Address all Correspondence to Publications Section, University Secretariat,
The Chinese University of Hong Kong, Shatin, N.T., Hong Kong
The University held its thirty-eighth congregation for the conferment of honorary and higher degrees on 12th October, 1989 at the Sir Run Run Shaw Hall. Over 1,000 graduates, parents and guests attended the ceremony, at which His Excellency the Governor and Chancellor of the University, Sir David Wilson, officiated.

Four eminent persons were awarded honorary doctorates by the University. The degree of Doctor of Laws, *honoris causa*, was conferred on the Rt. Hon. Lord Butterfield of Stechford, Dr. Harry Fang Sin-yang and the Hon. Maria Tam Wai-chu; and the degree of Doctor of Science, *honoris causa*, on Professor Lee Yuan-Tseh. Citations for the honorary graduates were written and delivered by Dr. Byron Weng, reader in government and public administration of the University. Professor Lee Yuan-Tseh addressed the assembly on behalf of the honorary graduates.

The congregation also saw the award of higher degrees to 238 graduates, including nine Doctors of Philosophy, 87 Masters of Philosophy, 14 Masters of Arts, 26 Masters of Arts (Education), two Masters of Science, and 100 Masters of Business Administration.
The Rt. Hon. Lord Butterfield of Stechford is an eminent British scientist and educator. For forty years, he devoted himself to medicine and education, making indelible marks in both Great Britain and Hong Kong.

Born in 1920, Lord Butterfield was educated at Solihull School and attended Exeter College, Oxford University. Medicine was his professional goal but he was also an outstanding athlete. He represented Oxford in the 1940-41 Rugby game against Cambridge, was captain of the hockey team from 1940 to 1942 and of the cricket team in 1942. After college, he earned a fine military service record. He was a Major in the Royal Army Medical Corps, Army Operational Research Group from 1947 to 1950.

As a medical scientist, Lord Butterfield holds MD degrees from both Johns Hopkins and Cambridge Universities and a DM degree from Oxford (Exeter College). From 1958 to 1971, he was professor of medicine at Guy’s Hospital and Medical School. He is the author of several books and more than 100 articles on such topics as burns, diabetes, tolbutamide, priorities in medicine, and choice of treatment. Both Oxford (1960-66) and Cambridge (1967-75) Universities invited him to serve as their examiner in medicine, and both Yale and Harvard Universities welcomed him as visiting professor.

As an educator, Lord Butterfield has served as vice-chancellor of Nottingham University (1971-75), master of Downing College, Cambridge (1978-87) and vice-chancellor of Cambridge University (1983-85). Both the British University Grants Committee (1966-71) and the Hong Kong University and Polytechnic Grants Committee (UPGC) (1975-83) have benefited from his services. He was of course the chairman of the Medical Sub-Committee of the UPGC which planned and launched our medical school. To meet the urgency of the planning, he introduced the procedure of circulating the chairman’s briefing notes to all members of the committee, to speed up decisions.

Lord Butterfield has led the work of many national and international medical boards, committees and councils. A noted authority on diabetes, he served as chairman of the Bedford Diabetic Survey (1962), chairman of the British Diabetic Association (1967-74) and vice-president of the Council of the European Association for the Study of Diabetes (1968-1971). Since 1964 he has been consultant to WHO Expert Committee on Diabetes. Foundations and Trusts have enlisted his help in their work. He is currently the chairman of the Jardine Educational Trust, the Health Promotion Research Trust, and the Croucher Foundation, and a trustee of the GB-Sasakawa Foundation, among others.

Not surprisingly, Lord Butterfield has received many honours and awards. Nottingham University, UK; Keio University, Japan; and Florida International University, USA; have conferred honorary degrees upon him. He was awarded an OBE in 1953, knighthed in 1978 and made Baron Butterfield of Stechford in 1988.

For his distinguished service to medicine and tertiary education in Great Britain and in Hong Kong, I present, Mr. Chancellor, Lord Butterfield for the award of the degree of Doctor of Laws, honoris causa.
Dr. Harry Fang Sin-yang, CBE, MBBS, MCh(Orth), LLD(Hon), FRCSE, FACS, FRACS, JP

Dr. Harry Fang Sin-yang, I trust, is a very happy man. It is said helping others is a source of happiness and this eminent orthopaedic surgeon has dedicated himself to helping the handicapped with his scalpel and with community leadership.

Born in 1923 in Nanjing, China, Dr. Fang came to Hong Kong to study at King’s College in 1937 and entered the University of Hong Kong at the age of seventeen. During World War II, he served in the field ambulance core in defence of Hong Kong and for his valour he was awarded the Defence Medal after the War (1948). In 1949, he received an MB BS degree from the University of Hong Kong and began his career as an assistant lecturer of general surgery. Three years later, a Sino-British Fellowship Trust Scholarship took him to the University of Liverpool where he wrote a dissertation on the cervical-spine and earned an MCh(Orth) degree. He returned to the University of Hong Kong in 1956 as a lecturer in orthopaedic surgery. In 1958, he joined the Hong Kong Government as an orthopaedic specialist and later served several hospitals as consultant orthopaedic surgeon. By 1964, he had become a leader in the medical community. He was president of the British Medical Association Hong Kong Branch (1964-65) and president of the Hong Kong Medical Association (1966-67).

Since the later 1960s, Dr. Fang has devoted himself to improving rehabilitation services for people with physical and mental handicaps. He has been instrumental in the rapid expansion of such services in sports and recreation and other new areas. His appointment to Hong Kong’s Legislative Council (1974-85) and Executive Council (1978-83) was no doubt the happiest of news for the disabled.

During his thirty years of public service, Dr. Fang has served on numerous committees at home and abroad. He was president of Rehabilitation International from 1980 to 1984. From 1979 to 1985, he served this University as a member of its Council. For over ten years, he has been the chairman of two key government committees, namely, the Medical Development Advisory Committee and the Rehabilitation Development Coordinating Committee. He is also a Steward of the Royal Hong Kong Jockey Club and honorary president of the Hong Kong Sports Association for the Mentally Handicapped, among others.

Indeed, Hong Kong is a healthier and happier community because of Dr. Fang’s tireless efforts and able leadership. He has shown us that, in one way or another, we are all handicapped, but, with just a little help, most of us can lead normal and productive lives. To help others is really to help ourselves. In recognition of his services to medical education and his compassion as a social worker par excellence, his alma mater honoured him with a Doctor of Laws degree in 1977. In 1981, he was nominated Man of the Year in the United Kingdom and named Citizen of the Year in Hong Kong. He was appointed a Justice of the Peace in 1964 and the Queen bestowed upon him the OBE in 1966 and the CBE in 1985.

For his achievements as an eminent surgeon and his significant contribution to rehabilitation services in Hong Kong and beyond, I present, Mr. Chancellor, Dr. Harry Fang Sin-yang for the award of the degree of Doctor of Laws, honoris causa.
The name Maria Tam Wai-chu is known to most, if not every, resident adult in Hong Kong. The daughter of a police sergeant, she rose rapidly to be a powerful figure in local politics through devotion, hard work and outstanding service.

Born in Hong Kong, Miss Tam graduated from St. Paul’s Co-educational College and completed her law studies at the University of London with honours. Called to the bar at Gray’s Inn, she began her career as a barrister in England.

In her youth, Maria Tam was a student leader and an adventurous traveller. At St. Paul’s, she was head prefect and school mixed choir chairman. While in London, she spent her summers working in factories. She walked, camped and rode long-distance buses through Europe, Central Asia and North America. Thus, when she decided to return to serve her own people, she was already a well-travelled Hong Kong belonger.

Miss Tam’s unusual ability and her dedication to the service of grass roots citizens soon propelled her into political prominence. In 1979, she was elected to the Urban Council. In 1981, she was appointed to the Legislative Council and two years later, to the Executive Council as well.

Few individuals have given more of themselves to public service than Miss Tam. She is not a director of any corporation, but, she has served with distinction on many government councils, bodies, committees and civic associations. Among Hong Kong’s many councillors, she alone has been a member at all four levels of representative councils. She is a founding leader of at least three Hong Kong organizations: the Federation of Women Lawyers, the Junior Police Officers Association and the influential Progressive Hong Kong Society. Many of Hong Kong’s public bodies and community organizations have benefited from her service. They include the Housing Authority Operation Committee, the Transport Advisory Committee, the Board of Education, the Boys’ and Girls’ Clubs Association, the Association of Business and Professional Women, the Newspapers Association, and many others. The Chinese University is fortunate to have had Miss Tam on its Council and the Terms of Service Committee since 1982. The University’s Student Union also has the benefit of her service as a legal adviser. Her significant achievements over the years have been recognized when she was named one of the Ten Outstanding Young Persons of 1982, and made a JP in 1982, and awarded the OBE in 1985 and CBE in 1988.

At present, Miss Tam is a member of Hong Kong’s Executive Council and Legislative Council, as well as a member of the HKSAR Basic Law Drafting Committee. Miss Tam often puts herself in the eye of a political typhoon. With courage, conviction and endless energy, she tackles difficult, sometimes thankless jobs. Her instrumental role in the adoption of the ‘Lowu Through Train’ formula for the first government of the future Hong Kong Special Administrative Region earlier this year is only one example of her drive and successes.

For her outstanding service and achievements, I present, Mr. Chancellor, Miss Maria Tam Wai-chu for the award of the degree of Doctor of Laws, honoris causa.
Professor Yuan-Tseh Lee, BS, MS, PhD, DSc(Hon)

Professor Yuan-Tseh Lee is a distinguished scientist who developed ways of bringing many types of chemical reactions within range of study by means of crossed molecular beams. Thanks to his research, the world can now see more clearly the dynamics of the elementary chemical process. An admirer of Madame Curie, Professor Lee tells his students to ‘Take hold of your own destiny and give yourself to science.’ That is precisely what he exemplifies, with outstanding success. In 1986, he was, together with Dudley Herschbach and John Polanyi, awarded the Nobel Prize for chemistry.

The third of eight children, Professor Lee was born in 1936 in Hsinchu, Taiwan. His father is an artist and his mother a teacher. His fine family inculcated in him the habit of hard work, the measured judgment of a good artist and an independent but modest personality. It is not accidental that four of the eight Lee children received PhD degrees. At various stages in his school years, Professor Lee was a trombone player as well as a member of his school’s baseball, ping-pong, and tennis teams. His love for baseball remains with him to this day. He still plays games with his students. To him, there are theories of chemical reactions to be learned at the moment of bat-ball impact.

In 1955, Professor Lee was admitted to the National Taiwan University as a meritorious student. As well as his excellent performance in chemistry, he took an active part in extracurricular activities. After graduation in 1959, he went on to National Tsinghua University and received his MS degree. He pursued his PhD at the University of California, Berkeley, under Professor Bruce Mahan. In 1967-68, he was a postdoctoral fellow at Harvard, where he worked with Professor Herschbach’s group on the first successful non-alkali metallic molecular beam experiment. For six years afterwards, he taught at the University of Chicago before he was drawn back to Berkeley in 1974. He is currently professor of chemistry and principal investigator at the Lawrence Berkeley Laboratory, University of California, Berkeley. He has published more than 200 scientific reports and articles.

Fondly dubbed ‘the Mozart in physics and chemistry’ by Herschbach, Professor Lee is a man of extraordinary talent. Yet, he works a sixteen-hour day, going to bed in the small hours day after day. His daughter once mistook him for a guest who came to dinner now and then. It is remarkable that Professor Lee is still able to give a part of himself to the advancement of science and education in mainland China, Taiwan and Hong Kong. As early as 1974, he served our University as external examiner and offered much valued advice.

Over the past two decades, Professor Lee has received many fellowships and awards, including the National Medal of Science from the White House, the Peter Debye Award for Physical Chemistry and the Ernest O. Lawrence Award of the US Department of Energy. Numerous universities, including Columbia, Johns Hopkins, Chicago, Princeton, and Harvard, have invited him to hold distinguished lectureships. He has been elected a member or fellow of such prestigious institutions as the National Academy of Sciences, USA, the Academia Sinica in Taipei, and the Gottingen Academy of Sciences, West Germany. At least eight leading universities in China have made him their honorary professor. The University of Waterloo, Canada and the Chinese Academy of Sciences have conferred upon him honorary Doctor of Science degrees.

In recognition of his signal scholarship and outstanding contribution as an educator, I present, Mr. Chancellor, Professor Yuan-Tseh Lee for the award of the degree of Doctor of Science, honoris causa.
Address by Professor Yuan-Tseh Lee

THE FUTURE ON HUMANITY
IN A PERSPECTIVE OF
THE CHANGES OVER THE CENTURY

Mr. Chancellor, Mr. Vice-Chancellor, distinguished guests and friends, ladies and gentlemen:

First of all, on behalf of the honorary graduates today, I would like to express our heart-felt thanks to The Chinese University. Although I have never stayed for any long periods of time in Hong Kong, I have enjoyed many sojourns in this city and, on such occasions, become acquainted with people from all walks of life who care for Hong Kong. Thus, little by little, I have ceased to find myself a stranger in this place. Every time I visit this sensitive and beautiful international metropolis, I become all the more impressed by the marks left by ‘the changes of the times and social vicissitudes’. I would like to take the opportunity today to voice some of my personal views on ‘The Future of Humanity in a Perspective of the Changes over the Century’.

The twentieth century is often regarded as the beginning of the era of the common people. During the past ninety years, we have witnessed countless revolutions and wars of independence, on major or lesser scales, in various parts of the world; and we have experienced two world wars. While the social status of the man in the street has risen considerably in many parts of the world, we are also mindful of the long hard struggle ahead in many other countries and regions to give reality to the wish of the people to become their own masters and to raise their standard of living.

Now towards the turn of the century and looking back on the various changes that have taken place in it, we find nothing more striking than the rapid advancement of science and technology and its profound influence on our life. Owing to highly developed transportation and the advancement of communications, our globe is relatively shrunken, while the influence of the peoples of various countries on each other is sharply increasing. In the past decades, man has not only created more and better high-tech tools and appliances but also, with the rapid dissemination of these results to every corner of the world, accumulated a universal civilization and culture amongst peoples of diverse histories and traditions. Particularly in the past ten years or so, while the gradual internationalization of world economy has not reduced various competitions among nations to any great extent, it has, nevertheless, made us profoundly realize that in the future world, the cooperation and interdependency amongst different nations and peoples will become more important than ever.

Of course, along with the changes of the times, the issues of common human concern have also been changing. Until recently, many people were most worried about a nuclear war breaking out between the two superpowers which would annihilate all that humanity had attained; and there were those who believed that a third world war, an unprecedented catastrophe for mankind, would be inevitable. But now many people perceive that, owing to the fact that Japan and Germany – two nations defeated in World War II and prohibited from rearmament – have gained the lead in economy and in international trade and the fact that the competition in international trade with the backing of high technology has intensified, the two military superpowers have been forced into evaluating anew their arrogant approach to the prevention of war.
by means of arms race. The rapid increase in productivity and the soaring economic developments in various parts of the world have undoubtedly formed a powerful force for peace. When the military superiority and the economic superiority of the superpowers become mutually exclusive, a détente is bound to take place. Then come days of hope for lasting peace on earth.

If we say that the gradually internationalized world economy in our age marks the beginning of a new era in which the international economic competition, step by step, replaces military competition, then we can also expect the internationalization of world economy to promote the internationalization of world politics. Because of the difference in tradition, language, history and culture among different peoples, the boundary between nations may not disappear overnight; but some of the serious problems confronting mankind, problems such as the damage done to the ecosystem and environment of the whole world, the aggravation of the difference in wealth between the developing and the developed nations and the menace brought about by the constant increase in population, are no longer insoluble problems. If we are deeply convinced that the future of humanity is built upon a global system of politics, economics and culture, which calls for the interdependence among all countries and regions of the world, then we shall also find that the world which every one of us faces and the stage on which every one of us lives is indeed the whole earth.

When we confidently speculate upon the future of humanity, we will certainly ask: What will provide a basis for the prosperity and development of every region in such a highly internationalized world? Indisputably, in times when mutual help as well as economic competition and competition in trade occupies a crucial position, this will rely on the relative development of productivity of individual regions. When the productivity, the cultural level and the quality of life of a region are higher than those of other regions, the people of the region can take the lead in human progress and guide the others along. I sincerely hope that in such times of changes, an energetic place like Hong Kong and its people can play an important part for the future of humanity. As long as we educate our younger generation properly so that they really understand science and technology, grasp the laws of nature and social developments and have a mind broad enough to ‘have the whole world in view’, not only will they be able to change Hong Kong into an even better place, but the development of China and the world, too, will enlist their help as those really capable of serving mankind.

I am a scientist and an educator. In the past 20 years, I spent most of the time studying the dynamics of chemical reactions. What I really wanted to understand was how exactly chemical reactions take place when atoms and molecules collide. Because we cannot observe the motion of microscopic atoms and molecules with our naked eye, we have devised an experimental method that is now known as crossed molecular beams technique to obtain experimental results which provide a clear picture of the dynamics of chemical reactions as if we saw it happen. In scientific studies, first of all, we scientists have to accumulate new knowledge little by little so as to further master the laws governing the movements of matter. Although the roles we play on the world stage are nothing overwhelmingly heroic, we know, nevertheless, that what really promotes human progress and actually changes the face of the world is scientific and technological progress. Mankind has indeed accumulated an abundance of knowledge since time immemorial, but this knowledge is far from perfect. After all, what we know is limited. Ahead of us remain many puzzling and fascinating things awaiting our search and discovery. It is my fervent hope that the young students present today can find in their scientific search a beautiful life. In my career as an educator, I have always believed that for promoting and accelerating the progress of a backward region or a developing country, nothing is better than proper education. I am deeply convinced that the modernization of China must be rooted in large-scale investments in education. But the present situation is a cause for concern. During the past ten years, the rate of illiteracy in China has risen and gone back from 10 per cent to 20 per cent, while the people with higher education, people who can contribute to the modernization of society, constitute no more than one per cent of the population. This gravely worries the countless people overseas who feel concerned for the future of China. Investment in education is investment for the future. To raise the educational standard is the first step towards a modern society.

I am glad to have the opportunity today to express my personal views. I truly believe that the future of humanity is bright, provided that we all join forces in a long-term common pursuit. Thank you.

Translated by Dr. Shiu-Pang E. Almberg
An Open Letter from the Vice-Chancellor

Following his first open letter of 8th April, 1989 to all staff and students spelling out the broad objectives and directions of the University for the coming few years, Professor Charles K. Kao, the Vice-Chancellor, issued his second open letter on 19th September on the progress that has been achieved so far. This is the full text of his recent letter:

Since my first open letter in April 1989, much has happened in China that has posed serious questions in the minds of the people of Hong Kong.

What should be the way ahead for The Chinese University of Hong Kong? I submit that the direction we set for ourselves, as outlined in my previous letter, remains the best one. Let me take this opportunity to add some details to the general statements made in my first open letter and to delineate the principal reasons more clearly.

The aims of our policy are:

1. to improve the quality of teaching for the increasing number of undergraduate and postgraduate students and to encourage them to seek and experience a broader education, so that more graduates are well-prepared for many alternative choices.

2. to provide more linkages with the outside world for our staff through joint research and exchange programmes so that the quality of our research opportunities can be compared to an international standard of excellence. This would also help our staff to improve their effectiveness in teaching and research, increase their personal merits and enhance the University’s ability to recruit and retain staff.

Since my first letter, an on-going task has been to review our promotion criteria and procedure to ensure that our colleagues on terms of services A, B and C are given fair rewards and the right incentive to contribute strongly towards achieving our common objectives. The duties of the faculty deans and department chairmen are being realigned to achieve a more responsive management structure. Both these tasks are still proceeding. As to the expansion of our student numbers to 20,000 by 2008, we are awaiting clarification from the University and Polytechnic Grants Committee on our proposed faster expansion over the next decade and beyond. On these items, I shall report further in my next letter.

In this letter, I shall report on the actions that have been taken towards meeting the objectives stated earlier.

A more balanced and flexible curriculum

On the recommendation of a committee chaired by Professor Ambrose King, the University introduced a new credit unit system four years ago and abolished the degree examination system. After this initial period of operation, I have asked Professor King to review the progress to date. He and his small team of Dr. P.W. Liu and Miss Linda Hu worked very hard over the last six months. Much consultation was made with many academic and administrative staff. A report recommending some further improvement on the credit unit system has just been distributed for feedback from the boards of studies. The principal aim is to achieve the flexibility for which the credit unit system is designed. The target is to achieve a balance in academic requirements and work load of the students. Proper guidance for course selections and course examination procedures is necessary. This system will also allow our University to establish joint courses with selected universities around the world, to produce quality graduates at the fastest rate feasible and with cost-effectiveness, to cope with a wider spread of academic attainment and aspirations of incoming students, to offer a greater number of multi-discipline degree programmes, and to maintain a larger number of academic departments. All these elements are designed to enable this University to perform well in the challenging years ahead.
Better coordination of student services

The provision of student services at the University has traditionally been shared by the Office of Student Affairs and the dean of students' office of the colleges. Certain division of labour has evolved over the years. Professor C.Y. Lee has been appointed to the new office of University Dean of Students with effect from 1st August to coordinate the various student related activities. As a University officer, Professor Lee will be able to provide much better liaison between student services and the major policy-making bodies such as the University Council and the Senate. His immediate tasks will include the strengthening of the student service units, namely, the Office of Student Affairs and college dean of students' offices, identifying new service needs generated by the changing curriculum requirements and student participation in Senate affairs, and developing an effective support system in close collaboration with student bodies that enables our students to grow in physical health as well as in intellectual and social capabilities. Mrs. Grace Chow has been appointed Administrative Director of Student Affairs to strengthen the administrative machinery for the student related activities.

Better focused academic staff development

We have taken significant steps towards increasing our research activities. Research enables academic members to contribute to society directly and to grow in knowledge and stature such that he could discharge his primary duty as a teacher with increasing effectiveness and success. However, a word of caution is in order. The practice of teaching must not be short changed by over-committing oneself to research and outside community-related efforts.

We have made summer leave for research somewhat easier and more rational. (This will be substantially rationalized when the new service conditions are implemented.) We have introduced special incentives for developing joint research with centres of excellence at universities around the world. We have established sponsored studentships for PhD candidates. So far funding for three such scholars have been promised and at least ten more are forthcoming. Initially, most of the efforts in raising external funds for research are in the science, engineering, medicine and business administration areas. But the outside funding in these areas would relieve the pressure on internal funding, such that more can be allocated to arts, social science and education where external support seems to be more difficult.

Our staff must be competitive in a worldwide sense. Their research must be of scholarly standard acceptable on the world stage. When occasion permits they must be coupled well with centres of excellence so that their contacts with leaders in their field are direct and ongoing. This situation would lead to better recognition by their peers on an international scene. The price of working at least as hard as their counterparts in the centres of excellence is well worth paying. This University is determined to make the opportunities available to all who would take on this important challenge. It is crucial to the University as well as the academic staff and students.

Institutes for research and development

I am happy to report that we have established the Hong Kong Institute of Biotechnology with a generous donation of HK$170 million from the Royal Hong Kong Jockey Club. The work of this institute has already begun in their temporary accommodation in the Lady Shaw Building. Research and development and pilot production will be undertaken in a range of biotechnology areas specially selected to match Hong Kong’s industrial environment. It is anticipated that the output from this institute will help to spawn a new biotechnology-based industry in Hong Kong. Academic staff from this University and from other tertiary institutions of Hong Kong are urged to be involved with the work at the Hong Kong Institute of Biotechnology. A Hong Kong Centre of Sports Medicine and Sports Science, and an Asia-Pacific Institute of Business incorporating the Management for Executive Development programme (MED) which is in its eleven-year history are being formed.

Internal research units such as the Institute of Chinese Studies, the Institute of Social Studies and the Institute of Science and Technology (including the Chinese Medicinal Material Research Centre) are being strengthened and given greater flexibility in the promotion of good research. They will receive a steady source of funding from the block grant that is earmarked to develop research in areas that all of us regard as distinguished research at this University.

Our effort to increase the quality and quantity of research fortunately coincides with the recognition given by the Government and the community to the growing importance of research to Hong Kong. Hong Kong needs its own research and development infrastructure to support the further expansion and strengthening of its education and industry sectors. The tertiary institutions are part of this infrastructure. The University and Polytechnic Grants Committee is expected to increase the allocation of research funds for the six tertiary institutions and it will be well beyond the sum of HK$120 million earmarked for the current triennium.
Greater flexibility in the administration of terms of service

Concomitant with our efforts of developing external linkages, the rules governing study leave, long leave, outside practice, and a whole range of terms of service related matters must be appropriately adjusted. Over the past few months, several schemes have been designed and approved by the Administrative and Planning Committee as permissible variations to our standard Terms of Service A. New academic and administrative staff can now choose from a range of fixed service length contracts, fractional-time appointment arrangements, to superannuable and tenurable contracts. Within the approved entitlement under the University terms of service, remuneration, long leave and superannuation are more flexibly packaged to suit individual requirements including the conversion of certain fringe benefits into equivalent monetary values to top up their salaries. These arrangements should improve our capability to recruit successfully and to retain existing personnel. Documents will be released shortly to explain the details of the following schemes for immediate implementation:

(a) Year-end cash payment in lieu of part of the long leave entitlements subject to budgetary constraints.
(b) Fractional-time appointment to release regular teaching appointees for a fixed term to devote more time to do worthwhile research and development projects.
(c) Topping-up of salary using private endowment funds to upgrade established teaching or administrative posts for persons with distinctive service or qualifications.

Alignment of the administrative and service units to the tasks at hand

The administrative units have been evolving over the years to support our academic endeavours. Our new thrusts have also generated the needs for new administrative and service support, e.g. better focused staff development programmes and fund-raising programmes to aid research, etc. Some reallocation of administrative staff to these functions are being made and certain defunct activities will be left to phase out naturally. This is an on-going process, but by year-end much of the tasks should largely be completed.

The Secretariat will be consolidated into three distinct sections: Personnel, University Development, Council and General Affairs. Each section will be headed by a director with full administrative responsibility and accountability. They report to the University Secretary. The Personnel Section is responsible for (i) staff development, (ii) recruitment and (iii) compensation and benefits administration. The University Development Section is responsible for externally directed affairs such as industrial and business development. The Council and General Affairs Section is headed by the University Secretary himself and looks after all matters related to the University and general administration. A detailed organization chart will soon be issued by the Secretariat.

The Buildings Office has been coping manfully with a large volume of new building constructions and labour shortage problems, which have been compounded by attrition and recruiting difficulties. In order to cope with these problems, the organizational structure of the Buildings Office has been reviewed. It is expected that by the end of the year a more streamlined unit with improved line of communication will evolve. In addition, in order to relieve the internal load, some new constructions will be contracted to outside architects and project managers.

Computer services on campus include a Computer Services Centre and an Information Management Unit, the former serving both staff and students and the latter the computer needs of the administration. Discussion is on-going to see how these units can play a broader role of coordinating our effort to further computerize the campus. This effort is linked with wiring up the campus for more and better communication facilities. Progress would therefore be by necessity slow, but the task is scheduled to reach an important milestone, hopefully earlier than 1991, when our new PABX is in service.

In conclusion, may I congratulate all staff and students for doing their utmost to be responsible in everything they do. The success of this University relies on all of us. I am glad to welcome our new students and many newcomers, some with very distinguished career records, others with studies just behind them who join us full of hope and energy, and are ready to put their contributions into the effort this University is making for Hong Kong.
**News in Brief**

**Honours for University’s Members**

* The Vice-Chancellor, Professor Charles K. Kao, has been elected a fellow of The Fellowship of Engineering, the United Kingdom (FEng). This is the second important honour Professor Kao has received in 1989. Earlier on he was awarded the Faraday Medal by the Institute of Electrical Engineers.

  Founded in 1976 on the initiative of HRH Prince Philip, The Duke of Edinburgh, and a group of distinguished engineers, the Fellowship is an independent self-governing body of elected professional engineers of all disciplines in UK. The Fellowship also acts as the UK academy of engineers in international affairs and maintains close links with both the Royal Society and the UK Parliament Group for Engineering Development.

* Sir Quo-wei Lee, Chairman of the University Council, was awarded the honorary degree of Doctor of Laws by the Birmingham University in the United Kingdom on 5th July, 1989.

* Dr. Edwin H.C. Tao, Chairman of the New Asia College Board of Trustees, was invited to join the Institution of Engineers of Australia as a fellow of the institution in July 1989.

**Two Made Emeritus Professors**

On the recommendation of the Senate and in accordance with Statute 21 of the University Ordinance, the Council has approved the award of the title of emeritus professor to two retired professors, Professor D.C. Lau and Professor John L. Espy, with effect from 1st August, 1989.

Professor D.C. Lau has been awarded the title of Emeritus Professor of Chinese Language and Literature for his outstanding scholarship and contributions to the field of Chinese studies and Chinese philosophy, and to the University as professor of Chinese language and literature and dean of Faculty of Arts. Professor Lau joined the University in 1978 and retired on 31st July, 1989.

Professor John L. Espy has been awarded the title of Emeritus Professor of International Business for his outstanding scholarship and distinguished services to the promotion of business administration studies at the University as professor of international business, associate director of the Two-Year MBA Programme, and he was instrumental in the founding of the Three-Year MBA Programme. Professor Espy joined the University in 1963 and retired on 30th September, 1988.

**New Graduate Programmes**

The Senate has approved the introduction of three graduate programmes in 1990-91: MPhil in Religion, PhD in Geography, and PhD in Psychology.

**University Members Serving on Outside Committees**

(1) The following members of the University have been appointed by His Excellency the Governor to serve on various boards and committees:

* Dr. Joseph M. Chan, lecturer in journalism and communication, on the Journalism Training Board of the Vocational Training Council from 1st April, 1989 to 31st March, 1991.

* Dr. Ng Lee-Ming, reader in religion and director of part-time degree studies, and Mr. Tsim Tak-lung, director of The Chinese University Press, on the Council of the Open Learning Institute of Hong Kong from 20th June, 1989 to 19th June, 1991.

* Dr. Ho Hin-hung, senior lecturer in physics, on the Board of Governors of the Hong Kong Baptist College from 1st July, 1989 to 30th June, 1992.

* Professor Teik E. Oh, dean of medicine, on the Medical Council of Hong Kong from 1st August, 1989 to 30th September, 1991.
* Professor S.W. Tam, dean of Graduate School and head of Chung Chi College, as chairman of the Supplementary Medical Professions Council from 1st October, 1989 to 30th September, 1992.
* Professor S.P.B. Donnan, professor of community and family medicine, on the Working Party on Primary Health Care.
* Professor C.Y. Lee, professor of biochemistry and head of The United College, on the Joint Committee on Student Finance for a term up to 30th April, 1991.

(2) The following members of the University have been nominated to represent the University on various boards and committees:

* Mr. Hsu Dan-lin, lecturer in finance, on the Banking Training Board of the Vocational Training Council from 1st August, 1989 to 31st March, 1991.
* Dr. Douglas S.L. Tung and Dr. Moon Yiu-sang, senior lecturers in computer science, on the Advanced Level Computer Studies Ad Hoc Subject Committee, Hong Kong Examinations Authority from 1st September, 1989 until a new Sixth Form Subject Committee for Computer Science is established.

40th Anniversary of New Asia College

New Asia College celebrated its fortieth anniversary as well as the 2540 birthday of Confucious this year. A series of celebration activities starting in late September included a dinner for ‘a thousand persons’, a Chinese music concert, a banquet, inter-departmental competitions, sports competitions, an Alumni Day, an art exhibition and cultural talks. Professor Ch’ien Mu, founding president of the college, made a special trip from Taiwan to take part in the celebration.

Octagonal pillow with black painted bird design on white slip coating, Jin, 12-13th century, length: 28.4 cm  
(Exhibition of Chinese Ceramic Pillows from the Collection of Mr. & Mrs. Yeung Wing Tak)
Background

At the time when China was closed to the outside world, it was only natural that a centre for contemporary China studies based in Hong Kong should be established. In 1963, the same year The Chinese University of Hong Kong was founded, a group of outstanding Western scholars who recognized the need approached various foundations and academic institutions to galvanize support for research on China. In the event, a sum of money was raised and the Universities Service Centre (USC) was born in Hong Kong as a base for research on China. The following decades saw the centre flourishing on the continued efforts of innumerable scholars, among them Franz Schurmann, John Lindbeck, Frederich Burkhardt, Lucian Pye, and in particular John Dolfin, who managed the centre for fifteen years. The centre has since grown into a major stronghold for Western scholars doing research on China. According to statistics available from the early 1980s, more than 200 volumes of works has been published by scholars who made use of the facilities of the centre. Many of these works have become mandatory readings for experts and students in the field. Today, quite a number of prominent scholars in China studies as well as China policy advisers of Western governments once spent their student days at the centre, gathering materials through interviewing mainland immigrants, and through painstakingly reading between the lines of mainland newspapers and journals.

With the Chinese government establishing more open policies in the early eighties, opportunities become available for Western scholars to do research directly in the mainland. Thus, Hong Kong’s position as a research base for Western scholars gradually became less significant. Moreover, in a place such as Hong Kong where land resources are scarce, the costs of maintaining an expanding research collection escalated. All these led to a debate on the future of the centre since the mid-1980s. The Chinese University has always attached great importance to research on China and thus has been concerned with the centre’s development. When it learned in late 1987 that the centre might have to relocated from Hong Kong, the University started to negotiate with the American Council of Learned Societies, which was responsible for the centre’s management at that time. An agreement was then reached for The Chinese University to take over financial and managerial responsibility for the centre.

Thus, in the summer of 1988, the centre was moved to the present premises from its original location on Argyle Street in Kowloon. After nearly one year of renovation work, the centre was in full operation in mid-June and formally reopened on 31st August this year. The opening ceremony was held at Cho Yiu Conference Hall, officiated by Professor Charles K. Kao, the Vice-Chancellor of The Chinese University, and Professor R.T.T. Young, Acting Vice-Chancellor of the University of Hong Kong. Professor Ezra Vogel, professor of sociology at Harvard University also addressed the gathering. The function was attended by local scholars, China watchers and members of the press.

Current Situation

The centre’s current director is Dr. Kuan Hsin-chi, Ms. Jean Hung, the assistant director, is responsible for its daily operation. An advisory committee consisting of international scholars decides on broad policies and guidelines.

The following major categories of material are currently held in the centre:

1. Local newspapers

The most unique collection of USC is a complete set of major local and provincial newspapers published in China from the late 1940s and early 1950s. The centre subscribes to approximately 400 mainland newspapers. For example, as many as 28 newspapers are received from Guangdong, including Southern Daily, Guangzhou Daily, Guangdong Peasant News, Guangdong Overseas News, Zhanjiang Daily, Shaoguan News, Foshan News, Shenzhen Special Zone News, and Special Zone Worker’s News.
2. Chinese journals
The centre subscribes to more than 1,100 Chinese journals, including approximately 80 college and university journals, 100 literary, historical and philosophical journals, 160 social sciences (general) journals, 120 political and law journals, 200 economic journals, 60 education journals, 80 art journals, 200 literature and journalism journals, and 20 military journals.

3. Classified digest compiled by the Chinese People’s University
This categorized compilation of newspaper and journal articles is most useful to researchers. Articles from over 1,700 Chinese newspapers, magazines and academic journals are sorted into more than 100 categories. The centre has an entire collection beginning in 1978, covering materials in the social sciences (general), politics and economics, and a selected collection in history, geography, culture, education and the arts.

4. English journals
The centre subscribes to over 70 English language journals in the field of Chinese studies, including translations from original sources such as New China News Agency bulletins, Survey of China Mainland Press, Daily Report by Foreign Broadcast Information Broadcast and Summary of World Broadcast, as well as academic journals in China studies. Most of the collection begins in the 1960s.

5. Chinese and English books
The centre has about 16,000 Chinese books, mainly in social science subjects. In addition, there are 4,000 English titles, including most of the Western books on contemporary China published in the last 40 years.

6. Local yearbooks
After moving to The Chinese University, the centre began to systematically collect provincial and local data, particularly reference materials, to facilitate regional research. The centre has recently acquired a number of provincial yearbooks and about 100 volumes of local statistical data, including some very valuable material.

In addition to the materials described above, the centre also holds an incomplete collection of original materials concerning the ‘Cultural Revolution’, the Red Guard papers, Democracy Wall materials, and materials from the 1989 democratic movement.

The centre has adopted a computer system to assist in library management. The online bibliographic search for Chinese materials already provides great convenience to library users. Online bibliographic search for English materials is however yet to be completed.

The centre is open to scholars from every country, as well as staff and graduate students from tertiary institutions in Hong Kong. Any undergraduate student who wishes to use the centre must present a letter of recommendation from his or her supervisor. Without exception, none of the centre’s materials circulates. Scholars from outside The Chinese University must present identification when they visit the centre for the first time.

Study carrels are available to foreign scholars, including those from Taiwan and the mainland, as well as local and Chinese University scholars who need to frequent the centre. The centre also assists foreign scholars in applying for visas for Hong Kong, looking for accommodation, hiring research assistants, and so on.

Development Policy
In a recent further development, the centre has taken on a new mission without losing sight of its cherished traditions. In the last quarter century, the centre has played an important role in the history of Western research on China. With its move to The Chinese University, the centre has entered into a new era. The old orientation can no longer suffice as its raison d’etre. It must develop into an asset for Hong Kong. However, the new orientation does not mean the centre will abandon its old friends. On the contrary,
the centre will continue to do all it can to provide research materials and assistance to China scholars from all countries. The locational superiority of Hong Kong for research on China is already a cliché. It goes without saying that Hong Kong must try its best to maintain this dominant position. Yet the prospects of Hong Kong’s return to China in 1997 presents an urgent task. It is even more necessary for Hong Kong people to deepen their own understanding of China. Since The Chinese University has taken charge of the centre, more and more local scholars and students are using its materials and facilities. This is thus gratifying to the centre’s staff, although it means an increased workload at the same time.

Throughout the years, USC has not been just a library. It is also a home for scholars from various countries to gather and exchange ideas. The centre’s carefully fostered warm atmosphere and the opportunities it provides for academic and social intercourse have had a major impact on the evolution of academic circles engaged in China research. Many scholars pass through the centre to keep abreast of new developments in research, to make new friends, and to reinforce old ties. One of the University’s goals in taking over the centre has been to promote this type of contact, and to increase exchanges between local and international scholars. In the short span since its reopening, the centre has already received dozens of international scholars, many of whom worked on similar research topics with scholars at The Chinese University in the past. Some of these scholars are now making plans for further cooperative efforts in the future.

Luncheon talk is another traditional activity of the centre. Scholars using the centre are invited to present their latest research findings or offer their opinions on current issues. This tradition of useful lunch time discussions will continue.

To promote academic exchange on a larger scale, the centre will convene international conferences. In September this year, the centre held a highly successful workshop on ‘Political Order in Changing Societies: the Chinese Case’, which dealt with aspects of political changes in Chinese societies. In that workshop, Professor Ezra Vogel from Harvard University was invited to give a speech and other scholars from the United States, the United Kingdom, Canada, Taiwan and Hong Kong presented papers to air their views from different aspects. They included Dr. S.K. Lau, who spoke on ‘Institutions without Leaders: Hong Kong Chinese’ View of Political Leadership’; Professor Joseph P.L. Jiang, on ‘The Development of Competitive System in ROC on Taiwan’; Professor Ya-li Lu, on ‘Present Status and Future Prospect of Taiwan and China Relations’; Professor M. Frolic, on ‘Lessons of the Beijing Massacre: a Canadian Perspective’; Professor Brian Hook, on ‘Aspects of Sino-British Relations in the Transition to the Retrocession of Hong Kong: the Garrison and the Garrison Estate’.

In the area of collection development, because of the explosion of information, the centre cannot possibly collect all the materials that are available. While it is true that in the past the centre collected material from a wide spectrum, its greatest success nevertheless lies in the social science areas. The pride of the centre is its collection founded on local newspapers and journals. The centre will continue to build on this strength in its future acquisition policy. The recent systematic purchase of local yearbooks and statistical data is one example.

Looking to the future, the centre’s importance will not diminish even as more opportunities for field research open up in China. Documentary analysis is a valuable tool for research in its own right. Added to this are continued improvements in collection development and research assistance, and the promotion of research and academic exchange. For all of these reasons, the USC is likely to make significant contributions to research on China for many years to come.
CUHK Won Intervarsity Rowing Competition

The University’s rowing team beat its Hong Kong University counterpart and won the championship in the third Hong Kong Intervarsity Rowing Competition which took place on 3rd September. This is the first time the CUHK team has won in the competition.

Rowing has for many years been a popular university sports activity in the West, notably in England, where the annual race between the ancient universities of Oxford and Cambridge draws the attention of the entire country and is still a major event in the social calendar.

Three years ago, a group of students from the two local universities, most of them being keen oarsmen, conceived the idea of organizing a rowing tournament more or less along the Oxford-Cambridge line, to promote interest in this very worthy sport. With the assistance of the Hong Kong Amateur Rowing Association, sponsorship from the Shun Hing Electronic Trading Co. Ltd. and other firms, encouragement from His Excellency the Governor and Sir David Akers-Jones, full support of the physical education units and student affairs offices of the two universities, the two teams were formed and they first competed in a 5,000 metre race in September 1987.

This first attempt to introducing an intervarsity rowing championship proved so successful that the organizers, the two university rowing clubs, were tempted not only to repeat the event but also to make it a permanent, annual competition. Their plans materialized in time and a second tournament took place in September 1988.

The third Intervarsity Rowing Championship was held on Shing Mun River, just off the Shatin Central Park. The competition took place in the presence of the vice-chancellors of the two universities, the Honourable Donald Liao, Secretary for District Administration, and Sir David Akers-Jones, whose abiding interest in the event had always been very encouraging to the organizers. The event was well attended by university staff and students, as well as members of the press. The Chinese University’s men’s coxed eight won the major trophy for the first time, much to the jubilation of all who witnessed the proceedings. The 1,000 metre race for women was won by the women’s coxed four of the University of Hong Kong. In addressing the gathering of sportsmen and spectators, Sir David exhorted the rowers to pursue their goals with courage, fairness and fortitude, qualities which were amply demonstrated in the performance of the CUHK teams.

The prize-giving ceremony was certainly the high point of the whole event, and many Chinese University students in the crowd were overwhelmed with joy as the members of the University team (men) received the trophy. This was followed by a luncheon at the Regal Riverside Hotel at which all had a good time.
Cultural Events

* The Art Gallery mounted an ‘Exhibition of Chinese Ceramic Pillows from the Collection of Mr. and Mrs. Yeung Wing Tak’ from 1st July to 24th September. The 130 exhibits, selected from the collection of Mr. and Mrs. Yeung Wing Tak, were of a great variety of forms and decorative techniques. Most of them were Cizhou type wares dating from the Tang to the Yuan period.

* The Department of English organized an international conference on ‘Syntactic Acquisition in the Chinese Context’ from 4th to 7th July. Scholars from Australia, China, Japan, Hong Kong, Singapore, Taiwan, the United Kingdom and the United States presented a total of about 30 papers on the following topics: first language acquisition of Chinese, second language acquisition of English by Chinese learners, and second language acquisition of Chinese by speakers of English or other languages.

* The Department of Chemistry organized the following seminars:
  – Dr. Dawning Fung of the Royal Hong Kong Jockey Club spoke on ‘Homogeneous Hydrogenation Studies of Di-tertiary Phosphine - Rhodium (I) Complexes’ on 7th July.
  – Professor C.T. Chang, Institute of Atomic and Molecular Science, Academia Sinica, and Department of Chemistry, National Tsing Hua University, Taiwan, spoke on ‘Preparation and Characterization of High Tc Superconductors’ on 12th July.
  – Dr. C.W. Yip, Department of Applied Biology and Chemical Technology, Hong Kong Polytechnic, spoke on ‘Phase-separated Polymer Systems’ on 28th July.
  – Professor K. Hafner, Institute of Organic Chemistry, Darmstadt Polytechnic, West Germany, spoke on ‘Novel Cyclic Conjugated π - electron Systems - Theoretical Predictions and Experimental Results’ on 6th September.
  – Professor M. Rabinovitz, Department of Organic Chemistry, The Hebrew University of Jerusalem, Israel, spoke on ‘NMR Spectroscopy of Polyheterocyclic Dianions - Preparation and Ring Closure Process’ on 8th September.
  – Professor R.A. Raphael, emeritus professor of the University of Cambridge, the United Kingdom and Royal Society Kan Tong Po Visiting Professor, University of Hong Kong, spoke on ‘Synthetic Approaches to the Antileukaemic Rocaglamide’ on 22nd September.

* The Department of Physics organized a seminar on 22nd August on ‘Landau Theory of Blue Phases’. The speaker was Professor Shmuel Shtrikman from Weizmann Institute of Science, Israel.

* The Universities Service Centre organized a ‘Workshop on Political Order in Changing Societies: The Chinese Case’, on 1st September.

* The University and the Society of Hong Kong Scholars jointly organized a seminar on engineering on 6th September. Professor Chang-lin Tien, Executive Vice-Chancellor and Distinguished Professor of the University of California at Irvine, spoke on ‘Developing Trends in Industrial Technology and Engineering Education’.

* The University Health Service organized the following seminars:
  – Dr. Andrew C.H. Tseung, vice-president of the New Zealand Medical Acupuncture
Society, spoke on ‘Acupuncture in General Practice’ on 7th September.

- Dr. Y.K. Leung, attending physician, Division of Gastroenterology and Nutrition, Children’s Hospital of Buffalo, USA, spoke on ‘Nutritional Support for Sick Patients’ on 26th September.

* The Department of Music organized the following activities:
- A concert of French music performed by Miss Tso Sau-han, a soprano from Paris, on 11th September, accompanied by Mrs. Marilyn Watson at the piano. Works by prominent French composers were performed. Mr. Wu Wing-bin played as guest clarinet soloist at the concert.

* The Hong Kong Philharmonic Society, the United College Dean of Students’ Office, the United College Music Society, and the United College Student Union jointly organized a lecture on ‘General Music Appreciation’ on 26th September. The speaker was Mr. C.H. Ng.

**Personalia**

*(From 1st July to 30th September, 1989)*

---

**I. Award of Emeritus Professor**

Professor John L. Espy  
Emeritus Professor of International Business

Professor Lau Din-cheuk  
Emeritus Professor of Chinese Language and Literature

**II. Elections/Concurrent Appointments**

Dr. Ho Hsiu-hwang  
Dean of Arts

Dr. Kuan Hsin-chi  
Dean of Social Science

Professor Lee Cheuk-yu  
Dean of Students

Professor Oh Teik-ewe  
Dean of Medicine

**III. Honorary Appointments**

Mr. William Cheng  
Senior College Tutor, Shaw College

Professor Lau Din-cheuk  
Senior College Tutor, Shaw College

**IV. Appointments**

**Academic Staff**

**Faculty of Arts**

Professor David E. Pollard  
Professor of Translation

Dr. Michele M. Chan  
Lecturer, English Language Teaching Unit

Dr. Gilbert C.F. Fong  
Lecturer in Translation

Dr. Lee Wood-hung  
Lecturer in Japanese Studies

Mr. Lui Chun-kwong  
Lecturer in Fine Arts

Dr. Michael Share  
Lecturer in History

Dr. Hardy C. Wilcoxon  
Lecturer in English

Dr. Wong Juen-kon  
Lecturer in Chinese Language and Literature

Dr. Wong Yiu-kwan  
Lecturer in Chinese Language and Literature

Miss Tomoko Uozumi  
Visiting Lecturer in Japanese Studies

Dr. Patricia N. Page  
Honorary Visiting Lecturer in Religion

Dr. Wang Hsien-chih  
Honorary Visiting Lecturer in Religion

Mr. Chan Yuk-keung  
Assistant Lecturer in Fine Arts

Mr. Mok Kar-leung  
Assistant Lecturer in Fine Arts

Miss Virginia C.Y. Yip  
Assistant Lecturer in English
Mr. Alan R. Hirvela  
Senior Instructor in English  
Miss Kitty K.M. Kwan  
Instructor, English Language Teaching Unit  
Miss Yuen Yin-ping  
Instructor in Chinese Language and Literature  

Faculty of Business Administration  
Dr. Suresh K. Khator  
Senior Lecturer in Operations and Systems Management  
Mr. Chan Wing-yiu  
Lecturer in Accountancy  
Dr. Chua Bee-leng  
Lecturer in Organization and Management  
Dr. George W.L. Hui  
Lecturer in Finance  
Mr. Paul B. McGuinness  
Lecturer in Finance  
Mrs. Marian Y.J. Tong  
Lecturer in Accountancy
