Celebration of 35th Anniversary Begins

The University is celebrating its 35th anniversary this year and a working party has been formed to design a year-round celebration programme for the University. The programme kicked off with a photography contest last month. With 'Scenic Spots of The Chinese University of Hong Kong' as its theme, the competition is open to all CUHK and secondary school students. Posters and entry forms have already been sent out by the Office of Student Affairs and results are due in mid-1998.

In February, another celebration event — an international conference on Restructuring the Knowledge Base of Education in Asia, organized by the Faculty of Education and the Hong Kong Institute of Educational Research, took place between 12th and 14th.

Other celebration activities to follow include international conferences, symposiums, and public lectures on various themes, a Chinese drama festival, Founder's Day celebrations, and the launch of the CUHK alumni trail. Details of individual events will be covered in the CUHK Newsletter in due course.

Chemist Reviews Two Decades of Research in Three Cities

Three Cities: Planar Dehydro[8]Annulenes and Their Reverberations. Prof. N.C. Wong reviewed his research endeavours in planar dehydro[8]annulenes, which have led to the syntheses of several theoretically interesting compounds, and of polysubstituted five-membered non-natural and natural heterocycles. Prof. Wong discussed these research activities, carried out in London, Shanghai, and Hong Kong, in chronological order.

Prof. Wong graduated from The Chinese University in 1973. He then pursued graduate studies at London University, receiving his doctorate in 1976. After working for some years there and also at Harvard University, Prof. Wong joined the Shanghai Institute of Organic Chemistry, The Chinese Academy of Sciences, as associate research fellow in 1980. He joined the Department of Chemistry of The Chinese University in 1983 and was appointed professor of chemistry in October 1996.

In his lecture entitled 'A Tale of China, Eastern Europe and the USA', Prof. Henry N.C. Wong, professor of chemistry and recently winner of the Second Class National Natural Science Award of the People's Republic of China, delivered his professorial inaugural lecture on 23rd January 1998 at the Ho Sin Hang Auditorium of the Ho Sin Hang Institute of Educational Research Services Centre, built with a generous donation from the Shanghai Fraternity Association (HK) Ltd., has a total floor area of 4,600 square metres and is equipped with laboratories and a technical services unit. The Faculties of Medicine, Engineering, and Science as well as other research units will benefit from the state-of-the-art facilities therein. Genetic, cancer, and immunology research is also given a great boost. The centre is located on the eastern part of the campus close to the KCRC University Station.

On the same day, the University's BBA programme in professional accountancy was formally opened on campus last month to give service accreditation support to the University's research activities. The five-storey Shanghai Fraternity Association Research Services Centre, built with a generous donation from the Shanghai Fraternity Association (HK) Ltd., has a total floor area of 4,600 square metres and is equipped with laboratories and a technical services unit. The Faculties of Medicine, Engineering, and Science as well as other research units will benefit from the state-of-the-art facilities therein. Genetic, cancer, and immunology research is also given a great boost. The centre is located on the eastern part of the campus close to the KCRC University Station.

A new service centre was formally opened on campus last month to give service accreditation support to the University's research activities. The five-storey Shanghai Fraternity Association Research Services Centre, built with a generous donation from the Shanghai Fraternity Association (HK) Ltd., has a total floor area of 4,600 square metres and is equipped with laboratories and a technical services unit. The Faculties of Medicine, Engineering, and Science as well as other research units will benefit from the state-of-the-art facilities therein. Genetic, cancer, and immunology research is also given a great boost. The centre is located on the eastern part of the campus close to the KCRC University Station.

The HKSA received full professional accreditation from the Association of Chartered Certified Accountants in the UK, which will be terminated in 2001. To be admitted as a member of the HKSA under the new system, a candidate has to fulfill the requirements of obtaining pre-entry education (a recognized accounting degree), acquiring practical experience, undertaking the Professional Programme, and passing the Final Professional Examination.

CUHK Accountancy Programme Receives Full HKSA Professional Accreditation

Last December, the University's BBA programme in professional accountancy was granted unconditional accreditation by the Council of the Hong Kong Society of Accountants (HKSA). This means that graduates of the programme are eligible to register as students of the HKSA Professional Programme.

The HKSA established an Accreditation Accreditation Board (AAB) in early 1997 to accredit local academic qualifications for admission into its Professional Programme. The board conducted an accreditation exercise on the University's accountancy programme, which included the evaluation of a comprehensive information package submitted by the School of Accountancy and an accreditation visit by the assessment team to the School, during which they attended classes, surveyed the facilities, and spoke to teachers, subject coordinators, and students. They were favourably impressed.

The HKSA will adopt a new professional accreditation system from 1999 to replace the Joint Examination Scheme with the Association of Chartered Certified Accountants in the UK, which will be terminated in 2001. To be admitted as a member of the HKSA under the new system, a candidate has to fulfill the requirements of obtaining pre-entry education (a recognized accounting degree), acquiring practical experience, undergoing the Professional Programme, and passing the Final Professional Examination.
CUHK Plays Active Role in Public Health

A Family Medicine Teaching Centre was formally established at the general practice clinic of Yan Chai Hospital following the signing of a memorandum between the CUHK Department of Community and Family Medicine and Yan Chai Hospital on 22nd January 1998.

The centre, which started pilot operations in early 1997, is the first family medicine teaching centre set up jointly by a university and a district hospital in Hong Kong. Twenty-four medical students from CU have been attached to the centre for clinical sessions, and other students have visited the centre to learn about the organization and management of family medicine practice.

Besides providing training, the centre will work towards enhancing preventive health care and promoting health care education. Staff of the Department of Community and Family Medicine will help develop family medicine and design training programmes for hospital staff. There will also be research collaboration between the two parties, especially in the areas of health service provision, epidemiology, and public health.

The memorandum was signed by Prof. S.H. Lee, chair of the department, and Dr. David Cheng, hospital chief executive of Yan Chai.

Talk and Workshop Examine IT in Education

Teaching is no longer just chalk and board. The growing importance of information technology in education was the focus of a talk and workshop organized by Chung Chi College and the Office of Student Affairs on 23rd January 1998. With “Facing the New Challenges of Education in the 21st Century” as its theme, the event’s objective was to provide students who wish to become teachers with up-to-date information on the application of information technology in school administration and education. It was also hoped that the event would attract more university students to the profession.

In the talk, the development of information technology, multi-media teaching, and curriculum design in Hong Kong was analysed, and the School Administration and Management System (SAMS) introduced. Speakers included three officers of the School Administration and Management System Section of the Education Department, as well as the principal of Sha Tin Government Secondary School. At the workshop that followed, students were given the opportunity to try applying SAMS in a simulation exercise.

The events were attended by over 170 participants, of whom about 140 were CUHK students.

Neuroscience Workshop Breeds Brain Research Organization

The First Neuroscience Exchange Workshop, hosted by New Asia College and the Department of Anatomy, took place from 15th to 17th December 1997 at the University. Prominent Chinese neuroscientists from mainland China, Hong Kong, and Taiwan participated in the workshop, whose aim was to promote scientific interaction and collaboration between major neuroscience groups from the three places.

It was agreed at the workshop that an organization, to be named the Chinese Neuroscience Workshop, would attract more participants from the mainland, Hong Kong, and Taiwan.

Eight Most Outstanding Medical Teachers 1997

Eight teachers from the Faculty of Medicine were presented the Most Outstanding Teacher of the Year Award for the academic year 1996–97 at a ceremony held on 21st January 1998.

In the election organized by the faculty, students in each year of the undergraduate medical programme were asked to nominate a teacher they consider the most influential on their ability to learn. Criteria used included organization skills, the ability to define objectives, material coverage and formulation, helping understanding, and provoking interest. The top nominees from each year were then voted on by the respective classes by secret ballot. The election is planned as an annual event to give recognition to the best teachers as chosen by undergraduate medical students each year.

Prof. Arthur K.C. Li, vice-chancellor, gave a keynote address at the award presentation ceremony. Prof. Joseph C.K. Lee, dean of medicine, stated at the end of the ceremony that the faculty will make every effort to maintain and enhance teaching standards.

The award winners are Prof. Ng Tribun, Z.A. Goulston, and Michael S.C. Tam for Year 2; Dr. Raphael C.Y. Chan for Year 3; Prof. Alfreda Stadlin for Year 1; Prof. Alfreda Stadlin for Year 2; Dr. Raphael C.Y. Chan for Year 3; Prof. Gary W.K. Wong and Fok Tai-fai for Year 4; and Prof. Leung Sing-fai for Year 5.
Introducing Programmes in Gender Studies

'Our goal is to promote awareness of and sensitivity to gender issues in society. We hope that government policies will tend to the needs and concerns of both genders and a more productive and harmonious world will be created,' said Profs. Catherine Tang and Gordon Mathews, proposers of the Gender Studies Programme, the first tertiary programme in gender studies in the territory.

Prof. Mathews is the chair, and Prof. Tang the co-chair, of the Committee on Gender Studies formed under the Board of the Department of Anthropology, Open to students from all faculties, the undergraduate minor programme in gender studies was launched in September 1997. It serves as a prelude to the initiation of an M.Phil. programme in gender studies in the 1998-99 academic year. Both programmes are administratively housed in the Department of Anthropology.

The Undergraduate Programme

The undergraduate minor programme requires students to take the course 'Gender and Culture' at the Department of Anthropology, and four elective courses from the pool of about 20 existing gender-related courses offered by different departments at the University. This means that students may find themselves looking at the women's movement in Hong Kong in 'Gender Issues in Hong Kong Society', discussing Emily Brontë's representations of women in 'Gender and Literature', or deconstructing the phenomena of AIDS and pornography in 'Sexuality and Culture', to quote a few examples.

The Postgraduate Programme

Prof. Tang pointed out that the purpose of launching the M.Phil. programme is to cultivate scholars who are knowledgeable in their own areas as well as gender issues in those areas. In other words, the programme's students will need to be grounded also in the discipline from which they study gender studies, and their certificates will read 'M.Phil. in sociology or engineering or psychology... gender studies', rather than 'gender studies' alone. The postgraduate programme will entail the creation of two new courses which will be taught as modules, meaning, teachers from different departments will take turns to teach the courses.

Academic and Social Background

Understanding something as inherent in our being as gender is of course important, but what motivated Prof. Tang and Mathews to propose the programme? Prof. Tang explained that their motivation came from both academia and society: 'There is a Gender Research Programme at the Hong Kong Institute of Asia-Pacific Studies wherein staff from different departments, drawn by their common interest in gender issues, work together on research projects, make social commentary, and hold conferences on gender issues. The programme has been in existence for about 10 years, so a core of staff who are knowledgeable and experienced in the area has been built up. In the past each discipline at the University dealt with the teaching of gender courses individually, if they did at all. Some staff members have expressed the interest and need to organize knowledge and research methodology related to gender into a formal programme of study in a distinctive discipline. There has also been a steady increase in the number of undergraduate and graduate students wishing to do research in the area.

'At the societal level, awareness of gender issues in the family and the workplace is growing. In legislature, the Sexual Discrimination Ordinance has been passed and the Equal Opportunities Commission set up. You can see the whole social climate indicates the necessity to attend to gender issues.'

'Gender studies is an established discipline in the US, Europe, and Japan,' added Prof. Mathews. 'It's time Hong Kong had its own. Gender studies examines specifically how we're conditioned as men and women, how we're moulded by culture, and how our gender roles shape the way we see the world.'

'Individual differences notwithstanding, gender and culture indeed influence the way we see and react to the world, as evidenced, incidentally, by the two interviewees themselves. When asked why no new courses have been created for the undergraduate minor programme, Prof. Mathews's answer was quick: 'No money. Everyone is doing this out of the goodness of their hearts.' On the other hand, Prof. Tang said, carefully weighing her words, 'Let's put it this way. As a start we are coordinating all the existing courses into a programme of study. But with more students joining the programme and more support from the University, there will be a greater awareness of the need for studying gender issues, and then, perhaps, new courses will be proposed by teachers. One of our goals is to stimulate interest among staff and students, so that new courses in gender issues at the undergraduate level will be put forward in the future. But to start with, we're making the best use of the existing resources.'

Source of Students

Do students from certain faculties tend to be more interested in gender issues than others? 'It's too early to say at this point, but my hunch is that they'll come from the social sciences, and the arts and humanities, and there'll probably be more females than males,' said Prof. Tang. Yet don't science and engineering students, perhaps more than their counterparts in faculties which study the human mind in social, cultural, and other contexts, need to know more about gender issues? 'Yes,' she said, 'engineering is a male-dominated field. The whole discipline is male-oriented. Machines are designed with male users in mind and for that reason they're often not user-friendly for us. Engineers should learn how to see and design things from a female perspective. Women are a big consumer market. Don't forget half the world's population is female.'

Stepping Up Publicity

Enrolment in the minor programme for this academic year is low, the proposers admitted, but prospects are promising. Prof. Mathews attributed the low number to the lack of time for promotion. 'The programme was formally endorsed last April. At the time I didn't realize that students could only sign up for a minor between 16th and 21st July. I thought that like most academic institutions I know of, students can choose to become a minor any time they want. So I didn't do any advertising for the programme as I would have had I known this. As a result not too many students even knew the programme existed.'

Prof. Tang also believes that the lack of publicity was the problem, but interprets the low number as a positive sign. 'Most students were gone from the campus after their final exams, so even if we had done any publicity, I doubt they would have come. I think the first year is not the best gauge of how the programme is received. The coming year will be a better barometer. Also bear in mind that students can choose their minor during any year before graduation. It's possible for them to take up a minor in their final year. I would not take the enrolment number at hand as a reflection of inadequate interest. If anything, it shows that some students are keen enough about gender studies to know of the programme before any publicity is made.'

At this point, however, Prof. Mathews is pleased to announce that the undergraduate gender courses are 'quite full of students' and the M.Phil. programme, 'well underway with many enquiries from students'.

To publicize the M.Phil. programme, information sheets have been distributed to students and flyers and posters sent to other local tertiary institutions. Prof. Mathews has also gone to gender classes to convey the information. Last November, the programme was given publicity at a general education exhibition on women's studies as well as at a three-day international conference entitled 'Gender and Development in Asia' organized by the Gender Research Programme.

Things are indeed looking promising for the Gender Studies Programme.
Reorganization of the Buildings Office

The CDO will oversee the development of the University campus and monitor the progress and quality of all capital and alteration/addition/improvement works. It will also be responsible for liaising with the government and the University Grants Committee with regard to campus planning and development.

The EMO will be headed by Mr. Benoy P.S. Tam, currently director designate of the EMO. Mr. Tam was previously Project Manager (Building Services, Group Development and Technical Services Division) of Hong Kong and Shanghai Hotels Ltd. He assumed duty on 11th January 1998 and will be formally appointed director of EMO on 1st April 1998.

From now to April, Mr. Vincent Chen will continue to lead the Buildings Office and refer all estate-management-related tasks to Mr. Benny Tam. Once the reorganization is complete, the staff lists of both the CDO and the EMO and the relevant telephone extensions will be announced.

The fellowship is intended to support visits from one country of the Commonwealth, or previously of the Commonwealth, to another for any of the following purposes:

(a) attachment of university staff, academic or administrative, to other universities to enhance training and experience,
(b) short study tours to other universities for the purposes of professional development,
(c) exchanges of staff between universities to further a specific development objective, or
(d) the attachment to another university of a graduate for research projects or training programmes with a developmental objective.

The fellowship is normally tenable for up to three months and in general covers cost of an economy class air ticket and a subsistence allowance not exceeding £3,000 in total.

Staff members interested in applying for the above fellowships may consult their faculty dean/unit heads, who should have received details about these programmes. Further enquiries may be directed to the Personnel Office (Ext. 7191/7288). The internal deadline for application is 16th April 1998.

New Services of the University Library

The University Library System has extended its interlibrary loan service to include a full-text document delivery service for institutional customers. Other pubs might also create or designate an e-mailbox through which their staff can send requests.

The ULS and the Registry will continue to sponsor the database development. A4 charges for interlibrary loan and document delivery will be applied, except for institutional customers, who will be charged at Ext. 8741 or Miss Y.C. Leung, head of the Interlending Section, at Ext. 7313. Inquiries may be directed to Mrs. Meliza Ng, head of the ULS Public Services Division, atExt. 7191.

The examination papers database will be searchable by course code, course title, programme of studies, and year set.

Final Exam Results

The results of the final examinations held for the Programme in International Studies and Development (CUM 97003) have been released. They are available from the Registry to registered students.

Interlibrary Loan Document Delivery

The University Library System has extended its interlibrary loan service to include a full-fledged document delivery service for teaching staff and graduate students. The service covers photocopies of periodical articles housed in the different ULS libraries on campus, articles print-outs from electronic journals or full-image databases, and periodical articles and books from external sources that are unavailable at ULS libraries.

Teaching staff and graduate students may place requests by completing a request form or through e-mail. The request should also specify if they would like to have the documents delivered from overseas if they are unavailable in Hong Kong.

Delivery costs are HK$30/40/50 for documents from the ULS collection, and HK$50/ A4 sheet (currently under review) for those from other UGC-funded institutions. The cost of delivering documents from overseas sources is the postage plus the delivery cost as determined by the supplier. Fees may be paid by the requesting party, or charged to research or departmental accounts, with the endorsement of the unit heads concerned. Department heads may also create or designate an e-mailbox through which their staff can send requests to the Interlending Section of the ULS, with the understanding that all costs incurred are to be borne by the department.

Enquiries may be directed to Mrs. Melinda Ng, head of the ULS Public Services Division, at Ext. 7313, or Miss Y.C. Leung, head of the Interlending Section, at Ext. 8741.

Examination Papers Database

An initiative of the ULS and the Registry, the purpose for the database is to provide fast, easy, and multiple access to past examination papers of the University. It includes papers of the current course exam from 1993 and is accessible through terminals in the main branch libraries. The papers are searchable by course code, course title, programme of studies, and year set.

華人腦科學協會籌備成立

華人腦科學協會籌備成立

曾參與首屆神經科學學術交流研討會的內地、台灣及香港知名神經科學學者，決定成立「華人腦科學協會」，進一步促進三地的交流合作。

協會的宗旨為促進腦科學的基本及臨床科學合作研討，推動學術交流及人才培養。協會的籌備委員會成員包括北京醫科大學生理學系主任及基礎醫學研究所所長樸保傑教授，台灣榮民總醫院醫學研究所高級研究員兼明大醫學教授羅福德教授，中大解剖學系新任教授及精神科學系陳佳鼐教授。

籌委會秘書處設於本校，由解剖學系陳活彝及陳新安教授負責。

該會將在新亞書院五十週年慶之時，舉行華人神經科學論壇，同時舉行華人腦科學協會的成立儀式。

首屆神經科學學術交流研討會於去年十二月十五至十七日舉行，由新亞書院及解剖學系合辦。

教育新挑戰

崇基學院和學生事務處上月廿三日在信和樓合辦「二十一世紀教育新挑戰講座及工作坊」，探討資訊科技在學校行政及教學上的應用。

應邀出席的講者均是負責研究及推行教育資訊科技政策的官員和資深教育工作者，分別是教育署課程發展處首席課程主任羅慶琮博士、學校行政及管理系統組高級教育主任林其月晶女士、助理教育主任賴炳華先生，以及沙田官立中學校長馬紹良先生。

他們向一百七十多名與會者介紹學校行政管理系統和應用經驗，並從宏觀角度分析香港資訊科技教育的未來路向、多媒體教學和課程設計。會後的工作坊吸引了一百三十多名有志投身教育事業的本校學生參加，進一步了解學校行政管理系統的應用方法。

中大校友重建內地小學

中大校友重建內地小學

中大校友會聯會「中國教育發展基金」捐資三十萬港元，協助韶關乳源瑤族自治縣重建「香港中文大學校友會聯會新民小學」。新校舍已於去年落成，中大校友、捐款人及義工一行四十多人特於十一月八及九日探訪該校，並主持啓用典禮和頒發勵學金及獎學金。新民小學創辦於一九六一年，經過三十多年，已破爛不堪。重建工程於去年七月展開，新教學樓樓高三層，面積一千平方米，有十二間課室和四間特別室。

另校友會聯會「小扁擔勵學行動」去夏籌得廿五萬元，協助乳源縣大橋鎗鎮重建「香港中文大學校友會聯會長沖明智小學」。該校將於四月舉行啓用典禮，「小扁擔」計劃在復活節假期組織「勵學行」探訪團，歡迎有興趣了解「小扁擔」工作的各界人士參加，尤其歡迎家長攜同子女一起體驗當地生活。查詢可聯絡中大校友事務處鄭先生(內線七八六零)。

最佳醫學教師

最佳醫學教師

醫學院為了提高教學素質，表彰優秀教師，特創辦本科課程最佳教師選舉，由學生評估教師的教學表現並選出最佳教師。

醫學院各年級的學生以教師的教學技巧、課前準備、表達能力、教學熱誠、是否樂於解答疑問及能否啓發思考等標準，提名他們心目中的理想教師；獲最多提名的教員成爲候選人，再經學生投票選出各年級的最佳老師。九七年度得獎者共有八位，名單如下：

• 醫科第一年生物化學系吳子斌教授
• 醫科第二年解剖學系高瑞齡教授
• 醫科第三年微生物學系陳超揚博士
• 醫科第四年兒科學系黃永堅教授
• 嬰兒科學系霍泰輝教授
• 醫科第五年腫瘤學系梁承暉教授

頒獎典禮於一月二十一日在威爾斯親王醫院舉行，由李國章校長主禮。醫學院今後將每年舉辦一次最佳教師選舉。

香港教育研究所新書

香港教育研究所新書

《基礎教育學報》半年刊由香港教育研究所出版，專為探討、促進和改善香港基礎教育事業。文章內容以硏究教育理論、探討教育問題、交流教學心得為主，亦有教育活動專題報導和書評等。

今期(第七卷第一期，一九九七年冬)的內容包括：

• 改革學校課程一一香港目標為本課程改革的啓示(莫禮時、陳嘉琪、盧敏玲)
• 香港小學中文科課本中的父母親形象研究(何偉傑、張桂蓮、黃敏儀、王笑娟)
• 香港資助小學的「對外公共關係」活動的探討(譚卓雄)
• 高小低成績組學生的學業成績歸因及其與抑鬱的關係(李帶生)
• 小學中文科教科書質素評鑑階段硏究報告(梁佩雲、馮翠兒、黃仁娜、梁振威)
• 中港台小學中國語文科課程綱要初步分析比較(唐美蘭、黃顯華、關伯強、曾錫文)

香港教育研究所以香港為主，另有澳門及台灣文章，國際文章亦有涉及，國際標準叢刊編號1025-1944，平裝本，三十五港元。

該學報在富爾敦樓大學書店有售，查詢及訂閱請致電香港教育研究所(二六零九六九九九)。
上海總會科研技術中心落成啓用

本校上月十日舉行上海總會科研技術中心開幕典禮，由校董會主席利漢釗博士、校長李國章及李和聲先生岀席。中心由上海總會捐資興建，座落校園東廓，樓高五層，總面積四千六百平方米，容納多個實驗室及技術服務部門，為醫學院、理學院、工程學院及相關研究單位提供先進的科研設施及完善的支援服務。該中心將可促進遺傳基因、癌病及免疫學等研究，加強中大在科研上的領先優勢。

中大仁濟合設教科中心
培訓家庭醫生並服務社區

社區及家庭醫學系與仁濟醫院上月廿二日簽署合作備忘錄，設立家庭醫學教科中心，加強荃灣區的護理健康服務，並訓練中大醫科生。合約代表為系主任李紹鴻教授和醫院行政總監鄭柏榮醫生，出席者包括中大醫學院院長李川軍教授和仁濟醫院主席吳王依雯女士。

該教科中心是本港首個由大學與社區醫院合辦的家庭醫學教科中心，於去年初開始試驗推行，至今共有二十四名中大醫科生在該處接受臨床訓練，另有四十多名學生到該中心學習家庭醫學工作的組織及管理。
