local singers and presentation of souvenirs by Mr. Martin Lewis, coordinator of the Clean Hong Kong Campaign. The clean-up was generously assisted by the New Territories Urban Services Department.
The New Department of Psychology

AN INTERVIEW WITH
DR. FANNY M.C. CHEUNG

The long-awaited major programme in Psychology has finally been introduced this year. The former Psychology Section of the Sociology Department which offered a minor programme has now become the Psychology Department, with seventeen potential majors initially. There is no fixed quota for minor students and application is open to qualified undergraduates of all Faculties.

In the past few years, when only a minor programme was offered, our students were often highly commended by the External Examiners, and some of our graduates furthered their studies in Psychology at very competitive Graduate Schools in America.

In order to present to our readers a clearer picture of this newly established Department, the editor interviewed Dr. Fanny Cheung, Lecturer of the Department and Head of the former Psychology Section.

A Behavioural Science
Q. Would you please tell us what kind of science Psychology is?
A. Psychology is a behavioural science. Its subject matter covers topics from the natural sciences to the humanities. The two universities in Hong Kong list Psychology under the Social Science Faculty, but many universities overseas and in China consider it a science. Psychology covers a wide field: behaviour ranging from those of biological systems to social interactions all falls within its scope of investigation. As an academic discipline it originated in experimental laboratories: its formal history may be said to begin with the German Psychologist Wundt in his Leipzig Laboratories about one hundred years ago. What Wundt really attempted was to find answers to philosophical questions by using the methods of Physics and Physiology. Thus was established an independent discipline which dealt in a scientific manner with what were classified as metaphysical concerns of the day, like 'Why do we have sensations?', 'How do we know what we know is real?', and so on.

Many people have confused Psychology with psychoanalysis. It is true that abnormal behaviour and therapeutic processes are close concerns of Psychology, but they constitute only one aspect of applied Psychology. Psychology is a much wider field, which encompasses many basic components like basic psychological processes, developmental processes, research and experimental methods, personality and social psychology, etc. Thorough understanding of these basic components is necessary for any one to proceed to the applied aspects of Psychology.

Q. Is Psychology a multi-disciplinary subject then?
A. Well, academic divisions are, after all, arbitrary. In fact, many disciplines in university studies share the same goal or subject matter, and only differ in perspective, research method, and emphasis. Psychology certainly is a wide field related to, and often working conjointly with, many other disciplines.

Q. What are the branches of Psychology?
A. Perhaps we can take a look at professional associations of Psychology. Well-established psychological associations, say for example the American Psychological Association, have over forty divisions ranging from broad topics like General Psychology, Experimental Psychology, Developmental Psychology and Social Psychology, to applied ones such as Clinical Psychology, Counselling Psychology, School Psychology, to specialized topics like the Psychology of Religion, the Psychology of Women, Psychology and Law, etc. This complexity is, of course, not fully reflected in an undergraduate curriculum. How-
Descartes thought the 'mind' could not be objectively studied. However, contemporary psychologists, by employing the 'reaction time' method, have succeeded in studying objectively and precisely the operational process of the 'mind'.

ever, some common basic areas are covered in most introductory textbooks on Psychology. These areas are included in our major curriculum.

Q. How is the Psychology programme of the University structured?
A. About eleven years ago the Sociology Department started to offer Psychology as a minor programme, which was a rather comprehensive one, with eight degree papers for students to choose from. The fact that a number of our minor students did well when they were admitted by very competitive overseas universities to graduate programmes in Psychology gave us confidence that our training was quite sound.

The present major programme is designed to equip a student with the basic skills and knowledge. Besides the lectures and books, we have also emphasized the use of laboratories. The curriculum has resulted from a reorganization in the light of our past experience and the requirements of professional psychological associations, as well as undergraduate Psychology programmes of major universities in America and the United Kingdom.

At the moment, we offer seven degree papers. This does not mean that we are offering fewer courses. The scope of the courses is basically the same as before. Some courses like General Psychology, Introduction to Statistics, Experimental Methods and Designs have now become core courses, which are required of major students but do not necessarily lead to degree papers: they constitute basic background knowledge for a major student. The seven degree papers, which aim at introducing to major students the different areas of Psychology, group courses together topically. The main groups are: Basic Processes (e.g. Basic Learning Processes, Human Learning and Memory, Psychology of Language, Sensation and Perception, Motivation and Emotion, Psychological Psychology), Developmental Processes (e.g. Developmental Psychology, Educational Psychology), Social Behaviour (e.g. Social Psychology, Industrial Psychology), Personality (e.g. Cross-cultural Psychology, Personality), and Mental Health and Disorder (e.g. Abnormal Psychology, Counselling and Guidance, Community Psychology).

Q. Is there any emphasis in the Psychology major programme?
A. Ours is a balanced programme. We think that basic general training should be given to undergraduates. What we are offering is the basic introduction to Psychology, methods of approach and investigation so that students can grasp the basic skills and knowledge, and can apply them to academic research, practical work and daily life.

Q. If students are trained to do experiments, are equipment and facilities adequate in the University?
A. As Psychology is listed under the Social Science Faculty, it is generally mistaken for a paper-and-pencil discipline which has no use for experimental laboratories. At the present stage, we need to expand both in terms of space and equipment. Technology in Psychology is advancing rapidly these days; if we are to provide quality training to our students, we have to develop adequate facilities.
Physiological measures are used to assess psychological states.

**A Challenging Mission for the University**

Q. Is it true that Psychology requires of its students certain cultural adaptations?

A. Yes. In fact the University is facing the challenge of developing Psychology as a discipline relevant to the Chinese. As this professional discipline originated in the West, we need to consider the extent of cultural differences in the basic processes. While many concepts are universal, some are definitely culture-bound. Furthermore, by studying concepts indigenous to our culture, we can derive basic knowledge which may in tum be extended to general psychological concepts. Psychology has a longer history in the West, but nowadays issues of cross-cultural applications and relevancy have been raised.

Q. Since you mentioned “developing Psychology as a discipline relevant to the Chinese”, may I ask what has become of Psychology as a discipline in China at present?

A. In China, Psychology is listed under the Science Faculty. The Psychology Department has been restored in four universities. In addition, the Institute of Psychology at the Chinese Academy of Sciences is carrying out a number of diversified research projects on child development, perception and cognition, physiology, medical psychology, and industrial psychology, etc. During the Cultural Revolution, progress at the various university Psychology Departments and the Institute of Psychology came practically standstill. Until recently, the emphasis was on basic processes and the universal aspects of behaviour. However, recent research in applied Psychology reflects practical problems with which China is concerned, for example, the effect of population planning on child development, the integration of Eastern and Western medicine in psychotherapy, etc.

**Diversified Research Interests**

Q. We offer a balanced programme to our students, but what about our staff’s research projects? Are there any particular emphases?

A. Yes, as our specialties differ, we have different research interests. The research that I myself have been doing is mostly related to personality and clinical concerns, for example, anxiety among secondary school students, and symptom presentation and help-seeking behaviour among Chinese mental patients.

Besides local studies, we are also involved in comparative cross-cultural studies. For example, I am working in conjunction with the East-West Center on a project on cultural adaptation and health. We study how Chinese and American students in different locations adapt to their cultural environment, and what effect the adaptation has on their health.

In another applied cross-cultural research project, Dr. T. Ting and I have translated, adapted and analysed the cultural equivalence of the MMPI, a personality test widely used in the West, so as to make it relevant to Hong Kong in personality assessment.
Intelligence is an important and controversial topic in contemporary Psychology. Are standardized assessment procedures developed in the West, such as the test item shown in the picture, valid and relevant cross-culturally?

Dr. M. Bond is also interested in cross-cultural studies and has put forward his findings in social concepts like 'equity East and West', the self-concept of the Chinese, and ethnic affirmation.

Industrial and management Psychology research is another area in which Dr. Ting is interested. She studies how the cultural and social factors in Hong Kong and other Asian cities affect motivation and management patterns.

More basic experimental researches are carried out by Dr. K. L. Kong. He studies grasshopper's spectral sensitivity, wavelength discrimination and light adaptation. Dr. Kong is also conducting a research on automation speech recognition. By using electronic pathway to simulate the brain structure of speech recognition, he has established a new research model. Although the research is still at an early stage, it holds promises of high theoretical and practical values.

In Professor I. M. Liu's numerous researches, we can see an emphasis on the study of language, learning and thinking. As a more detailed account of his research interest is available in his Profile, I won't elaborate on them here.

Our new colleague, Dr. P. Cheng, engages herself in studying perception, learning and reasoning. Integrality and separability in perception, mistakes often committed in the process of cognitive reasoning and their corrective measures are some of the areas she is particularly interested in. So you see, our staff do have a wide spectrum of research interests.

A Wide Range of Career Possibilities

Q. Can a collective profile be delineated of our students?
A. We cannot draw a very distinct profile for minor students because of the limited number of courses they take. The number of students minoring in Psychology approached three hundred during each of the past few years. Quite a few of them had wanted to major in Psychology, but we were unable to offer a major programme then.

Our minor students were mostly in the Social Science Faculty majoring in Social Work or Sociology. Besides them, we also draw heavily from the English Department in the Arts Faculty, and the Biology Department in Science. In the Faculty of Business Administration, over thirty students came to our minor programme last year.

This year, most of our seventeen potential majors studied science subjects in secondary school. They scored very good results in the matriculation examination.

Q. Why do students take Psychology? What are the attractions?
A. Psychology is in itself a very interesting discipline. It is in many ways related to questions we ask in our daily life. Students take Psychology because they want to understand behaviour, human beings, and especially themselves. Their main interest initially centres around problems related to what they see and feel everyday. That's what we gather from our interviews with students. After getting to know the various basic processes and methods of investigation, their interest in the subject generally begin to broaden. And for students who get involved in our staff's researches, the subject becomes even more interesting to them.

Q. Are there any special requirements for students who wish to take Psychology?
A. As a department in the Social Science Faculty, we follow the entry requirements of the Faculty and select students on the basis of their interest and aptitude. As an undergraduate programme, we support the basic philosophy of a liberal education. What we are aiming at in our major programme is to help students develop powers of systematic, empirical, and rational analysis and judgment, and apply in life what they have learnt.
Q. "In the past, when we offered the minor programme, could students apply what they learnt in their work?"

A. It is difficult to cite careers which are specifically related to undergraduate Psychology courses. Psychological theories can be used and applied in many kinds of work. What we are trying to do is to help students understand behaviour from a more perceptive perspective.

Students who majored in Social Work and minored in Psychology found that they could apply what they had learnt in counselling. Sociology majors and students of the Faculty of Business Administration could also use psychological theories and approaches in social research, administration and management. Graduates who joined the educational field also felt that Psychology had its practical value both in teaching and in student guidance.

Generally speaking, personnel and research work in the commercial field, industrial and social research, administration, teaching, and other social services are some of the bigger outlets for Psychology undergraduates. However, further professional training is necessary for those who wish to become professional psychologists.

Q. "Is it too early for us to talk about the introduction of a postgraduate programme now?"

A. We have considered the setting up of a postgraduate programme in our long-term planning. It is our hope that graduates can receive further professional training so that there will be more experts in this field to meet the needs of Hong Kong.

Professor Liu In-mao was among the first class of majors to graduate from the Department of Psychology at the National Taiwan University in 1953. After receiving his M.S. at Ohio University in 1957 and Ph.D. at the University of Illinois in 1959, he became the first graduate of his department to join the faculty of his alma mater, the National Taiwan University, and has remained there till this year. His third "first" has to do with his chair as Professor of the newly established Department of Psychology at this University, he has no predecessor.

Professor Liu brings with him a wealth of experience in administration and research. He was the Head of the Department of Psychology at the National Taiwan University from 1969 to 1975. He has published numerous English and Chinese articles on reaction time, conditioning, verbal learning, and cognition in international journals such as the American Journal of Psychology, Memory and Cognition, Journal of Experimental Psychology, Psychological Review, Acta Psychologica Taiwanica, and Japanese Psychological Research. His recent research interests lie in the human memory system and the psychological process of comprehension. He is studying how people learn and store new information in long-term memory, and how one's existing knowledge structure interacts with the input of new knowledge structure. In his investigations on comprehension, he is examining the internal processes of sentence comprehension, analogical reasoning, subjective preference and value judgment. These important studies represent the scientific inquiry of everyday psychological behaviour in which microfacts vigorously investigated in the laboratory may be used in basic knowledge building as well as in practical applications.

Professor Liu has authored or edited several Chinese books on general psychology and basic psychological processes, which are important in promoting the understanding of Psychology as a scientific discipline. The same vigour will be seen in his development of the Psychology major programme at our University, which integrates knowledge, method, and application in the study of a field often mistaken for common sense or myth.

"—F. M. C. Cheung"
New Centre for Physical Education

After ten years of planning and sixteen months of construction, the University Sports Centre is now open for use.

Standing beside the Tennis Courts (No. 3, 4, 5) and overlooking the University Stadium, the three-storey gymnasium has an area of approximately two thousand square metres.

The basement contains changing rooms, lockers, showers and an air-conditioned classroom. A multi-purpose gymnasium takes up most of the area at the ground level. The uniquely designed “sky-light roof” of the gymnasium, making possible the use of both natural sunlight and artificial lighting, is the first of its kind in Hong Kong. Playing area inside the gymnasium consists of five badminton courts, a full size volleyball court and a tournament-size basketball court, while the telescopic bleachers provide a seating capacity of over five hundred spectators. Other installations include two electronic score boards and a dividing curtain which can partition the gymnasium into two halves when necessary.

Also on the ground floor are offices, a seminar room, a staff common room and an issuance counter for lending equipment such as badminton racquets, tennis racquets, basketballs, volleyballs, footballs, etc.

The Director’s office, a spacious room with windows facing the tennis courts and stadium, is located on the top floor of the building. Adjoining this is a games room which can also serve as a classroom for dancing, martial arts and table tennis.

Students and staff are welcome to use the gymnasium for sports activities.

—Physical Education Unit
Room for the Other Half — Non-residential Halls at United

Under the aegis of the College Endowment Fund Committee, two non-residential halls were inaugurated at United in October 1981. Commuting students of the College can now partake more fully of university life. The halls are named after Dr. the Hon. Sir Kenneth Ping-fan Fung and Dr. the Hon. P. C. Woo, former Chairman and current Chairman respectively of the United Board of Trustees, in commemoration of their contribution to the University.

In order to provide community life similar to that of residential halls, a warden has been appointed for each Hall: Dr. H. C. Kuan, Senior Lecturer of the Department of Government and Public Administration, for Pak Chuen Hall; and myself, Lecturer of the Department of Chinese Language and Literature, for Ping Fan Hall. To strengthen student-staff relationship, academic staff are invited to join the Halls. Over twenty academic staff have now become hallites.

Students will organize their own Non-residential Hall Committees which are responsible for the day-to-day management of the halls and organization of activities.

Located in Rooms 208 and 308, Amenities Building, the Halls have approximately an area of ninety square metres each. They are specially designed, fully carpeted and air-conditioned, and provide day students with an excellent place to relax in between lessons, where they can browse over a magazine or newspaper, play a game of chess, or listen to the Hi-Fi.

Activities organized by the Halls last year included Christmas balls, dinner parties, birthday parties, hiking and launch picnics. It is hoped that through these get-togethers, various tournaments and activities, interaction and the sharing of experience between students and staff of different faculties may be effected and esprit de corps and a sense of loyalty may be promoted.

The non-residential halls are at an early stage of development, and the emphasis for the coming year will still be on consolidation and fostering closer ties among members. At present, as each Hall has a membership of over five hundred, co-ordination is no easy task and facilities often cannot meet demand. However, the support of the College and Dean of Students' Office, coupled with students' joint effort, gives us the confidence that difficulties can be overcome and that a bright future lies ahead.

— S. H. Chang
A Small Giant – the Wang VS-8S

The Wang Pacific Limited generously decided to sponsor a project to promote electronic business data processing in an educational institution. We are proud that Wang has chosen this University.

The Wang VS-8S, a virtual Storage Computer System used by many trading and manufacturing companies in Hong Kong as well as the rest of the world, has been installed at the Computer Services Centre. It is an efficient machine particularly suited for business data processing. The System together with its peripherals is easy to operate and maintain. It does not require special operating environment such as false flooring, special air conditioning, etc. It is intended that students from the Business Administration Faculty will operate the machine with minimal supervision. The terminal with many functional keys readily endears itself to a DP professional and as readily allows first-time users to learn the art of data processing. Most professionals have found it to be a small-sized giant of a machine. It is a truly welcome addition to the other mainframes at the Computer Services Centre.

Wang has not only made the machine available to the University through its sponsorship of the project, it has also provided the software required to run it efficiently. The standard operating system and utility programmes, together with different compilers for students to learn high-level languages are included in the package. An additional software package that is most popular among local Wang users is the Generalized Business System. It contains such application systems as Order Entry, Accounts Receivable, Inventory Control, Accounts Payable, Payroll and Sales Analysis. One might wonder how a non-profit-making organization like our University could benefit from this package. The answer is: accounting and business administration principles can be demonstrated on the machine. It is expected that teachers of the Business Administration Faculty will heavily use the machine to solve problems, teach programming languages and demonstrate simulated business situations. It will be an instructional machine, a research tool and a definite asset to the University in general and the Faculty of Business Administration in particular.

The University has always enjoyed a fine relationship with this internationally well-known company. Its sponsorship of this project is another vote of confidence to the University. Our sincere thanks to Wang Pacific and the managers of the company who arranged the sponsorship.

-S. Hu
Since the establishment of the Committee on Instructional Development (CID), later reorganized as the Senate Committee on Instructional Development (SCOID) in 1978, the University has seen a number of major improvements in its teaching methods. Among the units which have been instrumental in bringing about the change is the University Instructional Media Services (UIMS).

The UIMS, set up in 1978 by the SCOID in response to teachers’ requests for improved facilities, offers a wide range of services to the staff of the University. Its main function is to assist the teaching staff in the preparation and use of teaching media and provide them with adequate audio-visual equipment for classroom instruction. When instructional commitments have been fulfilled, assistance may also be rendered to those who want to use audio-visual media for non-instructional purposes.

Media Advice and Information Services

For university staff who are interested in audio-visual instruction, curriculum development, education media, and instructional technology, the UIMS provides information and media advice through its collection of software and hardware catalogues, professional journals and reference books on educational technology, and audio-visual information from local media representatives. Assistance may also be offered to those who seek permission to use local television programmes in classroom teaching by negotiating with local media specialists, producers, laboratories and agents.

In addition, the UIMS often conducts seminars and workshops for staff and students on media selection, utilization, preparation and production.

Production Services

One of the main functions of the UIMS is to assist academics to prepare instructional materials or to produce such materials for them.

Production services include audio-tape dubbing, recording and mixing of language teaching sound tracks, tape-slide presentations with sound effect, and other types of instructional programmes, recording of AM and FM radio programmes and local television programmes off the air, video-tape dubbing and video-tape production. However, requests for audio-dubbing and recording of radio and TV programmes are accepted only when the materials and programmes to be recorded are free from copyright restrictions.

Another of its services is in the area of graphic design and photography. A graphic designer handles all requests for illustrations and layout for research projects and publications and production of teaching graphics such as charts, models and maps. The photographer undertakes to produce slide materials for the teaching staff, including 35mm positives photography, slide duplication, close-up copying (macro-photography) and filmstrip-to-slide transfers. The Unit also offers technical services such as laminating, mounting and spirit duplication.

When instructional needs arise, the UIMS may extend its service to include planning, script writing, etc. in the production of tape-slide programmes. However, if staff members desire to prepare their own instructional materials, there is a 'Do it yourself' (DIY) Section under the Unit. Among the many items available for staff to use on their own are such pieces of equipment as 35mm photographic still cameras, Ektographic visual makers, etc.
Equipment Available

The UIMS provides a basic issue of audio-visual equipment to be checked out, which includes:

**Projectors** — super 8mm, 16mm sound, filmstrip/cassette, filmstrip/slide, slide/cassette, 35mm carousel, opaque, overhead.

**Screens** — tripod, wall, rear projection (for individuals).

**Audio Equipment** — reel to reel tape recorder, cassette tape recorder, portable P.A. system, synchronization recorder (for tape-slide programmes).

**Television Equipment** — video reel/cassette tape recorder (1.27 cm, 1.9 cm), television monitor, television camera, portable colour/black and white video recording unit.

**Production Equipment** — 35mm photographic camera, ektagraphic visual maker, motor drive unit, flash unit, graphic tool, super 8mm camera.

For equipment on semi-permanent loan to various departments of the University, the UIMS recalls them annually, if not more often, for cleaning and maintenance. Departments and units with no technicians may join the annual maintenance scheme.

**Language Laboratories**

The UIMS is in charge of four language laboratories located in the three colleges. The language laboratories can be reserved for teaching classes and for students' private practice. A large collection of English tapes on drama, poetry, grammar, pronunciation, conversation, and language drills as well as French, German, Italian, Japanese, Mandarin and Cantonese audio tapes are available. Catalogues of tapes are obtainable from the Unit and the laboratories.
In the autumn of 1982 Mr. John Gannon retired from the chairmanship of the Senate Committee on Instructional Development (SCOID) after expertly launching it and leading it for six years, first in the form of a committee under the Administrative and Planning Committee and then as a Senate Committee for four years.

Dr. Ho Hsiu-hwang, Senior Lecturer in Philosophy, graciously agreed to become the new chairman of the Committee from September 1982. Dr. Ho has been described as “a teacher, an essayist, a writer of books on logic, semantics, methodology and philosophy.... He is currently contemplating a book on the meaning of the Twentieth Century.” Some sections of his new book have already been written and published as separate articles. His most recent publications are *A Glossary of Logical Terms* (Hong Kong, 1982) and articles on “Logic and Justification”, “Perception of a Leader”, “Language, Meaning and Understanding”, “Cantonese, Hong Kong Culture and the Chinese Tradition” and “On the Future Development of Chinese Philosophy”.

Dr. Ho first joined the University in 1972 and since then has been dedicated in the many contributions he has made, both academic, administrative, social and cultural. He was, *inter alia*, Chairman of the Board of Studies in Philosophy, Chairman of the Integrative Basic Studies and Education Committees of Chung Chi College and is currently serving on numerous Senate committees such as that on Academic Planning, on the University Library System, on Staff-Student Relations, and on the Dual Teaching System. He has been a Fellow of Chung Chi College since 1979 and is a member of the College Cabinet.

It is his deep interest and concern in the art of good teaching and learning that particularly fits Dr. Ho for his new responsibility as Chairman of the SCOID. From his earliest days at the University, he has been interested in new techniques as well as the improvement of traditional ones for both teaching and learning, and has always been able to give quiet encouragement and wise advice to colleagues and students who need them. One of the first new projects undertaken by the Committee under his leadership is the preparation of a campus news-sheet *Teaching and Learning at The Chinese University*. Its purpose is to provide information on developments on course design, teaching, learning and evaluation techniques at university level and especially as they occur in our institution. It will be a forum for the exchange of ideas about teaching and learning. It is hoped that *Teaching and Learning* will be of interest not only to staff who are professional teachers, but also to students, who for their four undergraduate years might be regarded as forming a body of professional learners. There will be emphasis on the skills of being a student alongside a continuing interest in innovative teaching, instructional development and teaching services which have been the main concern of the SCOID ever since its inception.

The Senate Committee is very fortunate in having such a man as Dr. Ho to guide its activities in the coming years.

—R. F. Turner-Smith
Student Enrolment

1982-83

In 1982-83 there has been a small but steady increase in student enrolment. The number of undergraduates increases from 4,431 to 4,659 and the number of postgraduate students increases from 935 to 1,002.

The year is marked by the inauguration of new undergraduate major programmes in Statistics and Psychology, both of which admit a class of 17 first-year students. The number of Medical students is more than double as the Faculty of Medicine admits its second class of pre-clinical students. Also included in the enrolment is a second batch of potential medical majors. Among the established departments, the Departments of Social Work and Computer Science experience considerable growth in student enrolment.

Another major development of the year is the enrolment of the first group of students in three newly established part-time degree programmes: Chinese and English, Music, and Business Administration. A total of 139 students have been enrolled in these new programmes and the Social Work part-time degree programme.

In the same year postgraduate enrolment has expanded. This is underscored by the sizable increase in the number of M.Phil. students from 133 to 162 and the introduction of a part-time M.A. (Ed.) programme which enrolls 30 students for the first time.

Research Project on Physical Activities and Quality of Life in Densely Populated Areas

The Chinese University and the University of Michigan jointly launched a research project on Physical Activities and Quality of Life in Densely Populated Urban Areas in August 1980. The project, which aims at examining the effects of physical activities on stress reduction, health, productivity, and quality of life in an urban environment, is likely to have far-reaching consequences in the study of urban living.

Hong Kong Chosen for Study

Urbanization and accompanying urban changes such as crowded living conditions, energy depletion, heavy traffic and toxic environment have produced high levels of stress detrimental to human health. The incapability to adapt to these changes results in increased rates of chronic diseases, emotional disorders, and mental breakdowns. The result of maladaptation to a lesser extent is a lower level of working efficiency and life enjoyment. Therefore, the attainment of a state of complete physical, mental and social well-being is a crucial problem of urban living. And the reason why Hong Kong has been chosen for study is obvious. First, Hong Kong is one of the most congested areas in the world, undergoing rapid urban changes during the last two decades. Secondly, it is a place where the values and traditions of the East and West meet and interact. Research into how Hong Kong has coped with these problems could be of use, therefore, not only to other cities with similar experience, but also to those who are exploring ways of adjusting to urban changes in places where two cultures meet.

The Project Directors are Professor Cho-Yee To of this University and Professor D.W. Edington of the University of Michigan. The two universities have joined forces to design, coordinate and conduct a series of studies under the project. Staff members of this University's Physical Education Unit, Health Service, Faculties of Medicine and Social Science and School of Education have been working in close cooperation with researchers from the University of Hong Kong, the Hong Kong Polytechnic, the Education Department, the Recreation and Sports Service, and the Jubilee Sports Centre.

Three Phases

The project, expected to be completed by 1987, is divided into three phases, each of which has clearly defined objectives:

Phase I: 1980-1981

1. to provide profiles of physical fitness of Hong Kong students at different age levels;
2. to identify a relationship between physical fitness and academic performance;
3. to show how interest in physical education and positive attitudes towards it might be developed among students so that they will continue activities which will maintain their physical fitness after leaving school;
4. to develop a theoretical model to explain the relationships between physical fitness, mental health, the ability to deal with problems arising from the stress of urban life, performance and output, and the quality of life of school children;

Phase II: 1981-1984

5. to provide analytical charts showing the physiological effects of the unique types of physical activities specific to urban areas;
6. to develop a theoretical model to explain the relationships between physical fitness, mental
health, the ability to deal with problems arising from the stress of urban life, performance and output, and the quality of life of adults;

7. to promote understanding of the role and function of physical activities in the urban setting;

Phase III: 1984-1987

8. to develop programmes of effective physical education suitable for people living in a densely populated urban environment in which space, both within the home and outside it, is severely limited;

9. to facilitate community planning with a view to mitigating the effects of urban stress and improving the quality of life; and

10. to enable an estimate to be made of the cost of physical education and recreational programmes in relation to their benefits.

Health & Fitness of School Children

The Phase I study focuses on health and fitness of school children. The Asian Committee for Standardization of Physical Fitness Test (ACSPFT) was administered to some 7,000 school children randomly selected from classes in primary 4 and 6 and forms 1, 3, 5, and 7 throughout Hong Kong, Kowloon, and Shatin in the New Territories. Standardized academic test scores were obtained and the students were asked to complete a “lifestyle” questionnaire for assessing their perceptions of psychological health. A longitudinal study will also be pursued to keep track of the development of physical fitness and health status of a subsample in Shatin, which is a rapidly developing community with a population expected to grow from 200,000 to 500,000 by 1985. The longitudinal study aims to determine the influence of the rapid urbanization process on physical and mental adjustment.

Analysis of the data will allow the investigators to draw inferences about the relationships between physical fitness, academic performance and life-styles related to urban living.

Relationship Between Health and Productivity in Adults

The overall focus of the Phase II study will be twofold: (1) scientific analyses of the “exercise value” of various activities practised in both eastern and western communities, and (2) follow-up investigation of the relationships between physical fitness, mental health and productivity in adult samples. As part of the longitudinal study, students in the Shatin subsample will be retested every year for three years. To follow the students from adolescence to early adulthood also shifts the research setting from school to industry and businesses. The exercise patterns for the adult samples will be studied in connection with job satisfaction, work efficiency and productivity.

The adult sample will be drawn by random selection of a family’s principal wage-earner, aged 20-59, balanced to be representative of age, job classifications and geographic area. It is estimated that nearly 400 adults will be interviewed. From each of the sample adults, information will be collected in the following areas: health habits, health attitudes and beliefs, physical fitness patterns, stress symptoms, job and life satisfaction, self-concept, social support, and environmental preferences.

Exercise Value of Various Activities

Physical fitness activities engaged in by adults will be identified and selected for a scientific evaluation of their fitness-generating potential. Exercise values of selected Oriental martial arts, such as t'ai chi, ch'i kung, tae kwon do, wing ch'un, karate, and judo, will be assessed by the same criteria. Analysis of the data will allow the team to find out, through scientific means for the first time, the exercise values of various physical activities and the activities that can be recommended to different age-groups in Hong Kong for their unique health and fitness needs.

When the first and second phases are completed, an intervention programme to integrate all the important variables previously investigated will be devised in the third phase. A new sample will be drawn in Shatin from different age-groups: early childhood, early adolescence, adolescence, and adulthood. Four classes in each grade level (5 grades) and 10 groups of 30 adults will participate as subjects. Additional health and fitness and recreational activities will be planned for the groups to be used outside of the school or office hours, and standard procedures of exercise testing, exercise and life-style programmes (jogging, aerobic dancing, etc.) and evaluation will be implemented for adults.

Significance of the Project

The significance of this project is directly related to the health and fitness of the Hong Kong population and their quality of life. If it can be shown that improvements in health and fitness could lead to increased productivity, quality of life, and mental health, an effective health and fitness programme could serve as a functional treatment in community medicine to combat the contemporary diseases associated with sedentary and stressful lifestyles. The Hong Kong experience could well be a model for other urban areas in the world.

ACADEMIC/CULTURAL EVENTS
Seminars • Concerts • Exhibitions

* The Department of General Business Management and Personnel Management held a seminar on “Development of the Shenzhen Special Economic Zone” in conjunction with the Chinese Executive Club of the Hong Kong Management Association on 25th July, 1982.

The Seminar sought to provide a clearer idea of the role the Shenzhen special economic zone plays in China’s modernization programme as well as the opportunities for investment by Hong Kong businessmen in the area.

Participants included scholars from China, local business executives and entrepreneurs. Among them were Mr. Graham C. H. Cheng, Chairman of Ta Ching Petroleum Co. Ltd., Mr. S. C. Lim, Director and General Manager of Lam Soon (H. K.) Ltd., Mr. K. T. Tongson, Director of Star Industry Co. Ltd., Mr. Ambrose Lau, Principal Lecturer of the Department of Business and Management Studies, Hong Kong Polytechnic, and Professor Ye Chunshen, Director of Management Engineering Department, South China Institute of Technology, China.

* The Education Communications and Technology Unit of the School of Education and Wah Kiu Yat Po jointly sponsored a seminar on “Television and the Society” from 31st July to 2nd August, 1982.

Over one hundred post-secondary students and secondary school teachers attended the Seminar, which aimed at enabling post-secondary students to gain, through courses and workshops on mass communication and television production, a better understanding of Hong Kong’s mass media and their effects on society.

Speakers of the Seminar included Ms. L. C. Lam, Executive Producer of Children Television Unit, HKTVB; Mr. K. Law, Assistant Director of Creative Programming Unit, HKTVB; Mr. S. Y. Wong, Director of the Newsroom of Wah Kiu Yat Po; Dr. W. Y. Leung, Assistant Dean of Communication and Journalism Department, Baptist College; and several senior producers of Radio Television Hong Kong. Dr. Leo Yam of the School of Education, the Seminar’s special lecturer, presented two papers entitled “Mass communication education: some recommendations” and “Television-film effects on teenagers: a pilot study”.

* The Department of Statistics held a seminar on “Randomized Response Methods in Repression Settings” on 2nd September, 1982. The Seminar was conducted by Professor Norman Matloff of the Department of Electrical Engineering, University of California at Davis.

* The Computer Services Centre held a seminar on “Future of Computing in the Eighties” on 7th September, 1982. The Seminar was conducted by Mr. Robert G. Gilbertson, Senior Vice-President of Data Architects, Inc. (DAI), and President of Data Architects Systems, Inc. (DASI).

The Seminar was conducted by Dr. Martin Lockett and Dr. Craig Littler, both of the Department of Social and Economic Studies of Imperial College, University of London, who had just returned from an investigative trip to China under an official Sino-British exchange programme.

* The Department of Geography held a symposium on “Development and Environmental Management in China and Hong Kong” on 25th September, 1982 to commemorate the tenth anniversary of the United Nations Environment Programme (UNEP). Over one hundred and thirty participants attended the Symposium, including scholars from the two local universities, Zongshan University, University of East Asia and the Hong Kong Polytechnic; environmentalists from the Environmental Protection Agency, the Agriculture and Fisheries Department, the Labour Department, the Royal Observatory and the Town Planning Office of the Government; and representatives of the Hong Kong Productivity Centre and several environment consulting firms.

Following the opening address by Dr. K. Y. Wong, Chairman of the Geography Department, the following papers were presented at the Symposium:

“Ecological Balance in the Pearl River Estuary” by Professor C. S. Shen

“Environmental Implications of Agricultural Development in Hong Kong” by Dr. C. T. Wong

“Environmental Problems of the Development of the Shenzhen Special Economic Zone” by Dr. S. I. Hsu

“Environmental Control through Urban Planning in Hong Kong” by Dr. K. S. Pun
"Principles and Methods of Establishing Emission Standards for the Mouming Industrial City, China" by Professor Y. L. Tang

"Site Selection and Impact Assessment for Large Sources of Polluting Emissions in Hong Kong" by Dr. S. B. Reed

"Environmental Management in Developing Countries: Some Lessons from China and Hong Kong" by Dr. K. C. Lam

* Mr. Brian Blomfield, Lecturer in English, gave a lecture on "Agamemnon" on 6th October, 1982. The lecture was presented by the Department of English.

* Mr. Tsin Yan-pui, Senior Recreational and Sports Officer of the Government spoke on "Women in Sports" on 13th October, 1982. The lecture was organized by the University Health Service.

* The Appointments Service launched a series of lectures on the teaching profession in collaboration with the School of Education from 19th to 28th October, 1982 for students interested in the profession.

The lectures, entitled "Academic Planning", "Classroom Management", "Extra-Curricular Activities" and "Student Guidance", were delivered by Dr. Benjamin Chan, Dr. Betty L. L. Yau, Mr. Y. W. Fung and Dr. M. P. Lam, respectively.

Music Department Sponsors Lecture-Recitals/Concert

* Dr. Colin Kingsley, a distinguished pianist and Senior Lecturer of the University of Edinburgh, presented a lecture-recital on "Piano Music by British Composers during the Last Thirty Years" on 20th September, 1982.

* Mr. David Bean, a distinguished American pianist and Artist in Residence of the Miami University, presented a lecture-recital on 5th October, 1982. The programme included works by Bach, Mozart, Finney and Chopin.

* A Freshmen Concert was held on 7th October, 1982. The programme included violin, viola, flute, piano, guitar, double bass and zheng performances.

* Dr. Brooks de Wetter-Smith, a renowned American flutist presently on the Music Faculty of the University of North Carolina, presented a lecture-recital on 13th October, 1982. Works by Handel, Bulow, Doppler, Schubert and Martin were included in the programme.

Festival of Chinese Arts

The University Student Union launched a Festival of Chinese Arts from 21st September to 16th October, 1982 to promote interest in Chinese arts among members of the University and the community.

The Festival, which was co-sponsored by the Office of Student Affairs and the Sir Run Run Shaw Hall, featured a wide range of stage performances presented by artists from Hong Kong and Beijing. The programme included Cantonese drama and opera, film show, Chinese orchestral concert, vocal concert, music and dance, etc.

The opening ceremony of the Festival, held on 9th October at the Sir Run Run Shaw Hall, was officiated by Mr. Hilton Cheong-leen, Chairman of the Urban Council, and Dr. Ma Lin, the Vice-Chancellor.

Art Gallery Exhibitions

* The Exhibition of Recent Acquisitions, mounted from 6th March to 9th May, 1982, displayed ivory carvings, ceramics, rubbings, Buddhist figures, sutra writings and bronzes acquired by the Art Gallery through the past year.

* At the Graduation Exhibition held from 21st May to 3rd June, 1982, works by seventeen graduates of 1982 of the Fine Arts Department were on display. Exhibits included Chinese paintings, calligraphy, oil paintings, prints and sculptures.

* The Exhibition of Blue and White Porcelain, held from 30th June to December, 1982, features wares made in Jiangxi Province since the fourteenth century, and is designed to illustrate the unbroken tradition of blue and white porcelain in China. Alongside the Chinese pieces, some Vietnamese and Japanese wares are also on display. Producing blue and white porcelain requires the technique of painting in underglaze blue, which was one of the most significant and widespread innovations in Chinese ceramic industry.

Book Exhibition

* An exhibition of British books on South-East and East Asia, jointly sponsored by the University Library and the British Council, was held at the University Library from 10th to 24th September, 1982. About two hundred books on history, geography, arts, literature, etc. were on display.

(Titles in Chinese)

André Malraux and China
By Liu Shuh-sien

André Malraux was Minister of Culture in the time of Charles de Gaulle, and among the few who had political influence in the contemporary world of letters.

After making a systematic study of Malraux the man and his works, the author gives a lively account of the French writer's lifelong pursuit, devoting particular attention to his writings about China. Memoirs of Malraux's visit to China translated by Madam Liu An-yun are also included in the book.
1st edition 1981 151 pages Paperback

Collection of Papers on History and Geography
By Cheng Te-K'un

This collection of papers, covering a wide range of topics related to the classics in ancient Chinese history and geography, were written by Professor Cheng Tek'un, an authority on Chinese archaeology.
1st edition 1981 344 pages Paperback

A Critical Study of the Chinese Translations of Hamlet
By Simon Chau

Shakespeare is among writers whose works are most widely read and translated. By examining six Chinese versions of Hamlet, the author analyses the nature and difficulties of literary translation, and compares the attitude and approaches of the translators, establishing a set of criteria for the practice and criticism of literary translation.
1st edition 1981 435 pages Paperback

Cultural Persistence and Preservation of the Hweichow Hakka: An Anthropological Study of Voluntary Associations in Urban Situation
By Hsieh Jian

The book, based on the analysis of the voluntary associations of the new Hweichow Hakkas, is a study of how this new community, without giving up its unique culture, seeks to identify with Hong Kong and adapts itself to the rapid urbanization of the metropolis.

Another feature of the book is a revaluation of certain hypotheses in anthropology, pointing out their shortcomings and limitations, since they fail to explain the facts discovered in this research.
1st edition 1981 95 pages Paperback

A History of Writing and Writing Materials in Ancient China
By T. H. Tsien

This book traces the origin and changes of the system of writing and writing materials in ancient China, dating from the fourteenth century B.C., when the earliest Chinese characters appeared, to about A.D. 700, when printing was invented. During this period the materials, contents, ways of recording, layout and certain distinctive features of Chinese writing took shape and were inherited as part of the tradition of Chinese writing and culture.
2nd edition 1981 238 pages Paperback
The Neolithic Site of Pan-po
By Lin Shou-chin

Pan-po is a typical site of the Neolithic Age. The book, based on a wealth of data on the site, expounds various aspects of society, economy and culture of the middle reaches of the Yellow River seven thousand years ago.
1st edition 1981 134 pages Paperback

The People's Commune and Rural Development
Edited by Rance P. L. Lee and Lau Siu-kai

This book is a collection of articles contributed by the academics of the Research Unit on People's Commune, set up by the University's Social Research Centre for interdisciplinary research on the social life and economic construction of the people's commune. Apart from collecting documents and data on the subject, the Unit visited several county towns and communes in Guangdong Province. The book is in the main a study of the Doushan People's Commune, Taishan County, but it also comes up with some general conclusions.
1st edition 1981 290 pages Paperback

Wang Ch'uan Shan te Chih Chih Lun
By Hsu Kwan San

This is another book by the expert on Wang Ch'uan Shan's thinking. The six chapters are entitled: "The Tao is Infinite; The Sage Does Not Exhaust the Tao"; "The Heaven that a Wise Man Knows is the Heaven of Man"; "When it Changes, Know that it Progresses; When it Progresses, Know that it Changes"; "Nothing is Constant in the Distinction of Right and Wrong"; "Unity Cannot Be Seen without the Establishment of Duality"; and "Human Minds are Similar, but the Trouble is in its Dissimilarity; the Function of the Mind Must Follow Definite Laws, but the Trouble is in its Inflexibility".
1st edition 1981 144 pages Paperback

Chinese Dialectology: A Selected and Classified Bibliography
By Paul Fu-mien Yang, S.J.

This is a comprehensive bibliography covering the whole field of Chinese dialectology. It differs from existing compilations in scope, criteria for inclusion, bibliographical exactness and format.

The work includes all important published studies — both books and periodical articles — in many languages: Chinese, Japanese, Korean, English, French, German, Dutch, etc. The Chinese, Japanese and Korean entries are given in Chinese characters, transliteration (Wade-Giles romanization), and English translation. A cross reference is given when an entry belongs to more than one category.
1st edition 1981 189 pages Hardcover

Circulation of News in the Third World — A Study of Asia
By Wilbur Schramm and Erwin Atwood

The authors of the book have analysed the flow of Third World news, and for the first time have been able to follow it from the news as reported in the country of origin, to the items picked up by the news wires, to the items reprinted from the wires by newspapers in other Third World countries, and thence to the readers themselves.

The book is richly documented, and an appendix containing forty detailed tables provides a basis for reference and further studies.
1st edition 1981 352 pages Hardcover

The Common Welfare: Hong Kong's Social Services
Edited by John F. Jones

The book is a collection of studies on Hong Kong's social policy, programmes and related issues. It offers a scholarly, critical and readable account of
Hong Kong's social services. Topics chosen to illustrate policy are: Hong Kong's educational system, housing programme, planning for the physically and mentally disabled, child care, old age and social security. A discussion of broad social issues relating to the politics of welfare, the public funding of voluntary agencies, and community development in Hong Kong is also discussed.

1st edition 1981 148 pages Hardcover

Corruption and its Control in Hong Kong
Edited by Rance P. L. Lee

The seven papers in this volume attempt to answer the following questions on the basis of systematic studies: What are the major causes and effects of corruption? In what ways and how effectively have corrupt practices been brought under control by laws and administrative measures?

1st edition 1981 221 pages Hardcover

Hong Kong Taxation: The Law and Practice
By David Flux

This is a comprehensive work covering in detail all of the taxes under the Inland Revenue Ordinance. It comprises eleven chapters dealing with the four Hong Kong income taxes, and all the legislation related to the administration, assessment and collection of these taxes. It has, in addition, appendices covering related tax matters, statements of practice, etc. and tables of tax cases and statutes indexed to the text.

Revised edition 1982 387 pages Hardcover

Science in Traditional China: A Comparative Perspective
By Joseph Needham

This is a collection of the 1979 Ch'ien Mu Lectures given by Dr. Joseph Needham at New Asia College.

The first in the series explains how findings from the voluminous materials available have made evident that ancient China was more advanced than Europe in Science. The second and third lectures cover the development of gunpowder and firearms in China before they reached the West, and of the idea of life-elixirs, which gave rise to all modern medical chemistry. The fourth lecture attempts to explain acupuncture-moxibustion in terms of modern neurophysiology and neurobiochemistry, while the fifth contrasts typical Chinese attitudes to time and change with those of Judaeo-Christian civilization.

1st edition 1981 134 pages Hardcover

South China in the Twelfth Century
By Chun-shu Chang & Joan Smythe

This is a complete, annotated translation of Ju-Shu chi, written by Lu Yu (1125-1210) during his travels from Shan-yin to K'uei-chou.

A distinguished poet, essayist, scholar, statesman, as well as an ardent patriot, Lu Yu was a perceptive and critical observer of his time and its pressing problems. His diary provides valuable information on the political and military structure, economic development, population growth and urban changes, social customs, religious life, communication and transportation networks, popular festivals, and general living conditions of the Southern Sung Dynasty.

1st edition 1981 232 pages Hardcover

V. K. Wellington Koo: A Case Study of China's Diplomat and Diplomacy of Nationalism 1912-1966
By Paochin Chu

This book constitutes the first comprehensive and scholarly study of the life and outstanding achievements of V. K. Wellington Koo, the most brilliant statesman the Republic of China has ever produced.

It is the product of a decade's research in official archives, private collections, newspapers, books, monographs, and periodicals published in China and Western countries. A unique source of material is the many interviews granted to the author by Koo, supplemented by letters between the two.

1st edition 1981 211 pages Hardcover

Journal and Magazine

The Journal of The Institute of Chinese Studies of The Chinese University of Hong Kong, Vol. XII

The Journal, devoted to the studies of Chinese culture, is published yearly. The current issue carries sixteen articles and book reviews with a total of 362 pages.

Renditions, No. 14 & 15

Renditions is the Chinese-English Translation Magazine published semiannually by the Translation Division of the Comparative Literature and Translation Centre.

Number 14 of Renditions is an issue of varied contents including articles, fiction, poetry, dramas and essays written or translated by leading scholars, whereas Number 15 is a special issue on Chinese History and Historiography.

Registrar
Professor Cheng Te-K’un

Professor Cheng Te-K’un was invited to serve as Visiting Professor of Fine Arts of the University on his retirement from Cambridge in 1974. He was elected Dean of the Faculty of Arts for a term of two years (1975-1977), and was subsequently appointed Pro-Vice-Chancellor, an office that he held until he retired from the University in 1979.

Professor Cheng is a world-renowned Chinese archaeologist. He received his education at Yenching University, Harvard University, and Cambridge University. As early as 1941, at the young age of 34, he was offered the Curatorship of Museum, West China Union University. He is the author of numerous books and articles on Chinese archaeology, art and culture which won him international acclaim. He has a life-long association with higher education and has worked in universities in many parts of the world. The conferment on him by Cambridge University of the title of Emeritus Reader in Chinese Archaeology upon his retirement was a mark of recognition of the quality of his achievement and scholarship.

To the University Professor Cheng brought not only scholarship but also professional and administrative contributions. As the University’s first Professor of Fine Arts, he developed and strengthened the programme of studies of the Fine Arts Department, which later became the first centre of its kind in Hong Kong for the teaching of and research on Chinese Art and Archaeology. But his activities at the University went beyond teaching and research. During his terms as Dean of Arts and Pro-Vice-Chancellor, he had made significant contributions to the academic and administrative development of the University and the reorganization of the University in 1976 in particular. In recognition of his distinguished service, the University conferred upon him in 1981 the degree of Doctor of Literature, honoris causa.

Upon his retirement from the University at the age of 72 in 1979, he continued to serve as Honorary Director of the Centre for Chinese Archaeology and Art and he agreed to take up the directorship of the Institute of Chinese Studies on an honorary basis in 1981 while the search for a permanent Director was being launched. His association with the University has therefore continued even after retirement and he was awarded the title of Emeritus Professor this October by the University.

Professor Jao Tsung-i

Professor Jao Tsung-i was Reader (1973-1974) and Professor (1974-1978) of Chinese at the University and Head of the Department of Chinese Language and Literature (since 1976). After his retirement from the University in 1978, he has remained an Honorary Senior Research Fellow (since 1979) at the University’s Institute of Chinese Studies.

Professor Jao was raised and educated in a scholarly family in China following the most rigorous form of academic tutoring. The publication of his “Bibliographical Notes of Chao Chow” in the Journal of Lingnan University at the age of twenty was one of his earliest academic achievements. He was appointed by the Zhongshan University as an editor of the “Kwang-tung T’ung-Chih” for three years and subsequently taught at various institutions of higher education in China. From 1952 to 1968 Professor Jao served on the staff of the Department of Chinese at
Professor Cheng Te-k'un

Professor Jao Tsung-i

Professor Godwin Chu

Professor David Davies

the University of Hong Kong and was Reader in Chinese at the time of his departure from that institution. He was awarded the degree of Doctor of Literature, *honoris causa*, by the University of Hong Kong in 1982. Professor Jao was the Chair Professor of Chinese Studies and Head of the Department of Chinese Studies at the University of Singapore (1968-1973), with short spans at Yale University as Visiting Professor (1970-1971) and at the Academia Sinica (Taipei) as Visiting Fellow. In 1973 Professor Jao was invited to serve as Reader and then Professor of Chinese at this University, thus beginning his long and fruitful association with the University. He has also been a Life Member of the Bhandarkar Oriental Research Institute in India (since 1962) and Attache to the Centre National de la Recherche Scientifique in France (1965).

Although a scholar within the main stream of traditional Chinese scholarship, Professor Jao is nevertheless also at home with the methods and fruits of modern Sinology, and has gained international renown for his work ranging over many areas of Chinese Studies. His association with the University has continued through his research and publication activities at the Institute of Chinese Studies, and he has now also kindly agreed to serve as Honorary Professor in Fine Arts starting with this academic year. Professor Jao was awarded the title of Emeritus Professor this October by the University.

Professor Godwin Chu

He is too young to be the first Chinese to have obtained a doctoral degree in Social Science, but he is certainly the first Chinese to have earned a Ph.D. in Communication. Like his mentor, Dr. Wilbur Schramm, one of the founding fathers of communication studies, he is a scholar who takes great pride and joy in advancing the boundaries of knowledge. For the past two decades, he has delved into the principles of communication and persuasion, gauged the impacts of media technologies, assessed the use of media for education, contemplated the construction of communication policies, and devoted himself to the use of communications for change.

Professor Godwin Chu certainly does more than talking about research. To exhaust his publications will exhaust the compiler. *The Roles of Tatsepa in the Cultural Revolution: A Structural-functional Analysis; Radical Change through Communication in Mao's China; Popular Media in China: Shaping New Cultural Patterns; Communication for Group Transformation in Development; China's New Social Fabric* are among the many widely acclaimed titles in which he has put his insights.
No stranger to The Chinese University, Professor Chu has in the past seven years served as External Examiner of the Department of Journalism and Communication, helped launch the graduate programme in communication, and visited the Department a couple of times. Colleagues and students have long been acquainted with his research and teaching. Joining the University is but a formalization and continuation of this congenial relationship. Whether at Stanford University, the University of Victoria, Southern Illinois University, or the East-West Communication Institute, he has impressed his students and colleagues by hard work and soft talk. He does not come to his office at seven o'clock in the morning, nor does he leave at seven in the evening. But through the magic coordination of his brain and fingers, many a research project has been launched and completed. And there is every indication that this tradition will be continued at the University.

In spite of his heavy load of duties, Professor Chu still finds time to excel in swimming and playing ping-pong. A dip in the pool in the afternoon and a swim at the table in the evening are his favorite pastimes. On top of all these, he is very much at home with the graceful tai-chi chuan. Exercise has made him look much younger than his age. To the envy of many, he maintains a slim and healthy body.

Other than his academic achievements, Professor Chu has a wife who excels in opera singing, a daughter who prospers in business, and another daughter and a son who major in medicine.

— Leonard L. Chu

Professor Arthur Li

Professor Arthur K. C. Li is a product of Hong Kong and a member of a distinguished family. Having graduated from St. Paul’s Co-educational College, he went to England for further studies and was admitted to King’s College, Cambridge to read medicine. However, the course he took at that time was Natural Sciences Tripos; hence though he specialized in Pathology in Part II of the course, he was awarded the Bachelor of Arts degree. He completed his clinical studies at the Middlesex Hospital, London and graduated in 1969 with M.B., B.Chir. (Hons.).

After house appointments at Addenbrook’s Hospital, Cambridge and Middlesex Hospital, London, Professor Li underwent rotational surgical training and obtained his F.R.C.S. in 1973. He then worked at St. Mary’s Hospital, London, and was subsequently appointed Senior Surgical Registrar and Lecturer in Surgery at the Royal Free Hospital, London. In 1977, Professor Li was lured to cross the Atlantic by the award of a Stanley Thomas Johnson Foundation Research Fellowship at Harvard University, Boston, U.S.A.; and subsequently worked as a Clinical Fellow at the Massachusetts General Hospital, Boston. In 1979 he was appointed onto the surgical staff of Harvard University and Massachusetts General Hospital. By 1980 Professor Li’s wanderlust led him back from the New World to Old England and he was appointed Consultant Surgeon and Senior Lecturer in Surgery at the Royal Free Hospital, London.

Professor Li is a general surgeon with particular interest in hepatobiliary, pancreatic, colonic and vascular surgery. His research interests have centred on growth and nutrition in low birth weight infants, for which he was awarded an M.D. in 1976. Since then, he joined the University of Leicester as Senior Lecturer in Child Health, where he played a major role in building up a neonatal unit at the Leicester Royal Infirmary Maternity Hospital. His research interests have centred on growth and development, nutrition and neonatology. In 1978, he was recognized by the British Paediatric Association as an international expert on growth by awarding him the Guthrie Medal, which is given to “the most outstanding research worker in Paediatrics who is less than 35 years of age”. He obtained his F.R.C.P. in 1980.

Professor Davies, also a musician specializing in the piano, has a family of four, consisting of a wife and two children.

Rupert Chan

Professor David Davies

Professor David Davies started his studies in Medicine at the University of Wales in Cardiff in 1960 and collected an intercalated B.Sc. Degree in Human Anatomy with Honours in 1963. He then proceeded to clinical studies at the Welsh National School of Medicine until he graduated as an M.B., B.Ch. in 1966 with distinctions in Medicine and Surgery. After appointments in Wales (Cardiff Royal Infirmary, Cardiff Maternity Hospital, and Llandough Hospital), Oxford (Churchill Hospital), Bristol (Southmead Hospital), and London (Hospital for Sick Children), acquiring in the meantime his D. Obst. R.C.O.G. (1968), M.R.C.P. (1970) and D.C.H. (1971), he returned to his alma mater in 1972 to serve as Lecturer in Child Health. In addition to teaching duties and clinical work as Senior Registrar, he managed to undertake vigorous research in growth and nutrition in low birth weight infants, for which he was awarded an M.D. in 1976. Since then, he joined the University of Leicester as Senior Lecturer in Child Health, where he played a major role in building up a neonatal unit at the Leicester Royal Infirmary Maternity Hospital. His research interests have centred on growth and development, nutrition and neonatology. In 1978, he was recognized by the British Paediatric Association as an international expert on growth by awarding him the Guthrie Medal, which is given to “the most outstanding research worker in Paediatrics who is less than 35 years of age”. He obtained his F.R.C.P. in 1980.

His research interests have centred on growth and development, nutrition and neonatology. In 1978, he was recognized by the British Paediatric Association as an international expert on growth by awarding him the Guthrie Medal, which is given to "the most outstanding research worker in Paediatrics who is less than 35 years of age". He obtained his F.R.C.P. in 1980.

Professor Davies, also a musician specializing in the piano, has a family of four, consisting of a wife and two children.

Rupert Chan

Professor Arthur Li

Professor Arthur K. C. Li is a 'product' of Hong Kong and a member of a distinguished family. Having graduated from St. Paul's Co-educational College, he went to England for further studies and was admitted to King's College, Cambridge to read medicine. However, the course he took at that time was Natural Sciences Tripos; hence though he specialized in Pathology in Part II of the course, he was awarded the Bachelor of Arts degree. He completed his clinical studies at the Middlesex Hospital, London and graduated in 1969 with M.B., B.Chir. (Hons.).

After house appointments at Addenbrook’s Hospital, Cambridge and Middlesex Hospital, London, Professor Li underwent rotational surgical training and obtained his F.R.C.S. in 1973. He then worked at St. Mary’s Hospital, London, and was subsequently appointed Senior Surgical Registrar and Lecturer in Surgery at the Royal Free Hospital, London. In 1977, Professor Li was lured to cross the Atlantic by the award of a Stanley Thomas Johnson Foundation Research Fellowship at Harvard University, Boston, U.S.A.; and subsequently worked as a Clinical Fellow at the Massachusetts General Hospital, Boston. In 1979 he was appointed onto the surgical staff of Harvard University and Massachusetts General Hospital. By 1980 Professor Li's wanderlust led him back from the New World to Old England and he was appointed Consultant Surgeon and Senior Lecturer in Surgery at the Royal Free Hospital, London.

Professor Li is a general surgeon with particular interest in hepatobiliary, pancreatic, colonic and vascular surgery. His research interests have centred on growth and nutrition in low birth weight infants, for which he was awarded an M.D. in 1976. Since then, he joined the University of Leicester as Senior Lecturer in Child Health, where he played a major role in building up a neonatal unit at the Leicester Royal Infirmary Maternity Hospital. His research interests have centred on growth and development, nutrition and neonatology. In 1978, he was recognized by the British Paediatric Association as an international expert on growth by awarding him the Guthrie Medal, which is given to "the most outstanding research worker in Paediatrics who is less than 35 years of age". He obtained his F.R.C.P. in 1980.

By 1980 Professor Li's wanderlust led him back from the New World to Old England and he was appointed Consultant Surgeon and Senior Lecturer in Surgery at the Royal Free Hospital, London.

Professor Li is a general surgeon with particular interest in hepatobiliary, pancreatic, colonic and vascular surgery. His research interests have centred
on cellular destruction and cellular proliferation. He has been trying for years to understand why wounds heal and for that effort he was awarded the 1980 European Society for Surgical Research Prize. Although a surgeon, his work on growth factors earned him his M.D. degree from Cambridge University in 1981. Moreover, his elucidation on cellular proliferation in the gastrointestinal tract won him the 1982 Moynihan Medal awarded by the Association of Surgeons of Great Britain and Ireland.

Dr. Y. W. Lam

Born and educated in Hong Kong, Dr. Yat-wah Lam graduated from the Hong Kong Technical College (now the Hong Kong Polytechnic) in telecommunications in 1950. After gaining practical experience, he left for England to study Physics, Electrical Engineering and Electronics in the Universities of London, Birmingham and Manchester. He started his academic career as a Research Fellow in 1963, followed by appointment to lectureship in Electrical Engineering at Birmingham University in 1965 and to the prestigious Mullard Research Fellowship at UMIST during 1969-71. Thereafter he returned to Hong Kong to join the then newly established Electronics Department of the University as a Lecturer, and was promoted to Reader in 1979.

Dr. Lam has put a great deal of effort into building up the young Department of Electronics: in particular it was largely due to his initiative and effort that the innovative and successful five-year ‘sandwich course’, which incorporates one and a half years of working experience into the regular four-year University course in Electronics, was established. He has also been very active in the research of solid-state electronics, and has done considerable pioneering work on the electronic properties of metal-oxide-semiconductor (MIS) structures and of MIS applications to solar cells. In recognition of his research and professional contributions, he was elected to Fellowship by both the Institution of Electrical Engineers (UK) and the Institute of Physics (UK).

Dr. Lam is well known for his academic leadership and administrative abilities. He served as Head of the Department of Electronics in 1974-77 and the first Director of the University Office of Student Affairs in 1978-79, and also acted on many occasions as Head of United College, of which he has been a founding Fellow and a very active member. He also sits on numerous committees of the College and the University and of outside bodies, including the Electronics Industry Training Board of the Hong Kong Training Council and the Hong Kong Methodist Church Synod. His recent election to the Deanship of the Science Faculty for the three year period 1982-85 is therefore well expected, and reflects the high regard with which he is being held among his academic peers.

Apart from being a serious scholar and an excellent teacher, Dr. Lam is also a courteous, friendly person with diverse interests. He plays badminton, occasionally makes his own wine, and being a devout Christian, never misses his choir singing. He is completely devoted to his family of four, although both children have now left for universities in the United Kingdom.

—H. H. L. Kwok

Dr. K. P. Fung

Born and educated in Hong Kong, Dr. Kwok-pui Fung was a 1973 graduate of United College. Upon graduation from the Department of Chemistry, he pursued postgraduate studies and conducted research on human
chronic gonadotrophin in 1973-75 under Professor Ma Lin. After obtaining his Master's degree, he furthered his studies in the Department of Microbiology at the University of Hong Kong.

Subsequent to receiving the Ph.D. degree in 1978, he joined this University as Assistant Lecturer in the Department of Biochemistry, and was promoted Lecturer the following year. His lectures on 'Principles of Biochemistry' and 'Clinical Biochemistry' have been highly commended by students and he has made significant contributions to the Department's research on electroacupuncture for drug treatment. Recently he has been awarded a grant by the World Health Foundation (H.K.) to carry out on anti-cancer drug.

Besides teaching and research, Dr. Fung also plays his part in University administration and social service. He has represented the Biochemistry Department on several committees, including the Science Faculty Admission Committee and Working Party on Career Education for Science Students. Last year, he was also elected a member of the Assembly of Fellows of United College. He was Honorary Treasurer of the Hong Kong Biochemistry Association from 1979 to 1981 and is currently Executive Secretary of the Hong Kong Microbiology Society.

Despite his numerous commitments, Dr. Fung is a lover of sports, good at table-tennis and exemplary in general sportsmanship.

Being an amiable and easy-going person, he gets along well with both colleagues and students, and has been a member of the Executive Committee of the United College Staff Association since 1978. His deep sense of belonging to his alma mater is evident in his serving on the committee of the United Alumni Association and in his ardent efforts in promoting alumni-College relationship. As an 'insider' who has gone through the path of university life, he has a good understanding of students' feelings, and is undoubtedly the right person for the post of Dean of Students at United College.

— C. Y. Lee

Mr. William H.C. Wan

His name - William Wan, or Bill, as he is affectionately known among colleagues - has been virtually synonymous with student welfare and activities from time immemorial. Since 1st September, 1982, Mr. Wan has been given responsibility for promoting goodwill and cooperation between the University and its alumni, many of whom have benefited from his counsel and support in one way or another.

The man who has done so much for students of the University was himself a graduate of one of the University’s foundation Colleges, namely, Chung Chi. Graduating in 1959, Mr. Wan first worked as a youth worker, and then joined the Hong Kong Housing Authority. Before returning in 1969 to serve his alma mater, he had earned an M.A. degree specializing in student personnel administration in higher education at Columbia University. Upon his return, he served as Manager of the then newly completed Benjamin Franklin Centre, and soon afterwards was appointed Assistant Registrar (Student Affairs), a title which was changed to Assistant Secretary (Student Affairs) in 1973, following the establishment of the Secretariat. When the University established its independent Office of Student Affairs in 1978, Mr. Wan was retitled Deputy Director (Student Affairs).

Mr. Wan takes much pride in having helped to bring into being two university-wide associations. It was under his guidance and with his assistance that The Chinese University of Hong Kong Student Union was set up in March 1971. A few years later, he was again enthusiastically involved in the planning of The Federation of Alumni Associations, The Chinese University of Hong Kong, which was formally inaugurated in September 1979. The Federation plays an important role in fostering the sense of belonging among alumni on the one hand and strengthening ties between the College Alumni Associations on the other. Since his new appointment as Alumni Affairs Officer, Mr. Wan has lost no time in liaising with various alumni groups and helping them to recruit new members and organize numerous functions.

Mr. Wan has rendered outstanding services to the community, notwithstanding his heavy work load in the University. Among other things, he sits on the Antiquities Advisory Board and the Country Parks Board. He is also an unofficial member of Sai Kung District Board.

His better half, Grace, is an eminent social worker and civic leader, who made the list of Outstanding Young Persons a few years ago.

PROFILES 35
Gifts & Donations

As a manifestation of their confidence in this University's development, local and overseas individuals and foundations have donated generously to support the University's physical development programme, research projects, publication projects, fellowship and scholarship schemes, etc. The University received the following gifts and donations in the past few months.

Research Projects

(1) From the Trustees of Lingnan University a further grant of US$57,000 to the Programme of Research and Teaching on the Chinese Society conducted by the Department of Sociology and the Social Research Centre.

(2) From the following person/organization donations to the Chinese Medicinal Material Research Fund:
   (a) Mr. W. C. Lin a donation of HK$100,000.
   (b) The D. H. Chen Foundation a donation of HK$50,000.

(3) From the Incorporated Trustees of Hsin Chong-K. N. Godfrey Yeh Education Fund a donation of approximately HK$80,000 for research projects for the summer 1982 and the academic year 1982/83.

(4) From the Hong Kong Government a donation of HK$50,000 to the Public Affairs Research Centre for carrying out a research project on the needs and aspirations of the Kowloon City residents on community building aspects.

(5) From the Bei Shan Tang Foundation a donation of HK$30,000 in support of a Part-time Research Assistant of the Centre for Chinese Archaeology & Art for the period from 1st August, 1982 to 31st July, 1983.

(6) From the Research Team on Hong Kong Dragon Boat Festival of Sophia University, Japan, a donation of HK$21,877.02 in support of the research project on the Study of Traditional Cultures of Cantonese, Hakka, Hoklo and Chao-chow in Hong Kong.

(7) From Mr. Liu Ching-leung, the First Vice-Chairman of the New Territories Heung Yee Kuk, and other members of the Kuk, a donation of HK$20,000 in support of a research project by Dr. David Faure, Lecturer in History, on the Oral History of Sheung Shui, North District.

(8) From Sun Ya Publications (HK) Ltd. a grant of HK$20,000 in support of a research project on Chinese vocabulary of primary school pupils to be undertaken by Dr. P. K. Siu, Senior Lecturer in Education.

(9) From the University of Western Ontario a grant of HK$12,000 in support of the research project on Solid-state Physics by Professor B. Y. Tong.

(10) From Professor John F. Jones a grant of HK$2,000 to the Social Work Departmental Research Fund.

(11) From Mr. Liu Yun Sum and others a donation of HK$1,000 for the Oral History Project.

Publication Project

(12) From the Hong Kong and Shanghai Banking Corporation a donation of HK$30,000 to finance the publication of the second edition of Graduate Careers Handbook.

Fellowships & Scholarships

(13) From Mrs. Ko Wong Shun-yin a donation of HK$30,000, in memory of her late husband Mr. Ko Hung, to set up an endowment fund.
The interest accruing from such fund will be used for establishing several scholarships for students who have written good pieces of Chinese writing, especially those that have been published in newspapers or periodicals.

(14) From the Incorporated Trustees of Hsin Chong-K. N. Godfrey Yeh Education Fund a donation of HK$20,000 for ten bursaries for the academic year 1982/83.

(15) From The Hong Kong Computer Society a fund of HK$10,000, the annual income from which will be used to provide one scholarship of HK$1,000 each year to a student studying computer science with effect from 1983/84 onwards.

(16) From the Du Pont Asia Pacific Limited a donation of two scholarships of HK$2,500 each to be awarded to two third-year students of the Science Faculty who score the best academic results in the final examination during the academic year 1981/82.

(17) From The Caterpillar Far East Limited an annual donation of a scholarship of HK$2,000 to a student of the Faculty of Business Administration with effect from 1982/83.

(18) From Mrs. Judy T. Chan an annual donation of a prize of HK$500 to a student of the School of Education who has written a good research paper as recommended by the School.

(19) From the respective donors increases in the following scholarships:
   (a) Exxon Chemical Asia Pacific Limited Scholarship from one to two of HK$8,000 each in the academic year 1982/83.
   (b) Sing Tao Scholarships from HK$1,500 to HK$2,500 each in the academic year 1982/83.
   (c) South China Morning Post Scholarships from HK$1,500 to HK$2,500 each in the academic year 1982/83.
   (d) Wah Kiu Yat Po Scholarships from HK$1,800 to HK$2,500 each in the academic year 1982/83.

Miscellaneous

(20) From Mrs. Siu Lien Ling Wong, Trustee of Chung Chi College, a donation of HK$500,000 as an endowment fund for the setting up of the “Chung Chi College Siu Lien Ling Wong Visiting Fellows Programme”.

(21) From the Hong Kong Government a grant of HK$120,000 for academic exchange programmes with China.

(22) From the Asia Foundation a grant of US$13,575 for services provided by the University for the 1982/83 Luce Scholars Orientation Programme.

(23) From the Hang Seng Bank Limited a donation of HK$70,000: HK$50,000 for unspecified purpose at the Vice-Chancellor’s discretion, and HK$20,000 in support of students’ extracurricular activities at the University for the academic year 1982/83.

(24) From the Social Welfare Department a grant of HK$28,100 for expenses of the study tour to Singapore organized by the Department of Social Work.

(25) From the Chou’s Foundation a donation of HK$20,000 for the Student Campus Work Scheme 1982/83.

(26) From the Social Welfare Department a grant of HK$8,733 in support of the visit of Professor C. David Hollister, an External Examiner for the Postgraduate Social Work Programme.

(27) From the Urban Council a grant of HK$7,800 in support of the 25th Anniversary Commemorative Art Exhibition held by the Department of Fine Arts.

(28) From the IBM Singapore Pte. Ltd. a donation of HK$1,000 in support of the 1982 International Summer School on Optoelectronics.

Antique

(29) From the Bei Shan Tang Foundation a donation of HK$7,000 for part payment for the purchase of a Song covered box in Yingqing glaze, Jiangxi ware.
