Information as of 30 June 2023, unless otherwise specified

Campus

Our Mission

To assist in the preservation, creation, application and dissemination of knowledge by teaching, research and public service in a comprehensive range of disciplines, thereby serving the needs and enhancing the well-being of the citizens of Hong Kong, China as a whole, and the wider world community.

Our Vision

To be acknowledged locally, nationally and internationally as a first-class comprehensive research university whose bilingual and multicultural dimensions of student education, scholarly output and contribution to the community consistently meet standards of excellence.

Emblem and Colours

The emblem of the University is the mythical Chinese bird *feng* (鳳) which has been regarded as the Bird of the South since the Han dynasty. It is a symbol of nobility, beauty, loyalty and majesty. The University colours are purple and gold, representing devotion and loyalty, and perseverance and resolution, respectively.

Total gross floor area

836,795m²

Buildings on campus

171

Campus area

138.4 hectares

Main Campus

The University's stunning campus commanding panoramic views of the Tolo Harbour and the mountain range nearby is the largest in Hong Kong. Nestled among the greenery are tasteful buildings featuring a mix of Chinese and Western architectural styles. The campus is a haven for many varieties of flora and fauna.

Teaching Centres in Town

The Graduate Law Centre, the MBA Town Centre, and one of the enrolment and learning centres of the CUHK School of Continuing and Professional Studies are housed at the Bank of America Tower in Admiralty, Hong Kong.

Teaching Hospitals

The Prince of Wales Hospital and the CUHK Medical Centre (CUHKMC) are teaching hospitals of the Faculty of Medicine of CUHK, offering training for medical professionals and the ground for medical research. The Prince of Wales Hospital also houses most departments of the Faculty and several CUHK research institutes.

Shenzhen Research Institute

Situated in the Shenzhen Virtual University Park in Nanshan, the Shenzhen Research Institute, wholly owned by CUHK, was officially opened in November 2011. It serves as a pivotal base for CUHK staff to conduct research, training and technology transfer in mainland China.

Year of establishment

1963

(through amalgamation of
Chung Chi College,
New Asia College and
United College)

Number of teachers

40

CW CHU COLLEGE

College Motto

Cultus et Beneficentia

Founded in

2007

Facilities

Seminar rooms, canteen, dining hall, activity rooms, fitness room, music room, TV room, mini library and reading room, computer room, indoor rowing room

Master
Professor
Anthony T.C. Chan

Number of students

1,364

Number of teachers

108

WU YEE SUN COLLEGE

College Motto

Scholarship and Perseverance

Founded in

2007

Facilities

House of Sunny Living (The Lounge, gymnasium, multi-purpose sports room), Creativity Laboratory, central courtyard, Terrace of Dreams, dining hall, café, theatre, gallery, learning commons, Yan Chak Study Room, seminar rooms, music rooms, Hall of Honorary Fellows

Master
**Professor
Yam Yeung**

Number of students

1,499

Number of teachers

90

LEE WOO SING COLLEGE

College Motto

Wisdom, Humanity, Integrity, Harmony

Founded in

2007

Facilities

Dining hall, multi-purpose hall, mini-theatre, seminar rooms, reading corner, multi-media studio, computer room, Richard M.W. Ho Lounge (VIP lounge), student-staff catering centre, café, cookery demonstration room, barbecue area, fitness room, outdoor fitness ground, music rooms, band room, College archives

Strategic Research Areas and Themes

CUHK's research strategies aim to realise its vision as a centre of excellence for developing cutting-edge research and emerging interdisciplinary strengths that have global impact and significant contributions to society, through translating research findings into practical applications. Riding on our current research strengths, four major research areas have been identified in the CUHK Strategic Plan 2021–2025.

Innovative Biomedicine

- Genetic, genomic and precision medicine
- Brain and mind
- Stem cell biology and regenerative medicine
- Integrative medicine
- Medical devices
- Microbiology and health

Environment & Sustainability

- Smart and sustainable cities
- Exosome and healthy urban living
- Plant and agricultural biology and food security
- Planetary health and climate change
- Population sustainability

4 Major Research Areas

China: Tradition & Modernity

- Understanding Chinese culture
- China's global challenges
- Greater Bay Area

Information & Automation Technology

- Artificial intelligence and applications
- Data networks & telecommunications
- Robotics
- Quantum sciences & technologies
- Big data and data analytics

Areas of Excellence

Centre for Genomic Studies on Plant-Environment Interaction for Sustainable Agriculture and Food Security

With the research foci on the understanding of plant adaptation to abiotic stresses, and the mechanisms of gene regulation relating to plant-environment interactions, the Centre aims to identify useful functional genes and effective molecular markers to help generate new adaptive varieties to combat major factors hampering sustainable agriculture, including water scarcity, global warming, and topsoil nutrient depletion.

Probing the Fundamental Structure of Matter with High Energy Particle Collisions

As an active member of the A Toroidal LHC Apparatus (ATLAS) experiment at the Large Hadron Collider at the European Organisation for Nuclear Research in the Asia-Pacific region, the project team has established the Higgs particle's spin and parity and couplings to Standard Model particles, and designed new strategies for probing Physics Beyond the Standard Model (BSM). Analysis tools have been developed, complete with an ATLAS Tier-2 computing centre in Hong Kong.

Centre for Medical Engineering of Molecular and Biological Probes

The Centre focuses on using advanced sequencing technologies and systematic analysis for new discoveries on cell-surface proteins in cancers that are widely found in Asia. It will leverage the information of tumour-specific cell-surface antigens to generate dual-targeted theranostic probes for molecular imaging and precision therapy, and exploit characteristic features for engineering genetically modified CAR T-cells.

Ageing, Skeletal Degeneration and Regeneration

The multidisciplinary project team focuses on developing strategies for facilitating skeletal regeneration in bone metabolic disorders and fragility injuries, especially in searching for bioactive and biodegradable implantable materials for temporal fixation and stimulating skeletal regeneration that can reduce the duration of medical treatment and avoid second operations for implant removal, a direction with great potential for clinical applications.

State Key Laboratories

State Key Laboratory of Translational Oncology (The Chinese University of Hong Kong)

Backed by a strong clinical base, the Laboratory, established in 2006, conducts research into the early detection of cancers particularly prevalent in Asian populations, and seeks to develop novel therapeutics for the treatment.

State Key Laboratory of Agrobiotechnology (The Chinese University of Hong Kong)

The Laboratory was established in 2008 with the mission of up-scaling China's agricultural technology to increase agricultural productivity, safeguarding food security in China, and improving people's nutrition by combining the traditional wisdom of farmers and breeders and modern biotechnology.

State Key Laboratory of Research on Bioactivities and Clinical Applications of Medicinal Plants (The Chinese University of Hong Kong)

By drawing on the expertise in research into Chinese medicinal plants developed both at CUHK and the Kunming Institute of Botany, Chinese Academy

of Sciences, the Laboratory, established in 2009, aims to conduct research into the modernisation of traditional Chinese medicine and the application of biotechnology in medical science.

State Key Laboratory of Digestive Disease (The Chinese University of Hong Kong)

Established in 2013, the Laboratory aims to promote research and improve the level of diagnosis and treatment of digestive disease by carrying out basic, translational and clinical research on gastrointestinal cancer, peptic ulcer bleeding, chronic liver disease and inflammatory bowel disease.

State Key Laboratory of Synthetic Chemistry

Established in 2010 in partnership with the University of Hong Kong and the State Key Laboratory of Organometallic Chemistry located in the Shanghai Institute of Organic Chemistry, the Chinese Academy of Sciences, the Laboratory aims to create and identify novel chemical compounds with important structural and bonding features or with notable potential for practical applications.

InnoHK Centres

CUHK is making a significant contribution to Hong Kong's innovation and technology development through its six InnoHK Centres focusing on health, biomedicine, robotics, and artificial intelligence. Over 100 patents have been filed for the inventions developed by the Centres.

Health@InnoHK

1. Centre for Neuromusculoskeletal Restorative Medicine (CNRM)

The Centre is a multi-disciplinary, international consortium devoted to the application of convergent principles and technologies of biomedical science and engineering to restore structure and function to neuromusculoskeletal tissues and organs injured, diseased and degenerated due to ageing or trauma, for the maintenance of mobility and enhancement of quality of life through biomedical research and development.

2. Centre for Novostics

Novostics focuses on the development of cutting-edge diagnostics based on cell-free nucleic acids in blood and other bodily fluids, particularly around prenatal diagnosis and cancer diagnostics. These

research areas will accelerate the application of liquid biopsy and promote Hong Kong as a leading molecular diagnostic centre in the world.

3. Microbiota I-Center

The Center focuses on advancing science in the gut microbiome and promoting entrepreneurship. It is committed to developing a novel class of microbiome diagnostics and live biotherapeutics for common diseases including obesity, cancer, autism, inflammatory disorders and COVID-19, which will not only transform lives of patients and their families, but also accelerate Hong Kong's development into a world-class microbiome biotechnology hub.

4

6

AIR@InnoHK

4. Centre for Perceptual and Interactive Intelligence (CPII)

CPII makes use of Hong Kong's international research networks for AI talent development and exchange, nurtures AI start-ups and brings academic outcomes to meet industrial demands. With strong capabilities in computer vision, multilingual speech and language technologies, natural language processing, and AI-enabled design automation, CPII will efficiently connect research with industry to accelerate social implementation.

5

5. Hong Kong Centre for Logistics Robotics (HKCLR)

The Centre focuses on the research and development (R&D) of robotics and artificial intelligence technologies for future workplaces as well as innovative solutions to the pressing problems in the logistics industry. In particular, it aims to advance robot intelligence in terms of smart perception, smart interactions, smart manipulation and smart moving.

6. Multi-Scale Medical Robotics Centre (MRC)

The Centre is positioned to enable translational research on and productisation of novel surgical robotic technologies. The Hybrid Operating Room of the MRC Lab, which enables real-time, intra-operational medical imaging during surgical robotics interventions, is a one-of-its-kind facility in Asia fully dedicated to R&D and pre-clinical evaluations of new surgical robots and medical devices via live animal and cadaveric studies.

Meeting and Outdoor Venues

M. University Mall

Lined between the University Library and the Science Centre, the University Mall is the most famous icon on campus. It is also the place for the University's annual Congregation.

N. *The Gate of Wisdom and the Beacon*

The broad rectangular base of the sculpture *The Gate of Wisdom and the Beacon*, also known as the Beacon, is a popular place for student activities, especially public forums and ceremonies.

O. Henry Cheng International Conference Centre (HCICC)

Located in Cheng Yu Tung Building and adjacent to the teaching hotel and MTR station, HCICC provides 15 multi-purpose conference venues including a large theatre for 460 users and rooms of small and medium sizes. Areas for conference catering and academic poster exhibition are also available, making it an ideal venue for hosting international academic conferences.

P. Cho Yiu Conference Hall

The 162-seat conference room is equipped with simultaneous interpretation systems and a projection screen for video-conferencing. Portraits of past Council Chairmen and Vice-Chancellors adorn its walls.

Q. Cultural Square

Outside the Benjamin Franklin Centre, the square is a popular place for student activities including open-air concerts, drama, as well as cultural festivals.

Entrepreneurship & Innovation Hub

CUHK Pi-Centre New Town Innovation and Entrepreneurship Center, Sanshan New Town, Nanhai District, Foshan City

CUHK has been actively taking part in the development and engagement in the Guangdong-Hong Kong-Macao Greater Bay Area (GBA), creating synergies that have grown in scale and intensity over the last 10 years. Being the first university in Hong Kong that established a presence in the GBA, CUHK founded the Shenzhen Institute of Advanced Technology in collaboration with the Chinese Academy of Sciences and the Shenzhen Municipal Government in 2006. CUHK then established the Shenzhen Research Institute (SZRI) in 2007, which was eventually completed in November 2011. In 2012, the State Ministry of Education approved the establishment of The Chinese University of Hong Kong, Shenzhen (CUHK(SZ)), which officially opened for admission in 2014. In 2018, CUHK(SZ) saw its first batch

of graduates, while SZRI, also in the same year, founded the Entrepreneurship and Innovation Hub. With a view to establishing a world-class scientific and technological innovation centre in the GBA, a Memorandum of Understanding was signed between CUHK and Guangzhou Regenerative Medicine and Health Guangdong Laboratory in 2019. In 2020, CUHK received formal approval to establish the CUHK Hong Kong—Shenzhen Innovation and Technology Research Institute (Futian). The Office for Greater Bay Area Developments was also founded in the same year, enabling alumni, professors, and students to have better connectivity and adaptability when they carry out innovative and technological endeavours in the GBA.
